GALLOWAY BROS. & CO. 1917 Seedsmen and Nurserymen 1917 Planting Guide and Pure Seed Book 1917 WATERLOO, IOWA, U.S.A.

Our location in Waterloo puts us within 24 hours of about one-half of the population of the United States by mail. We have excellent express and shipping facilities, having three trunk line railroads, including the Great Western, Rock Island, and Illinois Central, and the Waterloo, Cedar Falls & Northern electric road which is connected with the Northwestern and the Minneapolis & St. Louis. These enable us to give your orders quick shipment.

1917 Greetings, Friends and Customers! Here is our 1917 Pure Seed Book and Planting Guide

We have tried to condense it so our friends and customers will not have to wade through volumes of

description to find just the things they want and how they are planted and cared for.

In 1917 our motto will continue to be,—"Pure, Hi-Quality Tested Seeds at Right Prices"! shortages in foreign crops of seed stock some seeds have advanced in price. But we have held our prices down just as low as possible. All we ask is a small profit on thousands upon thousands of sales rather than a big profit on a few sales. We have constantly kept this in mind since we started this seed business. Our success is best shown by our annual growth.

Our Best Advertisements Are the Friends We Make!

Our customers in 1916 have again proven to be our best Our customers in 1916 have again proven to be our best advertisements. They have proclaimed our seeds so highly that we have early been receiving hundreds and hundreds of inquiries for our 1917 book. The many unsolicited testimonials that we receive every season mean that our "Hi-Quality" seeds, our standard of germination and the testimonials that we receive every season mean that our "Hi-Quality" seeds, our standard of germination and the manner in which we handle our customers' orders is what counts in building up a large seed business. We try to keep in mind that it is not the order that you give us this year that counts, but it is your order every year that we strive for.

This book is a complete list of everything worthy of planting in orchard, farm, garden and home surroundings. We have left out all varieties that from our experience are not actually worth planting, including only what we know to be best by actual test.

BURHANS dvertising

Your 1917 Success or Failure Depends on Pure Seeds

The matter of buying your seeds for 1917 planting may look like a small matter but it is an important job because so much depends on the right kind of seeds.

much depends on the right kind of seeds.

I have often said that no matter how valuable your land—no matter how much you weed, dig, hoe or cultivate—no matter how deep you plow—how well you make the seed bed, how much you disc and harrow or rake your garden—no matter how much the sun shines, or how much rain you get—or how much you irrigate or water your garden—no matter how ideal the weather conditions may be or how much you fertilize or manure the soll—and everyone of these things represents real money—they are all lost—all wasted—all the effort counts for nothing if in the first place you don't have the right kind of seed to put in the soil. the right kind of seed to put in the soil.

Good seeds, pure seeds, sure seeds are the smallest initial Good seeds, pure seeds, sure seeds are the smallest initial investment you make in your garden or your field crop. The difference between good seeds at \$5 a bushel and poor seeds at \$1 a bushel is just \$4 a bushel. At buying time you spend \$4 less than you would if you had purchased good seeds. But at harvest time the poor seeds will cost you from \$100 to \$500 in crop money which the good seeds would have secured for you. Good seeds are like good livestock—like begets like! Good seed is the cheapest in the end; and only the results at harvest time count! The seed we offer is cheap when compared with poor seed if you get the poor seed for nothing and were paid cash money for taking it, besides.

Our seed company is young but has had perhaps the most phenomenal growth of any secd concern in the United States, this being its seventh year. But there is a reason: We have sold only pure, tested seeds that were fresh, true-to-name and full of vigor. We have tried to treat our customers as we would be treated. We believe the customer to be the foundation of our business. We are determined to give unconditional satisfaction to every customer or we want our seeds returned to us at our expense. This is the basis on which we ask for your seed order for 1917, no matter how large or how small! An order for 25c worth of flower seeds is just as welcome as an order for \$100 worth of field seeds. We will do everything in our power to please you if you are a new customer. If you are an old customer we want to thank you again for the patronage you have so generously given us. We only ask for a chance to rectify any mistakes. Come and see us when you can. Our seed company is young but has had perhaps the most Come and see us when you can.

Myalloway

The above picture shows the Galloway Bros. & Co., seed house at Waterloo, Iowa. When you come to Waterloo take the Galloway car which will bring you right to the seed house door. The electric interurban from Cedar Falls to Waterloo passes the door. We have excellent shipping facilities. The Rock Island, Illinois Central, Great Western and the Waterloo. Cedar Falls & Northern all handle our freight and express very quickly. Our mammoth business has forced us to brild an addition on to our seed house the past summer. Friends of ours who are acquainted with our buildings will recognize the increased size. We thank you for your patronage.

Don't Make The Mistake Of Buying Cheap Worthless Seed!

WHEN we started this seed business seven years ago we determined that we would not under any circumstances offer cheap seeds.

Most all papers earry advertisements, in season, offering cheap seeds—alfalfa, clover, timothy and other field and farm seeds—at ridiculous prices. Cheap seed always will be offered by some seed houses at low prices, but those who used this kind of seed have most always paid dearly for the seed at harvest time.

The past few seasons there have been offered dozens of collections of garden seeds at from four to ten cents, but all these seeds put together were not worth the postage it took to carry them to you. Folks who replied to these advertisements know this to be true.

Good seed costs money. It takes time and labor, good soil and pure bred stock to produce it in the first place and it cannot be given away or sold at ridiculous figures.

Farmer Henry Williams will buy forty bushels of fine seed wheat at what his neighbors may call an extravagant price, but with proper care he will get a splendid corp which when graded and eleaned for seed will return him many times what his original seed cost.

His neighbor can buy the same variety of wheat from a different seed house—one that makes a specialty of low prices and medium or cheap quality—but at harvest time he pays the second time for his seed—and his neighbors do not want any of it at any price to sow on their farms.

Here is a letter that tells the whole story of good seeds. It is one of the many hundreds that we have in our files; all testifying to the quality of Galloway Bros. & Co. Pure, Tested, "Hi-Quality" Farm and Garden Seeds. Please read it.

October 1, 1916 Swanberg, Minn.

Galloway Bros. & Co. Waterloo, Iowa. Gentlemen:

Waterloo, lowa. Gentlemen:

I am glad there is one seed firm I have bought from that can be depended on to send seeds that are true to name and will grow. All the seeds I planted last spring came from Galloway Bros. & Co. except those I raised myself.

I furnished the Cass County exhibit at the State Fair with more than an auto load of excellent grains and vegetables grown from the seeds I purchased from you. Cass County won first premium over all the counties in the State. I also received 35 premiums at the Cass County Fair.

I have never raised such fine mangels, sugar beets, rutabagas, potatoes, etc., in my life as I have this year, and these crops were not grown on high priced land. I bought it for \$10 an aere—five vears ago. I never fail to speak a good word for Galloway seeds,

If you come up this way on your vacation, stop in and see us.

Yours very respectfully,

I believe in making farm property beautiful. This picture and the other half of it which is on the opposite page shows some of the landscape gardens on the Galloway-Messer Farm near Waterloo. Iowa. All kinds of hardy plants and flowers and northern grown shrubbery are to be found in profusion on this farm. Nothing but Galloway "Hi-Quality" pure tested farm and garden seeds are planted here. For year in and year out satisfaction there is nothing more satisfactory than hardy perennial flowers which come up every spring without any effort on your part. Plant them once and you are done. They are as easy to grow as weeds. Every farm should have large quantities of them scattered around because the different varieties you can have will give you a constant period of blooming from early spring until late frost.

We have a very large trade in vegetable plants, garden plants and bedding plants of all kinds. The green houses shown above are in fact all located behind our seed house but from the view this picture was taken, they could not be seen so we had the artist put them out here to the right of the seed house to give you an idea of their size. The big boiler house next the green houses heats them as well as the seed house and warehouse behind the seed house which is not shown in this picture. Come and see his whenever you can. We will be glad to show you over our plant.

But Are Worth More! This Page Prize Winning Seeds Cost More! No Tells Why, So Read Every Word!

The business of Galloway Bros. & Co., seedsmen and nurserymen, has been built up because of the high class seeds and nursery stock we sent out. We believe that one satisfied customer in a community will eventually bring us more business than any other advertisement.

Every one takes pride in their crops. Most every one knows these days that good crops depend first upon good seeds and second upon good cultivation and attention.

We make a specialty of legume seeds such as clover, alfalfa, soy beans, field peas, vetch, etc. Legume crops are the most important on any farm because of their fertility building value.

Pure tested seed is the best weed killer because every seed grows into a hardy, robust, vigorous plant that chokes out and kills the weeds better than anything else. If the seed does not sprout quickly and throw up a plant there is a vacant place which weeds will always take possession of, and this is exactly what happens when you by seeds that are partly "filler," every grain not plump and hardy, germinating and vigorous. Good seed—prize winning seed—cost no more when the net results at harvest time are considered.

If you have never bought Galloway Bros. & Co. Pure, Tested, "Hi-Quality" seeds nineteen seventeen is a good time to begin. We want to convince you that it pays on the farm and in town or country gardens to plant nothing but the best—seeds that have been tested in the soil and in seed testers for germinating qualities—seeds that have been cleaned and recleaned—seeds grown by the best seed breeders and growers in America and Europe—seeds that have been stated in throw up a strong, vigorous plant.

No seed but the best is worth planting on farm land in the United States today because the price of this land is going up. It must earn more and must produce more in order to pay a fair return on the Investment.

Good seed is exactly like good live stock—like begets like. All we ask you to do is try Galloway Bros. & Co. Pure, Tested, "Hi-Quality"

farm, field, garden and flower seeds beside ordinary seed sold by ordinary seed houses. The result will make you our customer!

Don't take a chance this year! Prices are high on all kinds of field and farm crops and all kinds of garden stuff! Good seeds will increase your harvest and bring direct cash returns from your garden!

We started our fighting campaign for pure farm, field and garden seeds seven years ago and we are keeping it up. That's why we ask for your business in 1917.

Don't forget that a large portion of this book is devoted to nursery stock, small fruits, ornamental shrubs and hardy perennials. We have tried to make this book full of valuable planting suggestions. The pictures at the bottom of these pages show what can be done to make farm life more attractive. A few shrubs and plants carefully set out will beautify and improve in looks and cash value any home grounds—country or city.

Write us for suggestions and see the landscape department suggestions in the back of this book.

GEO. HALL Our Seed Expert

Malloway

The photograph above is a continuation of the photograph on the opposite page. In the back ground of this picture can be seen faintly another of the practical gardens where Galloway pure, tested seeds are tried out every spring and summer in a practical way. We will not offer any seeds from the Galloway Bros. & Co. seed house that we do not know we are positively right in every way. This is why we do not catalog many varieties of seeds which are listed to sell only and have no practical garden value. In addition to the farm and garden seeds planted on the Galloway-lesser farm we are also in direct charge of the William Galloway Co. farms, all of which are planted to our seeds. If you come to Waterloo we will be glad to show you these farms and the excellent fields of grain and the fine gardens on them,

The Story of A City Man's Garden

S a joy producer and care banisher the home garden has few equals. There is a thrill in every stroke of the hoe and the busy merchant, professional man or farmer will find that an hour or two of the early morning spent in the garden will fit him for the day's task. And that tired feeling which creeps upon one as the cares of the day accumulate vanishes in the quiet of evenfall among the growing plants. Here, close to nature, the mind relaxes and turns to the simpler things of life, and both mental and physical benefit is the reward.

The story of plant life from the seed to maturity is told in daily chapters, entrancing, as it unfolds itself! Fascination and interest inclease as each new lesson is learned. Observant persons may gain knowl-

edge not found in books.

The writer has been a gardener since childhood, engaging in this healthful and profitable pursuit when circumstances permitted. The garden in which the views accompanying this article were taken represented some of the results obtained through soil treatment, Galloway Bros. & Co. tested seeds and thorough cultivation. Fine as my gardens have been, they can be equalled and even bettered by anyone who is willing to bestow a proper amount of care and attention. Keep a record of your garden products showing variety, date of planting and maturity, results attained, weather conditions, etc., and this will prove an aid in future

Here are a few of the Por-terhouse tomatoes grown in Mr. Hartman's garden. Read the story on this page.

This view of the Hartman garden shows how Mr. Hartman has worked in the onions with other plants. He believes in keeping something growing all the season, This makes the garden productive in dollars and cents

Back Yard Will Supply Ordinary Family

Why complain of the high cost of living when with successive planting the average back yard will supply an ordinary family table with ample vegetables during the summer season as well as a quantity to be stored for winter use? And no vegetable tastes quite as good as that fresh from the garden. This is not simply a matter of sentiment-evaporation begins the instant a root is pulled from the soil or a fruit is detached from the parent stalk and with it depart juices and flavor in quantity depending upon the character of the vegetable. Hence, if you would have the best, grow it yourself.

The economic waste represented in untilled city lots and back vards of many American cities is greatly to be deployed. One of the hopeful signs of the times is the effort being put forth by the extension departments of some of our colleges, schools, civic and commercial bodies to bring about an improvement in this con-

JOHN C. HARTMAN.

Note.-Mr. Hartman is editor of the Waterloo Evening Courier and Reporter and finds health and recreation in planning, planting and cultivating the garden shown on this page.-Wm. Galloway.

Our Front Cover was Suggested and the Man Who Painted the

How do you like our front cover for 1917? We think that basket of Delicious apples looks mighty good! And we also think that the painting by Mr. Floyd Brackney of the champion ears of

that the painting by Mr. Floyd Brackney of the champion ears of yellow dent corn also looks very realistic.

Three or four years ago a young artist with a bundle of paintings under his arm came into our office. He said his father was in the grain business at Clemons, Iowa. And told us that he was inclined to paint corn because of so many poor paintings of corn that he had seen. We made a note of it at the time that if ever we wanted any corn painted for the cover of our seed book and catalog, we would have Mr. Brackney do it. It was not until the fore part of the past summer, however, that we made arrangements with Mr. Brackney to paint the picture you see on the front cover of this book. In the meantime, however, Mr. Brackney had painted a picture of corn five feet high and nine feet long, one of the largest paintings of corn in the world, and which he gave the title, "Prosperlty." This picture was hung in the Iowa Building at the Panama-Pacific Exposition in San Francisco and was written up by art journals in this country and abroad. The pic-

the Man who Painted the Corn
ture was commented upon very favorably by critics. The resul
was requests for Mr. Brackney's work from all quarters of th
United States and soon his corn pictures were hung in the mor
prominent chambers of commerce, boards of trade, hotels, promi
nent grain dealers' offices.

Mr. Brackney's paintings of corn have caused so much commen
that a prominent corn dealers' association is about to take up with
him the matter of having him paint an ideal ear of corn of th
several breeds of corn. Also several monthly literary magazine
have asked him if he could paint covers for some of their fal
issues, painting nothing but champion ears of corn. Mr. Brackney
will not paint anything but the finest corn. Ordinary corn denot appeal to him. He wants to make a life effort of reproducing
corn on canvas just as it is being bred by the greatest corn breed
ers in the United States.

Turn back to the front cover and look at this painting of coragain. The printing art does not permit of all the beautiful shad
mags nor the colorings that Mr. Brackney doe
know what corn is, no matter what variety he paints.

How to Grow a Prize Garden

the heads are ready for cutting in July. This is a round headed type of cabbage. Our Early Jersey Wakefield is a pointed or sugar-loaf type of cabbage. Either will produce good uniform heads of medium

Umberland Raspoerries

It is always profitable to
have a planting of small
fruits in the home garden,
Raspberries are always appreciated in the home. We
know of no better kind than
our Cumberland for this purpose. It is the largest of
all black raspberries; of delicious flavor and good size,

The Improved German Soil Inoculator, Nobbe-Hiltner Process FTRADE MARK REG'D. DEC. 6, 1898, NO. 32.212 Restores and Maintains Soil Fertility

More of our farmer friends every year begin to recognize the value legumes bring them. When the land was new and the soil virgin they planted corn and grains—year after year. At first there were bumper crops—because the plant food was there. But this cannot go on forever—the

land becomes exhausted—worn out—spent.

Don't wait until this time comes! Your land needs plant food every year—right now! You can get it in two ways by buying high priced fertilizer and manuring-if there is enough manure. Or you can get it by planting legumesvetch, clover, alfalfa, peas, beans, etc. This is the better and cheaper way.

But legumes alone will not do it! Have you ever looked at a root of vigorous clover or alfalfa plant? You will see that the roots are full of knots or lumps. These lumps are the nodules.

WHAT ARE THESE NODULES? Many people have asked this question in times gone by. Nobody knew. Finally in 1886 a noted scientist found that these nodules were filled with millions of germs or bacteria. He also

learned that these bacteria (when they are in the root) take nitrogen from the air and FEED IT TO THE PLANT. Only when the nodule bacteria are present the legume takes its nitrogen supply from the air.

Nobbe and Hiltner were the first to get these bacteria in pure form. They improved the bacteria from the rootsmade them stronger—and finally put them up in such a way that they remained healthy. That is "NITRAGIN" strong, live legume bacteria to improve your farm.

There is only one "NITRAGIN"—it is the original pure

It inoculates your seed. It is easy to use. Don't fail to plant legumes, alfalfa, clover, vetch, peas, beans, cowpeas, soybeans, etc. Inoculate them with "NITRAGIN."

It is the most economical, the surest and the best way to get large quantities of fertility into your land at the lowest possible cost and with really no extra labor at all.

There is a special culture of "NITRAGIN" for every legume.

As the Farmer Finds It

Cherokee, Iowa, Nov. 15, 1916.

"Your alfalfa inoculation worked fine. I used some at Wilmot, Minn., on a field that was seeded to alfalfa in 1915 and which came up and then died. The stand this year is extra good.

"Also I used some at Ivanhoe, Minn., on a new field; this also did extra well.

"Resp.,

"L. R. Stanosheck."

Just One of Many Testimonials

I sowed ten acres of alfalfa the first of August and got the best stand that I ever got and I have been sowing for twelve years, I used two five-acre cans of your "NITRAGIN" and about five tons of raw limestone to the acre. I am going to sow about twenty-five acres next year and will treat it the same way, as I think it is uscless to sow without the "NITRAGIN" and raw limestone. Heretofore I only got about one-third of a stand,

Yours very truly, T. B. RIPY. Lawrenceburg, Ky.

A comparative test of different commercial cultures as well as soil transfer was made by the New Jersey Experiment Station.

Read their conclusions as given in Soil Science (Vol. 1, No. 6, June, 1916): "We are led to conclude that the use of inoculating material may be very desirable in the growing of soybeans and other legumes"—"Where the soil is lacking in the right type of bacillus radicicola, inoculation is eminently desirable and even when the

organisms are present in limited numbers, the addition of larger numbers may be profitable"—"It may be pointed out, also, that there were marked differences in the effectiveness and the quality of the different commercial cultures as well as the different soils employed. Among the commercial cultures used 'NITRAGIN' was evidently the most effective inoculating material."

Alfalfa—Grasses—Clover

Northern Grown Alfalfa, Grimm Quality

This very high grade seed was grown for us in South Dakota and Montana on high land and is of course non-irrigated. It is 99 ½ per cent pure and germinates as near the 100 per cent mark as it is possible to get seed to grow. For all northern latitudes this hardy seed s ideal and can be safely depended upon to make a stand and pro-

Price, per lb., 40c (by mail); 20 lbs., \$6.00; per bu., \$16.20; per 100 lbs., \$27.00.

Northern Grown

This excellent type of alfalfa is very extensively grown in the northern states and gives universal satisfaction. It is a long-rooted, sturdy variety and yields an abundance of rich, deep green foliage which makes food rich hay, exceptionally high in protein value. Will thrive in any

Alfalfa, Dry Land

latitude, being perfectly hardy. Try this seed on high exposed positions. Price, per lb., 32c; (by mail); 20 lbs., \$4.55; per bu., \$12.00; per 100 lbs., \$20.00.

Kansas Grown Alfalfa

We have a very fine stock of this seed. It is ideal for southern lati-udes and even has been successfully grown in the northern states when pring sown. It is of the very highest standard of purity and germina-

Price, per lb., 32c (by mail); 20 lbs., \$4.15; per bu., \$11.90; per 100 lbs., \$19.85.

Permanent Hay Pasture Mixture

seed of these Permanent Mixtures is more costly than Timothy, and more is required per acre, but by reason of their heavy cropping qualities and permanency they soon repay the extra cost and leave a handsome margin for the farmer, when the cost of plowing, harrowing and reseeding Timothy every three or four years is taken into consideration.

Although the most widely cultivated hay grass in the United States s Timothy, or a mixture of Timothy and Clover, and while they answer he purpose admirably on farms where the soil is suitable, and where he usual three and four years' rotation is carried on, yet there are neuronally the grasses which will yield more profitable returns.

The competition of the Western States on wheat, corn and other grain as made the growing of grain in the Western States and the usual otation farming unprofitable, but hay still yields a fair profit, and the armer whose land is sown with a proper mixture of Permanent Grasses, equlying only an occasional top-dressing of manure or fertilizer to Jaintain Their Heavy Cropping Qualities for Twenty Years or more oes away with the necessity of plowing and rotation cropping with all its ttendant expense. The most serious item of expense on the farm, the abor bill, can be largely reduced and thus give the reasonable prosect of profitable returns at a minimum of labor and expense. The

The grasses used in the Mixture recover quickly after the hay crop is cut and yield either a second crop or pasture in the greatest abundance during the summer and fall months. Within a few days after cutting, their rich green appearance as compared with Timothy, is a desirable feature, especially in fields close to the house, as it gives a parklawn effect to the surroundings. Sow 40 pounds to the acre.

Price, 10 lbs., \$1.95; 20 lbs., \$3.80; 50 lbs., \$7.50; 100 lbs., \$14.75. By freight or express.

Permanent Pasture Mixture of Grasses and Clover

Although we have never catalogued grass and clover mixtures, we are nevertheless supplied large quantities of this to our customers pon request. The demands for these mixtures have increased won-lerfully in the past two or three years. We have consequently decided offer grass and clover mixtures this season. We are in exceptionally ne shape to fill orders for Permanent Pasture Mixtures of grasses and clover owing to the heavy supplies of the necessary seed on hand. The Galloway mixture is composed of correct proportions of grasses and lover suitable for various classes of land, producing most luxuriant

pastures and wonderful hay crops. We recommend about 35 to 40 pounds of this seed per acre to insure best results. Let us know as nearly as possible the nature of your soil so that we can make up a mixture especially suited to your requirements. The mixture is made up of the best seeds of the highest quality and purity of germination.

Price, 10 lbs., \$1.50; 20 lbs., \$2.60; 50 lbs., \$6.25; 100 lbs., By freight or express.

Permanent Pasture Mixture for Bottom Lands with pasture or hay mixtures. Sow from 30 to 40 pounds per acre.

This mixture has been supplied extensively for heavy and low-lying ands and we have had good results where farmers have hitherto failed o produce a crop previously. We know exactly what Grasses succeed nder these conditions and this knowledge is certainly worth a great eal to farmers about to seed land who have had no previous experience

Price, 10 lbs., \$2.25; 20 lbs., \$4.40; 50 lbs., \$10.50; 100 lbs., \$21.00. By freight or express.

As this is a mixture of natural grass and clover, mixed in correct roportions to suit rolling land conditions, and is especially adapted of the Middle West, we would like to have our customers always state, then ordering grass mixtures, the state of the land so that we can vary

Permanent Pasture Mixture for Rolling Lands ural grass and clover, mixed in correct | this mixture to suit special conditions. Sow from 30 to 40 pounds per Price, 10 lbs., \$1.80; 20 lbs., \$3.40; 50 lbs., \$8.00; 100 lbs.,

\$16.00. By freight or express.

For several years past there has been a big demand for a Hog Pasure Mixture that would not only produce a heavy yield of green fodder ut one that could come along quick and be ready in a hurry. We alve decided to meet this demand and have made a well-balanced Hog Pasture Mixture. It is especially good for hogs but equally desirable or cattle, sheep and calves, Our Annual Hog Pasture Mixture can be own quite early and be ready to pasture in about 8 weeks, and just in the finest of condition in July and August when other pastures are eginning to dry up. It also can be sown during July and August

Annual Hog Pasture Mixture and used as a fall pasture. This mixture should easily produce as high as 15 tons of green fodder per acre during the season. Sow at the rate of 50 to 100 pounds of seed per acre, depending upon the richness of the soil. If the soil is unusually rich 100 pounds of seed per acre would produce splendid results. Keep it well pastured down, as the stock like it best when it is young and tender.

Price, 10 lbs., 50c; 20 lbs., 90c; 50 lbs., \$2.00; 100 lbs.,

\$4.00. By freight or express.

Sudan Grass

Exhaustive trials have proved that Sudan Grass can be grown almost nywhere. It seems to be unaffected by temperature and grows as vell in a cool climate as a hot one. It requires no special quality of oil; black loam, clay and sandy loams have all produced uniformly uccessful crops. Its most valuable quality is its resistance to drought. n dry or semi-arid sections it thrives to perfection and yet excessive noisture does not indure it in any way. Athough this grass in many zays resembles Johnson grass, it does not develop the objectionable of stocks of this grass and is an annual, the first winter killing it completely. This valuable grass completely outdistances all competiors in quantity of yield. Three or four cuttings in a single season, each producing from 1½ to 2 tons of hay per acre can be secured. A ery conservative average is 5 tons of hay per acre each season.

Feterita

Feterita is an excellent drought resister. It stands erect, branches out from the root and matures 25 to 35 days carlier than Kaffir. Yields from 60 to 100 bushels per acre were reported last season.

A remarkable feature is that in Southern States two crops of Feterita can be raised on the same ground, planting the second crop with the ripe seed of the first crop. It is also reported that chinch bugs do not bother Feterita.

ripc seed of the first clop. It is also become the bother Feterita.

Feterita is bound to become one of the most important crops of this western country. Get your start now and be among the first to profit by this valuable addition. Ask for prices.

Permanent Pasture Mixture for Rolling Lands

Inoculation with "Nitragin" is an Investment

Rosholt, So. Dak., April 5, 1915. I must tell you the success I had with "NITRAGIN." I used some on red clover seed in 1913 and in 1914 I cut one of the finest crops of hay I ever saw grow here and then I cut the second crop for seed and got about 1 bushel to the acre of clean seed just by cutting it with a mower and threshing it with a threshing machine. was the most even stand I ever saw here and I lay it to the use of "NITRAGIN."

Rape **Dwarf Essex**

Rape is especially relished by hogs and sheep, and when you stop to think about it the entire returns can just be considered that much actual profit, because the outlay of expense is plactically nothing.

Take, for example, the putting of rape along with oats. It is certainly a splendid way to get an abundance of feed for practically nothing, because it really costs you nothing when you come to think about it.

Rape can also be sown between the corn rows at the last cultivation, and will insure a splendid pasture for your hogs after the corn has been harvested.

Cane Amber

As a fodder crop sugar cane furnishes an enormous amount of feed, producing a richer and more nutritious feed of greater value than fodder corn. Sorghum can be profitably grown in all sections where corn is produced, withstanding drought better than corn. Sorghum has not only taken front rank as one of the greatest forage plants, but is also extensively raised for sugar or syrup.

Sunflower Giant Russian

A great favorite for both the poultry raiser and the hog raiser. It is hardly necessary to call the attention of the poultryman to the egg-producing properties of sunflower seed. It contains a large percentage of protein, very fattening, and a heavy yielder. The plants will range from 6 to 10 feet high, heads large and well filled. You will find it relished very much by the hogs and poultry.

Flax Northern Grown

When sowing flax seed be sure you get it absolutely pure. There is perhaps no seed more liable to be impure than flax. Quite 75 per cent of the samples sent in to us have contained a very large percentage of foreign seed, principally wild mustard. No practical farmer requires to be told by us what it would mean to his farm if he were to unknowingly sow down a few acres of flax that contained wild mustard seed. To sow mustard seed is to reap the whirlwind.

Giant Spring Rye

Is a valuable crop for either green fodder, straw or grain; often used to sow along with vetches. Absolutely the finest thing to sow on poor, worn-out or sandy land; produces astonishingly good crops. It is also a valuable eatch crop to sow where fall sown grain has been winter killed.

Japanese Buckwheat

We have secured a very fine stock of this entirely distinct Buckwheat from an expert raiser of this seed. This variety of buckwheat is far superior to the Silver Hull variety owing to the fact that it is a much carlier seeding variety and for that reason it is especially adapted to the climatic conditions of the northern states.

Speltz or Emmar

The United States Department of Agriculture has issued a bulletin on speltz, commending it highly, and the introductory paragraph of that bulletin states:

"The extremely variable conditions in some of our western states have made it desirable to give particular attention to crops resistant especially to cold and drought. Among such crops Emmar ho'ds high rank and should become one of the prominent crops for stock feeding."

Note .- Owing to the uncertainty of the grain market, we are unable to quote prices at time of going to press. Ask for our wholesale RED LIST.

Wheat **New Marquis**

We are pleased to be able to offer to our farmer friends an exceptionally fine grade of this great spring wheat. The stock we offer was grown on our own farm, and produced for us 47 bushels per acre. The grain we are offering has been especially graded for seeds on our own up-to-date machinery. It is exceptionally uniform, hard and plump and we feel very confident in predicting that our customers will be quite as successful with this grain as we were on our own farms,

Minn. 169 Blue Stem

In this we offer the second new wheat orig-In this we offer the second new wheat originated at the Experiment Station. It is a progeny of the Haynes Blue Stem. Its average yield for four years as compared with the parent variety is given by the Experiment Station as follows: Haynes Blue Stem, 22.5 bushels per acre; Minnesota No. 169, 28.3 bushels an acre.

bushels an acre.

This comparison with its parents which is a superior variety, tells the whole story as to yield. This is the best Blue Stem Wheat of which we have knowledge. It has given an average yield during 14 years, through favorable and unfavorable seasons, of 26.7 bushels an acre. No better wheat for the Northwest is grown. In quality it proved in milling tests equal to the best. This variety has no beards.

Macaroni or Duram

In the field this wheat grows very strong and with surprising rapidity, so rapidly as to get ahead of the weeds. It does not shell or bleach and is also hall proof, owing to the tightness of the hull. The straw is very strong.

Barley **Pedigreed Manshury**

We say without the slightest hesitation that we hold a stock of this fine barley which cannot be excelled. The kernels are plump, hard and a nice bright color and of strong germinating vitality. Just the kind of grain to produce vitality. Just bumper crops.

Barley Oderbrucker or Wisc. No. 13

We have secured an exceptionally fine stock We have secured an exceptionally fine stock of Genuine Oderbrucker Barley. The demand for this barley last season was extraordinary. We were not able to take care of all our orders. The demand exceeded the supply by several thousand bushels. We would therefore ask our customers to kindly send us their orders for Oderbrucker Barley as early as possible.

Cow Peas New Era (Early)

There are quite a large number of cow peas offered by seed houses, but there is not a more reliable variety anywhere than the New Era. It is much more productive than any of the old class and is especially suited to the Northwestern States, owing to its hardiness. In the cow pea we have a fertilizer and a food at the same time.

Field Peas Canadian

They are an ideal crop for our Northwestern etimate; they will flourish in districts too cool and uncertain for corn. For soiling, plowing under or as green manure no crop is of more importance.

Pea hay cut green and well cured on

Pea hay, cut green and well cured, approaches clover in feeding value and is more relished by horses, cattle and sheep than the straw of any other of the small grains. Field peas when sown with oats or barley, for forage, hay or pasture, make an excellent combination and is much relished by all kinds of stock.

Soy Beans Extra Early Yellow

(The Great Ensilage Plant)

(The Great Ensilage Plant)

No field crop has come to the front so rapidly as the soy bean. It has proved its worth wherever grown; as a soil builder it has few equals; for growing in corn for ensilage it is an excellent plant. Sow between the corn rows after the last cultivation. They are planted and harvested practically the same as cow peas. A favorite way to plant them is in rows about 2½ to 3 feet apart, thick in the rows. They grow erect and often reach a height of 4 feet and the yield of seed is enormous. As much as five tons of dry hay has been cut per acre and as much as 50 bushels of seed harvested per acre.

Galloway's Seed Oats

Iowa's Greatest Early Oat Iowa 103 Out-yielded All Other Oats, 1916

The Iowa 103 Oat has created a greater sensation than any other oat ever introduced. It outyielded all others during seasons 1915 and 1916. Our customers, needing a good early heavy-yielding oat, cannot possibly do better than to give the Iowa 103 a trial. This oat was introduced by the Iowa State Agricultural College about three seasons ago, and has made good ever since its introduction. We have secured an exceptionally nice stock of the Iowa 103 Oat which is raised from the original Ames stock. The Iowa 103 Oat can be depended upon to yield well anywhere in the Corn Belt.

What Professor Burger Says:

Gentlemen: The "Towa 103" oat has given remarkable yields in Black Hawk Country and throughout the State. In plot-tests conducted in the county this year and including all of the standard varieties this variety out-yielded the other oats by an average of better than ten bushels per acre. In another series of tests which included over 1000 bushels of "Towa 103" distributed among over 50 farmers, this variety

out-yielded the home-grown variety from 5 to 25 bushels per acre. In only three or four cases out of the entire number of experiments were the "Towa 103" out-yielded by the local variety, while in almost every case the 103 gave the highest test.

From the results which we have secured in Black Hawk County and which have been secured in Iowa, I would consider this variety among the best. They have an advantage in being early for that reason out of the way of the hot weather of early summer. They are out of the way of storms and are not nearly so apt to lodge. Besides this, they are much better to use as a nurse crop. Aside from these advantages, there is a distinct advantage in the amount of grain which they will produce. One year with another, I believe, they will out-yield any other varieties which can be grown. Wherever possible more of these early oats should be grown. A. A. Burger, County Agriculturist.

Price, 1 bu., \$1,25: 5 bu. lots, \$1,20: 10 bu. lots and up.

Price, 1 bu., \$1.25; 5 bu. lots, \$1.20; 10 bu. lots and up,

Regenerated Swedish Select Oats GALLOWAY'S FAMOUS

Our Genuine Regenerated Swedish Select oat is a very heavy yielder, heavy stiff straw, broad leaves, heavy grower, large white berry, thin husk—many stalks on our farm yielded as high as 200 kernels to the stalk. It is a tremendous yielder—always tops the market. On account of its stiff straw it does not easily lodge but stands up better than other oats—a decided advantage, especially in the Corn Belt where the land is rich.

Our advice to every farmer is to try ten or twenty bushels or even more of this seed. Many farmers who bought this seed claim if they had put their entire fields in with this seed at our price they would have been money ahead when you figure the net results at threshing time, and this is the only thing that counts.

Space will not begin to permit us to tell you here what we would like to tell you ahout this wonderful Regenerated Swedish Select Oats, and what it has done for hundreds of customers in almost every state in the Union, many of whom thought they could not raise good oats at all

because their ground was too rich, etc. You can raise good oats if you put them in right with the right kind of seed, and year in and year out, there is no crop that is more sure or a higger payer.

They have been tried and tested under almost every condition and climate in every state in the Union. As far west as Montana, Washington and Oregon; south as far as Mississippi, Kentucky, and Oklahoma; east as far as New York, Pennsylvania and Ohio; north in the two Dakotas, Minnesota, Wisconsin and Michigan. They have heen tested by hundreds of farmers in Iowa, Illinois, Missouri, Kansas and Nehraska, and proven their worth. These farmers took our advice, tried them last year and hundreds of them write us saying they wish they had bought more than they did.

Price, 1 bu., \$1.15; 5 bu. lots, \$1.10; 10 bu. lots and up. \$1.05.

Sixty Day Oats

The seed of this valuab oat was secured in Russia by the United States Department of Agriculture in 1901. Some was sent by the Government to the South Dakota Experiment Station. This is what they say: "With only two exceptions, every farmer to whom we have sold this oat is still growing it and is much pleased with it. It is similar to the Kherson oat, which has been a marked success in Nehraska, but is adapted to a section somewhat farther north than that variety. In North Dakota the Sixty Day Oat has headed the list of varieties under trial for the last three years. It is a small yellowish oat that weighs about 34 pounds to the bushel. The hull is very thin,

being easily shelled off in threshing if the concaves are set too closely."

The Sixty Day Oat has made a fair crop when other varieties have failed entirely. It is so early that it may be harvested with barley, and is three weeks ahead of most other sorts. The average yield of Sixty Day Oats at the Minnesota Experiment Station has been 64 bushels to the acre. Some years have been very unfavorable and the yield in 1908 was only 41 bushels an acre, which was larger than any other variety grown on the station grounds.

Price, 1 bu., \$1.10; 5 bu. lots, \$1.00; 10 bu. lots and up, 95c.

This oat has a reputation as an exceedingly heavy yielder. It is very hardy and prolific and yields beautiful white kernels which are especially desirable for the manufacture of rolled oats.

The heads are very large in proportion to the stiff, bright clean straw. The sprangle heads, although long, are borne low down on the stalk,

which seems to prevent lodging. As a rule, oats yield a greater profit an acre than wheat, and they are also a more reliable crop. The demand for this variety last season exhausted our supply and we suggest early orders to avoid disappointment.

Price, 1 bu., \$1.00; 5 bn. lots, 95c; 10 bu. lots and up, 90c.

Yellow Kherson

(The Oats That Have Made Good)

These oats originally came from Russia, where they were known as the best extra early, hardy, good yielding oats. Kherson Oats, when ripe are a beautiful yellow color. They have fine large sprangles or full heads. The straw is stiff and is not subject to rust nor does it readily lodge. The leaves are broad and extend nearly to the roots. The

straw makes unusually good fodder and is readily eaten by all kinds of stock. They are a good yielder under favorable conditions. They do much better than many other varieties in dry seasons, giving a fair crop when other varieties yield hardly 10 bushels to the acre. We have a fine lot of Kherson Oats for seed.

Price, 1 bu., \$1.00; 5 bu. lots, 95c; 10 bu. lots and up, 90c.

Kherson

A distinct new variety, just as early as Kherson and possessing the same characteristics, except that the grain is white instead of yellow. An enormous yielder, making during the 1915 season all the way from 60 to 110 bushels per acre. They grow a short, stiff straw, which is just loaded with grain and can be depended upon not to lodge. If you

are needing an extra early oat or an oat that will not run to straw on rich land just try our New White Kherson, it's just what you need. Our stock of this fine early oat is limited, so place your orders early.

Price, 1 bu., \$1.05; 5 bu. lots, \$1.00; 10 bu. lots and up, 95c.

Scene on our great Canadian oat farms at harvest time

Bromus Inermus

The Greatest Drought-Resisting Perennial Grass; Will Grow Anywhere, Yields abundant crops of hay and affords early pasturage. It is a prolific grower and is especially desirable for permanent pasture and hay ground. Its drought and frost-resisting qualities are quite remarkable. It starts early in the spring and affords an abundance of nutritious feed much earlier than the ordinary native prairie grass. It is considered about equally nutritious with timothy. It will grow under conditions that are very dry and will stand to a remarkable extent, being covered with water in the early spring.

The spring is one of the best times for sowing; however, it can be sown at most any time of the year. A nurse crop can be used, but if so it should be used sparingly.

Brome grass is inclined to start slowly so that the farmer should not be too hasty in concluding that he has failed to get a stand. This grass has many desirable qualities.

Canada Blue (grass (Poa Compressa)

Canada Blue Grass (Poa Compressa)

Resembles somewhat the Kentucky Blue Grass, but is shorter and more slender. It is grown very extensively in Canada and some parts of the United States. It will thrive even on hard clay soils, where there is not quite enough lime and fertility for Kentucky Blue Grass. It holds its color and freshness until snow comes. Canadian Blue Grass does not thrive when planted with clover. Red Top and Ornard Grass are the best for mixing with it to grow on inferior soils. On good land it becomes tall enough for hay and as it shrinks very little in drying the nay is heavy for its bulk. Grows from one to two feet high. Sow 30 pounds of seed to the acre.

Kentucky Blue Grass

Our stock of Kentucky Blue Grass is unequaled for purity and productiveness. Its germinating power is the highest possible and it is absolutely free from all obnoxious weeds. Kentucky Blue Grass should not be covered. It germinates much better if merely rolled after sowing. Sow about 3 bushels to the acre.

Creeping Bent (Agrostis Stolonifera)

Distinctive on account of its compact creeping rooting stems. Of rapid growth and spreading habit, forming a strong durable turf. Fine for lawns and putting greens because of its fine texture. If sown alone, use 50 pounds to the acre.

Meadow Foxtail (Alopecurus Pratensis)

One of the best grasses for permanent pasture, early and of rapid growth. Sow 30 pounds to the acre.

Meadow Fescue or English Blue Grass

Especially suited for permanent pasture and is also fine for hay. Grows two to three feet high, but not in tufts like Orchard Grass. The hay is very nutritious and cattle thrive on it whether dry or green. Succeeds even in poor soil, and as the roots penetrate deep, from 12 to 15 inches, it takes extremely dry weather to affect it. As a fertilizer it has valuable properties. It will stand freezing very effectually and its use is becoming more widespread each year. About 24 pounds of seed are sown to the acre.

Hard Fescue (Festuca Duriuscula)

A valuable grass for dry lands and sandy soils, very hardy, enduring extremes of heat and cold and long droughts. Splendid for permanent pastures on pure land. Not recommended for lawns on account of its stooling habit. Ask for price.

Orchard Grass

This is a very early grass and particularly adapted to shady places This is a very early grass and particularly adapted to shady places It is a valuable grass for both pasture and hay land because of its mos favorable growing qualities. Generally more than one crop can be obtained for hay purposes in a single season, after which there is a heavy growth of after-math, which gives an abundance of rich pasture until late in the fall. It grows in tufts; stands drought well and is very hardy. This grass is used to a very large extent for groves and orchards and all shady places. This is a grass that has not been fully appreciated, but is rapidly gaining the recognition that it deserves Sow 22 pounds to the acre when alone, or proportionately with other grasses. Ask for price.

Red Top Grass (Solid Seed, 14 lbs. to bu.)

We stock only one grade of Red Top, positively the highest. We do not stock the unhulled or chaff grade which is always so unsatisfactory Our high grade seed will produce a dense growth of velvety turf. Very valuable as a permanent pasture grass. It withstands the cold of the Northern States and can be depended upon to flourish almost anywhere Specially suitable for growing on damp lands. Only ten pounds needed to sow an acre. Ask for price.

Timothy

Timothy is too well known to require any elaborate description, only let us remind you that there are very many inferior, dirty grades of this very useful grass on the market, some of which if sown would soon destroy your land, for it would speedily become a weed patch.

We offer only the purest seed procurable and of the highest standard of growth. Our stock is limited and we strongly urge upon our customers to let us know their requirements as confinence received.

to let us know their requirements as early as possible. Ask for price.

Tall Meadow Oat (Avena Elatior)

A hardy grass of rapid growth, luxuriant and reaching a height o A hardy grass of rapid growth, luxuriant and reaching a height of feet on rich soil by June 15th. Makes excellent hay on sandy loams, but is particularly suited to rich soils and clay formations. I hay is desired, cut when in blossom. It has a wonderful capacity for enduring severe heat, drought and cold. It can be cut usually twice is year. To make good hay it should be cut immediately when it blooms This frequently produces twice as much hay as timothy. May be sow either in the spring or fall, 2 to 3 bushels to the acre. Ask for price.

English or Perennial Rye Grass

This is the regular perennial variety which so many people really want when they order ry grass, but not knowing the difference, order the Italian Rye Grass instead. We are handlin but one variety-the kind that most everybody wants. You will make no mistake by orderin from us if you want the real Percanial Rye Grass, which is so valuable as a pasture grass producing as it does an abundance of foliage which will remain bright and green throughout th season. The hay is much relished by all kinds of stock. This is the real Perennial Rye Gras which is such a favorite (when the right one is secured) for lawn purposes, furnishing a gree lawn which continues to come on until finally the blue grass takes possession. Ask for price.

Millet

Japanese

This is a type of millet absolutely distinct from all others. It is sometimes called Billio Dollar Grass. It grows from 6 to 9 feet high, stands up well and yields cnormous crops. Whe cured it makes excellent hay, which in quality is considered superior to corn fodder, and eaten readily by all kinds of stock. It is usually sown broadcast at the rate of 15 pounds pe acre, but yields better if sown in drills 12 to 18 inches apart, using about 12 pounds of seed to Cultivate until the plants are about 18 inches high at which time its growth wi smother out all weeds. This variety of millet does best on low, moist ground. We have a ver choice stock of this seed and would strongly recommend our farmer friends to sow down a fe acres of this valuable fodder this spring. Ask for price.

Hungarian (Dark Seed)

Often called Hungarian Grass: Many regard this as being better even than German Millet, as is about one week earlier and requires less moisture. The hay is fine and of excellent feeding value It is especially valuable on account of requiring such a short scason to make a fine nost excellent hay. For this reason it is much used as a catch crop. It can be sown as late a the 4th of July with good results in ordinary seasons. It is much used for following such crop as early potatoes and barley for a crop of hay, thus giving two crops on the same land in on year. Hungarian Millet does not grow so coarse as some other varieties, but still yields quit heavily, from two to four tons of hay to the acre being an ordinary crop. Hay is leafy, of ver fine quality. Ask for price.

German or Golden (True Southern)

This grows very rank and is one of the best varieties for hay or fodder. On good rich soil will make a growth of 4 to 5 feet high, and although the hay may seem coarse, yet it is 5 tender that if cut at the right stage, which is when in full bloom, even the hogs will eat the cured hay quite greedly. A yield of 5 tons of hay per acre is nothing unusual. Ask for price.

PRICES of grasses, clovers, millets and other field seeds subject to market changes. Ask for latest RED LIST.

Bromus Inermus

SEED CORN

Control of the contro

Early Longfellow Flint

Improved Yellow Dent Seed Corn

Minnesota No. 13

Early Longfellow Flint

The most popular of all flint varieties. It is a beautiful 8-rowed yellow flint, with slender, straight ears, 10 to 15 inches long. Kernels are large and wide, and cob very small. Ripens in 75 to 85 days and very prolific.

Improved Leaming

The Leaming is the oldest distinct variety of corn, having been originated in 1826. It is a standard yellow corn, well adapted to northern and central Illinois and the most of Iowa, and similar latitudes. In fact, it is grown with success in southern Wisconsin.

Bloody Butcher

This fine corn is a prime favorite in North and South Dakota, Minnesota, Wisconsin, Michigan, and many of the eastern states. It is a heavy yielder, maturing in about 90 days; cars 10 to 12 inches long, with 14 to 16 rows of solid, compact grains of a blood-red color.

Minnesota No. 13

A rich yellow car of from sixteen to twenty rows and very early maturing. It is a heavy yielding variety and largely grown throughout the state of Minnesota through the recommendation of the Minnesota Experiment Station, where it was developed.

Pride of the North

A Dependable Early Yellow Dent Corn. In some sections of the Northwest, it equals other varieties in yield and quality. The stalks are well proportioned, being short-jointed and leafy. Two or more well developed ears are frequently found on a single stalk. The kernels are very deep and closely set on the ear. Pride of the North shells more corn in proportion to cob than any other variety grown in the West. It is specially valuable to stockmen to feed in the bundle, thus saving the expense of husking. Average height of stalk, 8 feet; average distance base of ear from ground, 3 feet.

Iowa Silver Mine

It possesses many of the characteristics which have made the Iowa Gold Mine such a favorite, except in color—being a pure white, with deep grains and small cob. Stalks grow 8 to 10 feet in height and ears set well down toward the ground. Mcdium early.

Golden Eagle

We have arranged with the raiser of Golden Eagle seed corn to take his entire stock. We intended to offer this splendid new golden dent corn to our customers last season, but weather conditions being unfavorable, the raiser was unable to harvest sufficient seed. We are highly pleased with this new corn, and believe it will be in great demand all over the Corn Belt as soon as the farmers have an opportunity to test it out.

(Here is wnat the raiser says about Golden Eagle, King of Corns.)

The most valuable characteristic of this strain, aside from its higher yielding capacity and depth of grain, is early maturity. My improved type low in starch content, high in protein and oil, will please many who have been disappointed in the standard or Illinois type of Golden Eagle.

SEASON of my strains run from 95 to 110 days, depending largely on the locality, soil and climatic conditions,

SIZE of ear is good, running what would be called medium large. Length 8 to 11 inches, circumference 7 to 8 inches. Mostly 16 rows on each ear, but varying from 16 to 20 rows of deep yellow grains.

GRAINS are deep, square shoulder grains of medium rough dent well set on small cob, give high proportion of corn to cob, big shelling percentage and heavy overrun, holding shelling record of two and one half points higher than the next best variety. One of the very best strains for the market.

SHELLING Percentage: 63 pounds of shelled corn to 70 pounds of ears, only 7 pounds of cobs.

FEEDING Value. It is the best cattle corn grown, being high in protein and oil; and as the cob is small and shells easily, cattle will eat corn and cob for a longer period without getting sore mouths. My strain, not being too compact on top, allows the grain to be better developed at the cob where the feed and vitality arc.

STALKS are medium in height but very strong. Stands up well.

HEIGHT OF EAR on stalk. Very uniform in height, 3 ½ to 4 feet from the ground. THE SHANK is small but not weak, making an extremely easy husking variety.

YMELDING CAPACITY. My own tests and reports from customers prove beyond question that my improved strain of Golden Eagle is absolutely one of the highest yielding varieties in existence and adapted to the widest range of soll and elimate.

Reid's Yellow Dent

This is one of the very best yellow dent varieties known in the Corn Belt. The last few years it has won more grand championship prizes than all the other varieties put together. It is, however, not adapted to the extreme northern portion of the Corn Belt, but can be grown with marked success all through the southern two-thirds of Iowa, and east and west in the Corn Belt.

Silver King

We know of no better seed corn for the northern part of the Corn Belt than Sliver King, as it is termed in the northern part of Iowa; and Wisconsin 7, as termed in Wisconsin, where it has been developed under the direction of Professor Moore.

This is a pure white dent corn with ears of good size and inclined to be well-filled over the butts and tips. An early variety of corn and a splendid sheller.

Ask for Prices on Seed Corn

Our Special Mangel Wurzel

Sweet, Yellow Fleshed, Long Keeping, Heavy Yielding and Milk Producing

We sell many thousands of pounds of Mangel Wurzel seed every year and our customers are all delighted with the produce of same. Some of our customers write us that they have made yields as high as 70 tons to the acre. We have known cases where 100 and even as high as 110 tons of Mangel Wurzels were raised on one acre. It's a crop no dairyman can afford to overlook. Every dairy farmer should raise at least one or two acres of this fine milk and flesh-producing feed. It's the greatest kind of feed for dairy stock during the winter months when pasture is deep under the snow. All kinds of stock relish it and thrive on it. It's a wonderful weight-producing feed and can be fed without the slightest risk of harm of any kind. Mangel Wurzel to stock is like Pumpkin Pie to the boy at home. It's moorish, the more he gets the more he likes it and wants. They should be chopped up and fed as a part ration. Mangel Wurzels are always best after they have been given sufficient time to ripen. This is usually two or three weeks after gathering. The ripening process for the most part consists in a change of starch into sugar and makes the mangels both more healthful and more nutritious.

We have experimented with every known type of Mangel Wurzel and do not hesitate to say that our Dairyman's Pride is the best of them all for the Dairyman. It has size, productivity, quality

and color of flesh all in its favor. It produces beautifully uniform roots of a rich golden color. The flesh is a nice pale yellow and sweet. We feel confident that this exceptionally fine mangel will be greatly in demand by Dairymen all over the United States. Our seed has been specially raised for us by an expert and can be depended upon to give every satisfaction as to germination, yield and evenness of type.

Cat. No. 22—Price, per lb., 55c, postpaid; 6 lbs., sufficient for one acre, \$3.00, by express or freight.

Our New Sweet Potato Squash

(Long Keeper)

The Smallest But Most Delicious Squash on Earth

We wish we could persuade everyone of our customers to purchase a packet of this wonderful new squash because we know that everyone that grows it will be just delighted with it. It will be the gem of the garden during the 1916 growing season.

Just look at the picture on this page. It is painted from actual life. This little squash grows about 6 to 8 inches long and is about 6 inches around. The plants are inclined to be bushy rather than trailing and bear quite a large number of fruits. The fruits are distinctly ornamental owing to the variety in coloring of the skin which is rich yellow, prettily marked with deep and pale green. The flesh is unlike that of any other squash, being decidedly superior in every way. It has the flavor of the sweet potato, but is a little sweeter and is a rich golden color. The seed cavity is unusually small so that there is practically no waste. One advantage about this little squash is the fact that it meets the requirements of families of all sizes. With the old type of squash, there is usually quite a lot of waste due to the fact that the fruits are too

large for the family consumption at one time.

Our Long Keeper Sweet Potato Squash can be made to meet the requirements of any size family without an ounce of waste by simply using just the number of fruits needed, usually one of our squash will be found sufficient for two persons

We feel real pride in being able to offer this novelty to our customers because it has real merit and will give satisfaction everywhere. It is weeks earlier than any other squash and can be harvested long before the early

frosts. As a keeper, it has no equal. Fruits we carried over from 1914 harvest were in fine condition in the spring of 1915.

Our seed of this new squash is limited. Get your orders in early. Don't miss this opportunity to get something that is unusually good and will be a real treat to the entire family.

Cat. No. 23.—Price, pkt., 10c; 2 pkts., 15c; oz., 30c.

Galloway's Extra Special Selection of the

cest Vegetables
For the Home Garden

During the rush of the seed sowing season we receive hundreds of letters from customers asking us to make selections of vegetables best suited to their requirements. They all want to grow the best for home use, the test for all purposes, for cooking, salads, canning, etc. In order to assist our customers, we have compiled this list of Extra Special Vegetables for the home garden and do not hesitate to say that a selection from this list will give the best possible satisfaction because the seeds offered will positively produce vegetables of the highest quality and in great abundance. They have all been thoroughly tested at our Experimental Station and we have no hesitation whatever in recommending them as being just the vegetables to grow in the home garden to ensure an abundant supply of first quality vegetables right through the summer and fall. The packets offered contain a very liberal supply of seed, sufficient to ensure an ample supply of vegetables for the average home. We guarantee all our seeds to be of the highest vitality.

Galloway's Palmetto Asparagus

The earliest and best of all Asparagus. They come into bearing fully a year in advance of all the older varieties, one year old plants being quite as sturdy as two year old plants of the older varieties. We cannot too strongly urge upon our customers the advisability of putting in a bed of this most delicious spring vegetable.

Cat. No. 24—Price, pkt., 6c; 2 pkts., 11c; 1 oz., 20c.

Beet

Galloway's Little Gem Pickling Beet

Why not discard those old types of garden beets which are so very unsatisfactory when you can get the very best for a fraction of additional expense? Thousands of growers every year feel disappointed about their beet crop. The reason is that there is so much cheap seed of inferior quality offered to growers. This kind of seed never produces respectable table beets. You usually get all kind of beets when sowing this low grade seed—beets of all shapes, size and color—usually only fit for stock feed. Our little Gem Pickling Beet is in a class by itself. Our seed was saved for us by the best beet seed grower in Europe and he claims it's the best he has ever raised. It's not a big root, just a nice medium size, perfectly round and as smooth as a billlard ball. In color, almost black, the flesh is smooth grained, deep crimson, exquisitely tender and delicious in flavor. Grows quickly, making it an excellent variety for early usc. For slicing, creaming or pickling our Little Gem stands unrivalled. Cat. No. 25—Pkt., 8c; oz., 20c; 14 lb., 50c; 1 lb., \$1.60 (postpaid).

Cabbage

Galloway's Main Crop Tenderheart

This splendid main crop cabbage has been thoroughly tested by us and we give it the leading place amongst main crop cabbages. Its uniformity to type is miarvelous, every row and every head in the row looks as nearly allke as it is possible for plants to look. They are medium in size with very few outer leaves. These have the habit of curving inward, thus providing protection to the heads which are solid and sweet and free from coarse veins and leaves. For home use the remarkably fine quality and tenderness of our Main Crop Tenderheart will be appreciated. It also has the habit of hardening the head before it has reached its mature size. Its great productiveness and rapidity of growth combine with a very distinct and handsome shape to make it quite the best main crop marketing variety ever introduced. Cat. No. 30—Pkt., 10c; 1 oz., 25c; 4 oz., 60c; 1 lb., \$2.10 (postpaid).

Cauliflower

Galloway's First and Best (An extra early cauliflower for the home garden)

Our First and Best Cauliflower is sure to make a host of friends on account of its exceptional earliness and fine quality. The heads are solld, snow white and of good size. It is fully ten days earlier than Snowball, and a better cropper. The leaves protect the heads from the hot summer sun insuring good snow white heads at the time of cutting and this is a matter of consideration when marketing Cauliflowers as buyers always prefer Cauliflowers of good clean appearance to those of a sickly yellow color so often offered by truckers. Our seed of this new Cauliflower was for us by the best Cauliflower grower in Copenhagen, Denmark, and he assures us that First and Best is the triumph of many years of effort to breed a high class, extra early, solld headed Cauliflower of nice uniform size. Be sure to include a packet in your seed order and see how different they are to those you have hitherto grown.

Cat. No. 35—Pkt. 10c: 2 pkts.. 15c: 1 oz.. \$2.80 (postpaid).

Cat. No. 35—Pkt., 10c; 2 pkts., 15c; 1 oz., \$2.80 (postpaid).

Table Carrot

Galloway's Orange Prince (Specially Fine for Creaming)

A splendid carrot for table use. The roots grow very regular and smooth, about the same length as the well known Danver's variety, but is much earlier; a beautiful orange red, fine grained, sweet and sugary. Remains firm and brittle a long time after they are pulled. It is an exceptionally heavy cropper, yielding as much as 40 tons per acre on good land, Grows very uniform and is free from coarseness—an excellent variety for bunching which makes it a good seller on the market. Its handsome color and delicious flavor places it in the front rank with the home cook for creaming. 1 oz, of carrot will sow 300 feet of drill. of drill. Cat. No. 40—Large pkt., 8c; 1 oz., 20c; 1/4 lb., 50c;

1 lb., \$1.50 (postpaid).

Galloway's New Extra Early Dwarf Wax Bean "DE-FIANCE" A Marvel in Earliness, Productiveness, Beauty and Extra Table Quality

We want all our customers to include a packet of our Defiance Extra Early Dwarf Wax Beans in their seed order for this spring. We want them to try the best bean of its kind grown anywhere. This bean is a real eyeopener. After once growing our Defiance we feel quite confident you will never again he satisfied with the old out of date varieties you have been accustomed to growing. See our illustration of this bean on this page.

Cat. No. 45-Price, large pkt., 15c; pt., 40c; qt., 70c (postpaid).

Cucumber Galloway's Extra Early Conqueror

(Crisp and Tender, Splendid for Slicing)

After careful selection we are able to offer our customers a cucumber of unusual merit. A nice medium sized fruit possessing all the good points necessary to make it superior to other varieties either for slicing or pickling. This fine cucumber is prolific and produces a continuous crop of nice uniform fruits of a deep green color. The flesh is compact, crisp, finely grained, pure white and of most refreshing and delightful flavor. The vines are exceptionally vigorous and rust proof. Don't fail to order a packet when sending along your seed order. 1 oz. of seed is sufficient for 100 hills.

Cat. No. 46-Pkt., 8c; 2 pkts., 14c; 1 oz., 20c; 1/4 lb., 50c; 1 lb.,

\$1.45 (postpaid).

Celery Galloway's Solid Ivory

(Crisp and Nutty)

In our Solid Ivory Celery we offer our customers an exceptionally choice strain of celery. Although it produces large solid white hearts, it is earlier maturing than any other variety. It is an excellent kind for fall and winter use, has an excellent nutty flavor and is as crisp as ice. As the plants grow to maturity the inner stalks and leaves turn white thus making very little earthing up necessary to blanch it. As a market Celery it is without equal, it is also an excellent keeper.

Our seed has been grown in France where Celery attains greatest perfection and is much superior to home grown seed.

Cat. No. 47-Pkt., 10c; 2 pkts., 15e; 1 oz., \$1.00 (postpaid).

Lettuce

Galloway's Summer Favorite (A Good Bunch Variety, Crisp and Tender)

Here is a real gcm, just what you have been looking for, a real hot weather lettuce, one that will produce nice, bunches of delicious leaves during the hot dry summer months. This is not a large coarse leaved lettuce, but a medium sized well filled plant, leaves a delightful pale green and very daintily curled. Does not get tough and bitter like the larger and coarser types of lettuce. It is extremely early and very hardy. Can be sown much later than most other types. The distinct buttery flavor of this fine lettuce will make it a welcome addition to the home. 1 oz. of lettuce seed will plant 300 feet of drill.

Cat. No. 48-Pkt., 10c; 2 pkts., 15c; 1 oz., 25c; 1/4 lb., 50c; 1 lb., \$1.50,

(postpaid).

Egg Plant Galloway's Black Chief

A decided improvement over the old purple type. It is earlier and more productive, the fruits are very handsome of rich lustrous black color, it is in every way distinct and certain to become a favorite with all growers of this popular fruit. The plants are unusually healthy in their growth and yield an abundance of large handsome fruits which are very attractive in appearance. This variety is entirely spineless. 1 oz. of Egg Plant seed will raise 2000 plants.

Cat. No. 49—Pkt., 8c; 2 pkts., 14c; 1 oz., 30c; ¼ lb., \$1.10;

1 lb., \$3.75 (postpaid).

Sweet Corn

Extra Early Sunrise

The Earliest and Best White Sweet Corn

We have no hesitation whatever in offering this extra early corn to our customers as the very best of its kind. It produces a very fair sized ear, is pure white, very juicy and sweet; looks very handsome when served upon the table. It is a week to ten days earlier than any other variety. Will satisfy the most exacting lover of this delicious vegetable. No home garden should be without a patch of our Extra Early Sunrise.

Cat. No. 51-Price, 1 pkt., 15c; 1 pt., 30c; 1 qt., 55c (postpaid).

Galloway's New Sweet Corn Galloway's Pride of the West

Extra Early and Very Sweet

In our opinion there is not a better golden sweet corn anywhere than our "Pride of the West." It is very early, produces a nice sized ear of superb quality. The kernels are large and unusually sweet and have a nice creamy flavor. For the table they cannot be surpassed even by the very beet of the white varieties. For a real carly selection of sweet corn we would very strongly recommend our Pride of the West as the best golden variety and our Extra Early Sunrise as the best white. These two high grade and extra early sweet corns are certain to give complete satisfaction both for extra earliness and for high quality.

('at. No. 52—Price, 1 pkt., 15c; 1 pt., 30c; 1 qt., 55c (postpaid).

- 15

Galloway's Extra Special (Select Country Gentleman Sweet Corn)

We are pleased to be able to offer our customers a distinctly improved type of the well known deservedly popular Country Gentleman Sweet Corn. Extra pains were taken in the selection of seed for this improved type. The ears are a little larger than the old type and the kernels a little deeper. The flavor is excellent and deliclously sweet. Our stock is very limited, therefore send in your orders as soon as possible.

Cat. No. 50—Price, pkt., 8c; pt., 30c; qt., 50c (post-

paid).

Galloway's Hoodoo Muskmelon

H00D00. Flesh is fine grained and sweet, deep orange in color and extremely thick with small seed eavity. Fruits are round and about the size of Rocky Ford, making them convenient both for the table and for packing in shipment. As a shipper it can't be surpassed. A wonderfully prolific sort.

Cat. No. 53-Pkt., 5c; oz., 15c; ¼ lb., 40c; lb., \$1.25 (post-

Galloway's Eden Gem Muskmelon

We offer an extra select strain of this very popular Cantaloupe seed saved from re-selected fruits of very desirable quality, just as should be planted by market growers associations and extensive market gardeners who appreciate the fact that good seed is vitally necessary for the production of good crops.

This strain of Rocky Ford Cantaloupe is favorably known in nearly all sections where Rocky Fords are grown. It is a heavy yielder, nearly all the melons are solid net. The meat is deep and of excellent quality. The melons run standard size, there being but few too large and less too small.

Cat. No. 54—Price, large pkt., 8c; 2 pkts., 14c; 1 oz., 18c; ¼ lb., 40c; 1 lb., \$1.25 (postpaid).

Galloway's Extra Early Wonder Muskmelon

Earliest, Most Productive, Sweetest and Best Keeper

All lovers of this choice fruit will welcome the introduction of Galloway's Extra Early Wonder. The name Wonder is the only one that at all adequately describes it. Its extraordinary earliness, its solid and sweet meat which ear be eaten right to the rind, its extraordinary yields of handsome, close netted, uniform fruits make it a wonder in every sense of the word. It's a melon that possesses all the good points needed to make it perfect for all purposes. The flesh is a rich, deep green in color, firm and crisp, is a splendid keeper and on this account alone is an ideal melon for the market. It ripens fully two weeks earlier than any other variety. The plants are exceptionally vigorous, the fruit sets early and the crop matures in a very short time. Single plants yield as high as 15 to 20 delicious fruits each. As high as 400 crates of this fine melon have been gathered from a single acre. Such quality melons cannot fail to satisfy the most exacting lover of this very popular fruit.

Cat. No. 55—Price, pkt., 10c; 1 oz., 25c; ½ lb., 75c; 1 lb., \$2.50 (postpaid).

\$2.50 (postpaid).

Mother's Pie Pumpkin

Galloway's New Divider Watermelon

Tops them all for weight, quality of meat, keeping and shipping qualities.

Here without doubt is the peer of the entire watermelon family, a melon without an equal. This very handsome fruit commands attention everywhere, its enormous and uniform size and its rich, dark green skin attracts
instant attention. As a seller it's bound to hold the market, owing to its superior appearance. The flesh is a rich,
deep red and develops almost to the rind. There is no waste; it is solid, crisp and sweet; can be cut without fear
of breaking, an objectionable feature with so many watermelons. The skin is thin but hard and can be safely
shipped without fear of breaking. It grows to an enormous size under favorable conditions. On our own Experimental Farm we had New Dividers develop to over 60 lbs. each. Watermelons can be grown on any good,
medium sandy soil. Get a packet of our New Divider and have the best, a melon that is large enough and good
enough to divide with your friends.

Cat. No. 56—Price, pkt., 10c; 1 oz., 25c; ¼ lb., 75c; 1 lb., \$2.50 (postpaid).

Mother's Pie Pumpkin

Just the size for the home garden, average weight about 10 lbs. Skin and flesh a rich deep orange yellow very fine grained and sweet, prolific yielder. Plant a few in your sweet eorn rows. These two home favorites grow well together.

Cat. No. 57—Price, pkt., 5c; 1 oz., 10c; ¼ lb., 25c; ½ lb., 40c; 1 lb., 70c (postpaid).

Galloway's Express Globe Onions Red—White—Yellow

Take your choice in color, the quality is equal. We claim for our Express Onions that they are the earliest Globe onions offered by anyone. Seed sown in the early spring will develop nice marketable onions at least two weeks earlier than any other kind. The bulbs are large, perfectly globe shaped and ripen down very evenly. They seldom show any tendency to neek, a bad feature with some varieties. They are very mild flavored, fine, firm fleshed, and excellent keepers, an ideal class of onions for shippers. Our Express Onions produce very even crops, all nice clean bulbs of even size and good appearance.

 $10_{\rm Z}$, of our Express Onion Seed will sow 300 feet of drill. When sowing onion seed press down the seed rows firmly, ion seed always germinates better when the soil is firmly packed.

Cat. No. 58—Price, pkt., 10c; 1 oz., 20c; ¼ lb., 50c; 1 lb., \$1.75 (postpaid).

Squash

Our New Sweet Potato Squash (For Description See Page 13) Chicago Warted Hubbard Squash

The most popular of the whole squash family. There is perhaps more Chicago Warted Hubbard Squash sold than all the other varieties together. Our stock is Northern grown and specially selected for us by an expert grower. The vines are vigorous and bear a large number of handsome pear shaped fruits, all nicely warted and a rich dark green color. The flesh is a bright orange yellow, fine grained, very dry, sweet, and rich flavored.

Cat. No. 59-Price, pkt., 5c; 1 oz., 10c; 1/4 lb., 30c; 1 lb., 95c.

Spinach

Galloway's Summer Prolific (Drought Resisting)

Most people like spinach and try to raise it, but the common trouble most growers have to contend with is drought pest as the spinach is commencing to mature. Very few varieties of spinach seem able to withstand a long spell of hot dry weather, they usually dry up or turn to seed. Our Summer Prolific has been thoroughly tried out for two seasons at our Experimental Station and we believe it is the very best drought resisting kind on the market. It is a very prolific grower, producing nice bunches of delightfully sweet, juicy, greens of a delightfully dark green color. This fine spinach lacks the objectionable strong, bitter flavor of some of the common types. A successional sowing during the summer months will insure a good supply of this nice, wholesome vegetable during the hottest summer months.

Cat. No. 60-1 oz., 10c; 2 oz., 15c; 4 oz., 25c; 1 lb., 60c.

Galloway's New Tomato

Extra Early Garden King

Largest, Heaviest Yielding and Best Slicing Tomato

Largest, Heaviest Yielding and Best Slicing Tomato

After having tried out all the tomatoes on the market, we have decided that Galloway's Garden King stands indisputably at the head of them all for all purposes. It is exceptionally early, the fruits are large and handsome in appearance, being a deep rich red color. It is quite free from coarse core and the flesh is sweet and juicy right to the skin. It is all meat. It is an exceptionally fine tomato for slicing, being eatable right through. It is quite free from coarse ribs so common in most tomatoes. This excellent feature also makes it unsurpassed as a canning variety. We very strongly recommend this tomato to exhibitors on account of its enormous size and handsome appearance. If properly cared for, tomatoes weighing % to I pound can be confidently expected. An excellent feature about this tomato is the fact that although it grows to an enormous size very few of the fruits crack, a matter of much importance to exhibitors.

The plants root well right from the beginning of their growth and develop rapidly into fine, sturdy plants which break into bloom several weeks earlier than other varieties. These strong plants will continue to bear an immense quantity of fruit until cut off by severe frost.

You will be neglecting your own interests if you do not give our Extra Early Garden King Tomato a trial.

Cat. No. 61—Price, 1 pkt., 10c; 2 pkts., 15c; 1 oz., \$1.00.

Turnip

Galloway's Home Garden Mixture

For several seasons past quite a large number of our customers, especially those located in the south, have written requesting us to give them special prices on mixed turnip seed. As the demand for this mixture increases every year, we have decided to offer a special mixture of all the best known turnips. This mixture contains only such types as are suitable for the table. It will include such well known varieties as Purple Top, Strap Leaf, White Dutch, Early Snowball. Purple Top White Globe, Green Top, White Globe and Egg Shaped Model, ctc. We are confident it will be quite impossible to secure a more varied mixture of first class table turnips at the price we are offering Galloway's Home Garden Mixture. We would advise sowing this seed broadcast, owing to the varied sizes of the turnips offered in this mixture.

Cat. No. 62—Price, 1 oz., 5c; 1/4 lb., 18c; 1/2 lb., 30c; 1 lb., 50c.

Radish

Galloway's Nonsuch Mixed

(A Mixture of the Best Solid Radishes Only)

This mixture contains all shades and shapes of red, white and pink, olive-shaped, round, half-long and long in great variety. Just what is wanted for the home garden where the space is limited. One sowing is all that is required for the whole scason, as they become ready for table use early, medium and late. These radishes can be sown in drills or broadcast. Sow 1 oz. to every 100 ft. of drill.

Cat. No. 63—Price, 1 oz., 5c; 1/4 lb., 18c; 1/2 lb., 28c; 1 lb., 50c.

ONIONS. A clearer knowledge of the practical methods of onion growing will add much to your yearly gross profits. This 30 cent book "Onions" tells how it is done.

GARDEN INSECTS frequently destroy large percentages of a year's crop and oftimes totally ruin certain patches. Professor Green has made a very thorough study of these pests and their habits and gives many valuable remedies in his book "Vegetable Gardening" which we will send postpaid anywhere for 50c. 256 pages.

VEGETABLE GARDENING. By Prof. Samuel B. Green, a prominent authority on the growing of vegetables for home use and the market. Treats on tillage, implements seed growing, greenhouses, insects and how to destroy them; complete classification of vegetables with instructions for growing. A complete, practical guide to gardeners. 256 pages. Illustrated, Paper 50c, cloth \$1.00, postpaid.

BEAN CULTURE. By Glen C. Sevey. The only thorough and comprehensive book treating on the planting, raising and marketing of beans. New and highly valuable methods of cultivation and care are described. Postpaid, 50 cents.

ASPARAGUS CULTURE. A special book that gives the most practical methods of raising, cultivating, harvesting, marketing, forcing and canning asparagus. This authoritative up-to-date book, postpaid, 50 cents.

HOW TO GROW CABBAGES. A fine new booklet that gives instructions how to grow cabbages from seed time until harvest. Written by J. H. Gregory, a recognized authority on this subject. Postpaid, 40 cents.

PARSNIP-Galloway's Magnum Bonum-Solid and Sweet

A good parsnip seems hard to get, so many of the varieties offered are coarse and scarcely suitable for table usc. For some time we have been looking for a better type of this favorite vegetable and our efforts are at last rewarded. We believe our Magnum Bonum is the best parsnip on the market for home use. It possesses all the qualifications necessary to make it popular, medium size, good color, clean root, firmness and excellent flavor, and it is quite free from that objectionable stringiness so common with the coarser type of parsnip.

For creaming our Magnum Bonum is excellent, they boil beautifully firm and are exceptionally sweet. We anticipate a great demand for this parsnip when our customers realize how far ahead it is of the old types. 1 oz. parsnip seed will sow 300 feet of drill.

Cat. No. 71—Price, pkf., 6c: 1 oz., 15c: 2 oz., 25c: 4 oz., 35c: 1 lb., \$1.00.

Cat. No. 71—Price, pkt., 6c; 1 oz., 15c; 2 oz., 25c; 4 oz., 35c; 1 lb., \$1.00.

POTATOES-Galloway's Autumn King

We want our customers to try a bushel or two of our Autumn King Potatoes. We have experimented with them for two years on our farms and we like them better than any other late variety we know of. They are a clean white skinned oval shaped heavy yielding potato of exceptionally fine flavor, are very heavy yielders and seem able to resist the pests so common to this crop better than any other type. This no doubt is in part due to the wonderfully healthy, short and compact growth of the vines. As a keeper we strongly recommend our Autumn King. The flesh is very white and firm and when boiled or baked unusually mealy. Undoubtedly the best late potato either for home use or the market.

Cat. No. 72—Ask for prices. See Red list.

POTATOES-Galloway's 60 Day Early Potato

Here is an early potato of real merit, one that can be depended upon not to disappoint. It is not a large coarse tuber, but just a nice medium size, one that is always welcome in the kitchen. The skin is slightly tinted with pink, the eyes are shallow, making it easy to peel, there is no waste in this potato. The flesh is white and when cooked is dry, floury and well flavored. It is a splendid cropper and very early. They

are ready for the home or market 50 to 60 days from planting. This fine early potato seems to thrive in all soils and in all localities, but is specially suited to the Corn Belt Area.

Cat. No. 73-Ask for prices. See Red list.

Treated Twice as Large as Untreated

Will say that the peas I inoculated with "NITRAGIN" are twice as large as the plot along side not inoculated.

ANDREW M. CHRISTENSEN, Norwich, N. Y.

Don't Plant Any Garden Legumes Without The Improved German Soil Inoculator, Nobbe-Hiltner Process

By using "NITRAGIN" Culture you will get more and better beaus and peas. "NITRAGINED" Sweet Peas surpass those not treated.

Galloway's Langport Pea

Send for special Garden "NITRAGIN" 35c postpaid. Good for all Beans, Peas, Sweet Peas.

GALLOWAY'S D EXTRA SPECIALS

Galloway's "Dandy" Cucumber

"The Acme of Perfection." We have been looking for a Cucumber that we could designate Dandy and after careful experiments on our seed farm we feel satisfied that we have at last found it and we are confident our many thousands of customers all over the States will agree after growing it that the name we give it fits it exactly. It is neither long nor short, but just right; a nice medium cucumber that can be used either for slicing or pickling, is solid and crisp as ice. The seed cells are extremely small; it's a fruit that is bound to attract your attention and admiration immediately you see it. The vines are strong and vigorous and very prolific in bearing. A few plants of this beautiful cucumber are sufficient for the needs of a fair sized family. Be sure and have a Dandy crop of cucumbers next summer.

Cat. No. 81—Large pkt., 10c; 2 pkts., 15c; 1 oz., 20c; 1/4 lb., 50c (postpaid).

Galloway's Big Chief Lettuce Delicious, Crisp and Sweet. This is another of our specials and one we are proud

of. It deserves a front place in every garden; although it grows to a large size it has none of that coarseness that is so common with the larger types of lettuce. Its beautiful crimped leaves give it a very attractive appearance; it grows rapidly to maturity, is beautifully tender, has a fine buttery flavor and is nice and crisp; it has, in fact, all the good qualities most sought for in a really good lettuce. It is easily grown, will do well in any ordinary soil, is not easily affected either by drought or rain, retains its freshness for a long time after maturity. Owing to its quick development

is specially suitable for successional planting. We believe it will be the leading lettuce of the coming season. Don't fail to get your packet early. We expect a great demand for it. All orders will be executed in strict rotation, so post your orders promptly.

Cat. No. 82-Large pkt., 10c; 2 pkts., 15c; 1 oz., 20c; 1/4 lb., 60c; 1 lb., \$2.00 (postpaid).

Galloway's Little Wonder Carrot

"A Perfect Table Carrot." In our Little Wonder table carrot we are able to offer what we believe to be the best carrot on the market for table use. It is not a long carrot like James Scarlet Intermediate or short like Guerande or Oxheart, but a medium root after the type of Early Nantes, but decidedly less coarse; just the sort of carrot the housewife likes to handle. There is no waste. They are very smooth skinned, therefore easy to wash, beautifully crisp and sweet, with fine grained flesh. They are fit to pull a few weeks after sowing. You can't possibly get a better carrot for the home garden than our Little Wonder. It's the best that grows. Our seed is specially imported by us from one of the best known French growers.

Cat. No. 83—Price, pkt., 10c; 2 pkts., 15c; 1 oz., 25c; ¼ lb., 70c; 1 lb., \$2.50 (postpaid).

Beets

Asparagus Galloway's Early Market Giant

We are very pleased to be able to offer our customers, seeds of this exceptionally fine asparagus. It is an ideal kind for Market Gardeners, and is quite a year ahead of some of the older varieties in maturing and is disease resistant, producing fine white delicious sticks which are tipped with pale purple. Their handsome appearance commands a ready sale on the market.

Cat. No. 201—Price, large pkt., 4c; oz., 6c; ¼ lb., 18c; ½ lb., 30c; 1 lb., 50c (postpaid).

Asparagus Bonavelett's Giant

The earliest and best of all Asparagus. They come into bearing fully a year in advance of all the older varieties, one year old plants being quite as sturdy as two year old plants of the older varieties. We cannot too strongly urge upon our customers the advisability of putting in a bed of this most deliclous spring vegetable. It is generally supposed that Asparagus is hard to grow but this is a mistake. Tho seed should be soaked in lukewarm water for about 12 hours before sowing; this will assist the germination.

Cat. No. 202-Price, large pkt., 5c; 1 oz., 10c; 14 lb., 25e; ½ lb., 40e; 1 lb., 70e (postpaid).

For Asparagus and other Vegetable plants, see page 68.

Artichoke

GREEN GLOBE. The seed may be sown indoors and plants potted same as the tomato and set out in the garden on approach of warm weather; or the seed can be sown in hills outside, and thinned out to one plant in a hill. Plants should be set in rows three feet apart and two to three feet apart in the row. Grown for the unripe flower heads, which are highly esteemed by epicures.

Cat. No. 213-Price, large pkt., 5c; 1 oz., 8c; 1/4 lb., 20c; 1/2 lb., 35c; 1 lb., 60c (postpaid).

Galloway's Egyptian Turnip Rooted

A standard sort of great merit, about a week earlier than the old blood turnip variety, exceptionally fine for forcing or for early outdoor crops. Roots are a nice, rich, crimson, tap roots very small and clean; a very desirable beet for the Market Gardener, owing to its early maturity.

maturity. Cat. No. 223 — Price, large pkt., 4c; 1 oz., 7c; 14 lb., 20c; 1/2 lb., 35c; 1 lb. 60c (postpaid).

Galloway's Crimson Globe

A very fine variety. It is one of the best of the dark fleshed globe shaped beets for the Market gardener or for general use. This stock is specially selected for us by one of the leading growers and we are confident will give enthe satisfaction wherever grown.

give entire satisfaction wherever grown.

Cat. No. 224 — Price,
large pkt., 8c; 1 oz.,
20c; ½ lb., 50c; ½ lb., 75c; 1 lb., \$1.40 (postpaid).

Black Ball

A perfectly round smooth beet. Very early maturing, about the size of a tennis ball, very deep color, almost black; fine flavor. The best beet for salads; does not get

Cat. No. 225-Price, per pkt., 5c; 1 oz., 8c; ½ lb., 20c; ½ lb., 35c; 1 lb., 60c (postpaid). Perfection Beet

Perfection Beet

We have no hesitation in saying that our perfection beet is without a superior in the market. It is rich in color and flavor, is a deep, crimson through and through and of a perfect shape, an ideal beet for pickling. We have tried these beets on our experimental farm and unsestiatingly recommend them as the very best for all purposes. It is unsurpassed in quality.

Cat. No. 226—Price, large pkt., 5c; 1 oz., 8c;

large pkt., 5c; 1 oz., 8c; 14 lb., 20c; 1/2 lb., 35c; 1 lb., 60c (postpaid).

Galloway's Long Smooth Blood

Blood

This is the finest of all the long beets, although not grown here so extensively as the round or turnip variety. It is in every respect equal in color and flavor and is deal as a table beet. It is universally grown in Europe both for the market and the home garden. The flesh is a fine, deep color and of delicious flavor and compares favorably with the very best of the round or turnip shaped varieties. When this beet is better known we feel confident it will become a great favorite with all beet growers. We cannot too strongly advise you to put in a trial patch. Patch. Cat. No. 227 — Price,

large pkt., 10c; 1 oz., 20e; ¼ lb., 50e; 1 lb., \$1.50 (postpaid).

Swiss Chard or Spinach Beet

This variety is quite distinct from the edible rooted type of bect. It is grown for its leaf, stems and ribs which are cooked and served in the same way as asparagus. The leaves are cooked after the manner of spinach and make a delightful dish. Probably no vegetable in recent years has become more popular than the Spinach Beet; a batch should be in every garden.

Cat. No. 228-Price, large pkt., 4c; 1 oz., 7c; 1/4 lb., 20c; 1/2 lb., 35c; 1 lb., 60c (postpaid).

oway Brothers & Compa

A Cluster of Our Improved Golden Wax

BEANS

King of the Garden Climbing Lima

A vigorous grower requiring but two vines to each pole. A very excellent bean in every way. In order to insure satisfactory results we would advise early sowing. This bean is a great favorite with market gardeners owing to its great productiveness. They begin flowering at the bottom of the pole, producing a continuous bloom and foliage right on to the end of the season. Pods measure from 5 to 8 incles in length and contain from 5 to 7 perfectly formed beans of very superior quality. Cat. No. 236—Price, large pkt., 5c; pt., 30c; qt., 50c (postnaid)

Henderson's Bush Lima (Galloway's Improved)

This is the earliest of all Bush Limas. Grows only 18 inches high and produces an abundance of rich buttery beans. The best for Northwestern States. For earliness and productiveness Henderson's Bush Lima cannot be beaten. They are at least 12 days earlier than any other type of Bush Lima and at least 2 to 3 weeks earlier than Pole Limas. This enables them to be grown in many sections of the country where the seasons are too short for other Limas.

Cat. No. 237—Price, large pkt., 5c; 1 pt., 30c; 1 qt., 45c (nostpaid).

(postpaid).

BEANS

Improved Golden Wax

This is a great improvement on the old Golden Wax type; not only are the beans more prolific, but they are also more fleshy and mature earlier. A batch grown on our seed farm were a perfect plcture. The plants were bushy and very prolific bearers. The beans, 6 inches in length, were borne in clusters.

Caf. No. 249—Price, large

Cat. No. 249-Price, large pkt., 10c; pt., 34c; qt., 52c (postpaid).

Wardwell's Kidney Wax (Galloway's Extra Select)

A very hardy and productive variety, bearing an abundance of handsome fleshy pods of the stringless type, a very fine variety for the market. Their handsome pods and rich golden color always attract attention.

Cat. No. 250—Price, large pkt., 10c; pt., 34c; qt., 52c (postpaid)

(postpaid).

Kentucky Wonder Wax

This is the best of all climbing wax beans. It is very similar to the green podded Kentucky Wonder, but the fine long pods are a little broader, very fleshy and quite stringless.

Cat. No. 251-Price, large pkt., 7c; pt., 30c; qt., 45c (postpaid).

Davis Kidney Wax (Galloway's Extra Select)

(Galloway's Extra Select)

The demand for this very fine bean was very heavy last season and in consequence of its very high merit we expect a much heavler demand this season. Bean growers declare it to be one of the very best of the whole dwarf wax bean family. The beans are creanny white and quite rust-proof, very heavy croppers and greatly in demand for canning.

Cat. No. 252—Price, large pkf., 10c; pt., 34c; ot., 52c

pkt., 10c; pt., 34c; qt., 52c (postpaid).

Currie's Rust Proof Black Wax (Galloway's Extra Select)

A very desirable variety of the stringless type, very early and a fine cropper; bears an abundance of crisp, tender, stringless pods of excellent quality and flavor.

Cat. No. 253-Price, large pkt., 7c; pt., 30c; qt., 45c (postpaid).

Improved Burpee's Bush Lima

This is the best large seeded Bush Lima Bean in existence and it's a dandy. The bushes grow about 18 inches high, are of stout growth and always' erect. They branch vigorously and each plant develops into a fine bush from two to three feet in diameter. It is a tremendous yielder, the handsome large pods being filled with very large beans of delightful flavor.

Cat. No. 238-Price, large pkt., 8c; 1 pt., 38c; 1 qt., 55c (postpaid).

Dreer's Dwarf Lima

Thick pods and large thick beans, three or four in a pod. Ripens fully ten days earlier than the pole lima of the same name. Cat. No. 239—Price, large pkt., 5c; pt., 30c; qt., 50c (postpaid).

Galloway's Stringless Green Pods

We cannot say too much for this bean. It is without doubt the best of all the stringless green podded varieties. We put in a big batch of these on our bwn Experimental Farm this year and they gave complete satisfaction in every yay. The plants were uniform right through and were tremendous yielders, every plant being weighed down with handsome, straight, long green, perfectly round, and fleshly beans. You really cannot afford to be without a batch of hese in your garden. We know you will be delighted with them.

Cat. No. 240-Price, large pkt., 10c; pt., 35c; qt., 50c (postpaid).

Galloway's Improved Early

This is the earliest of all beans, as its name implies. It produces an abundance of long green flat podded beans ready for the table in 6 weeks from the time of sowing, and inder favorable circumstances in even less time. Our stock at liptop and if you are looking for a really early green bodded bean, we strongly recommend you to give our Improved Early Yellow Six Weeks a trial. It will give satisfaction wherever tried; owing to its early productiveness his bean can be sown successionally right up to the fall ind be relied upon to produce an abundant crop right hrough the season. All the bush beans can be relied upon o prolong their period of productiveness if kept picked close.

Cat. No. 241—Price, large pkt., 6c; pt., 23c; qt., 10c (postpaid).

Galloway's Extra Early Red Valentine

This is one of the best known of the green pod or pickling varieties. It is exceptionally early, pods being ready to bick 35 days after sowing. They are light green and semi-ransparent, a very fleshy, crisp and tender bean, seed long, of medium size, a desirable bean for every home garden. Cat. No. 242—Price, large pkt., 6c; pt., 20c; qt., 20c, cat.

Improved Kentucky Wonder (Also Known as Old Homestead)

We hold an absolutely unsurpassed stock of this tremendously popular bean. This variety is more used than any other of the green podded pole beans suitable for use as snaps. It is an early prolific sort, with very showy pods which are of very fine quality. The vines are very vigorous and productive, producing pods in large clusters. The pods are light green in color, very long; often 10 inches in length, very round and crisp. The seed is long oval, dun colored. This probably has a larger sale than any other pole bean. Certainly no gardener should be without them. Cat. No. 243—Large pkt., 6c; pt., 25c; qt., 40c (nostraid) (postpaid).

Extra Early Refugee

An improvement on the old Refugee or 1000 to 1, dwarf Green Pod Bean on account of its earliness and dwarf habit of growth in which respect it is distinct from almost any other variety. It is a good yielder, pods uniformly round and nearly stringless, therefore a favorite with canner and shipper.

Cat. No. 244-Price, large pkt., 5c; pt., 20c; qt., 38c (postpaid).

White Navy Beans

This seed is more extensively grown than any other for dry beans. Last year the demand exceeded the supply. We have however, contracted for a large quantity of this seed to be grown for us and we expect to be able to fill all orders. We would however, advise our customers to book their orders early as we expect even a greater demand than last year for White Navy Beans. Write us for special prices on large quantities.

Cat. No. 245-Price, large pkt., 6c; pt., 25c; qt., 45c (postpaid).

Bountiful (Green Pod)

The plant is very handsome and of sturdy growth, being particularly immune to rust and mildew. It is very hardy, early and prolific and continues to bear for several weeks. The pods are immense in size, rich green, thick broad extra long, solid, meaty, rich, tender, and entirely free from string.

25c; qt., 45c (postpaid).

Refugee Wax Beans

Hardy, round podded variety, good canning. Seeds brown and black mot similar to the Refugee Green Pod. mottled.

Cat. No. 247-Price, large pkt., 7c; pt., 30c; qt., 45c (postpaid).

Boston Yellow Eye

Almost every one who has lived in New England knows the Boston Yellow Eye Bean. While much larger quantities of white beans of the navy types are used than all of the other varieties combined, those who know about the Boston Yellow Eye prefer them to any other bean for cooking, as they possess a richness and flavor known to no other variety. As a shell bean they have no superior, and for cooking in a dry state, no equal. Any surplus one may grow above requirements may be easily sold from \$1.00 to \$2.00 a bushel above the price of any white beans, when their superior quality is known. We strongly recommend the planting of the Boston Yellow Eye Bean. Once used, always wanted.

Cat. No. 246-Price, large pkt., 6c; pt., Cat. No. 248-Price, large pkt., 5c; pt., 20c; qt., 38c (postpaid).

DAVIS KIDNEY WAX

NOTICE—THE 1916 BEAN CROP ALMOST TOTAL FAILURE; SUPPLIES VERY SHORT.

uliflower

Imported by us direct from Denmark. Absolutely the best seed grown.

KING OF THE MARKET

Danish Perfection (Dwarf Erfurt Type) Our Best and Earliest Cauliflower

The results of many years' efforts to breed a very early variety of Cauliflower of the Dwarf Erfurt Type. About 10 days earlier than our Dwarf Erfurt and Snowboil. The plants are quite dwarf with small leaves and the middlesized heads are pure white, stone hard and of the finest quality. It is perfectly true to type, its evenness in maturing is a great recommendation to the Market Gardeners, as they will be able to clear off the ground at one cutting.

Cat. No. 263—Price, large pkt., 6c; ½ oz., 25c;

1 oz., 90c (postpaid).

Galloway's Early Snowball

No cauliflower grown has gained for itself a greater reputation than has Early Snowball. While originally recommended and used as an early variety, it has not only supplanted most other sorts for spring planting, but it has largely driven out the large late sorts for fall use, being much finer than they are in quality. It's a cauliflower that can be positively depended upon to produce a crop when conditions are ordinarily favorable. Its close growing, compact habit, enables at least one-third more to be planted on the same space of ground than can be done with other varieties. It's an ideal cauliflower for forcing under glass during the winter and spring.

(at. No. 264—Price, large pkt., 10c; ½ oz., 30c; 1 oz., \$1.00 (postpaid).

(postpaid).

Galloway's King of the Market

There is no finer strain of Cauliflower anywhere than Galloway's Imported King of the Market. It is very early. The heads are uniform, solid and snow white. It is about two weeks carller than Snowball. The very best for forcing under glass.

Cat. No. 265—Price, large pkt.,

Savoy Cabbage-The Galloway

Dry Weather

A variety specially adapted to dry conditions. There is a great demand for this Cauliflower owing to its productiveness under circumstances which as a rule means failure to all other varieties. Plant in good, rich soil and cultivate well. The heads grow to a large size, are very solid, pure white and of delicious flavor.

Cat. No. 266—Price, large pkt., 8c; ½ oz., 27c; 1 oz., 90c (protein)

(postpaid).

New Celery Cabbage

Delicious, Appetizing, Healthful-Has No Peer

SNOWBALL

Serve as a salad with your favorite dressing. Served as a hot or cold slaw. Served cooked with butter or cream sauce like cauliflower or asparagus. The thick stocky part especially suitable for cooking and requires only twenty to thirty minutes to cook. Not necessary to cultivate your taste for this vegetable. You will like it the first time; you will like it all the time.

Cat. No. 276—Price, 1 pkt., 10c; 1 oz., 50c; ½4

lb., \$1.90; 1 lb., \$7.00.

lb., \$1.90; 1 lb., \$7.00.

Savoy Cabbage "The Galloway"

This is by far the best of all savoys, nice, medium solid, crisp heads, few outer leaves, flavor sweet and nutty, a very delicious vegetable for the table. No garden is complete without a patch of The Galloway Savoy.

Cat. No. 286—Price, large

pkt., 5c; 1 oz., 15c; 1 lb., \$1.30 (postpaid).

Celery Cabbage

Galloway's Early Jersey Wakefield

This is the earliest and surest heading of ill the early cabbages. It is a very safe cab-bage to grow; owing to its hardiness it can be lage to grow; owing to its hardiness it can be tepended upon to resist cold and other unfavrable circumstances better than any other sarly cabbage. The plants are compact with rery few outer leaves; heads are of medium size, very solid and pointed and of excellent quality. It is an ideal variety for the private farden as it takes up but little room and proluces solid hearts sooner than any other sort, it is also an ideal cabbage for the Market Garlener as it can always be depended upon to produce a fine early crop of solid, clean heads. Jat. No. 296-Price, large pkt., 4c; 1 oz., 12e; 1/4 lb., 36c; 1/2 lb., 65e; 1 lb., 31.20 (postpaid).

Galloway's Imported Red Hollander

We offer here what we believe to be the very We offer here what we believe to be the very lest red cabbage grown. It is specially imforted by us from Denmark and the seed has een saved only from the finest and best heads elected for their uniformity of size, solidity, and even color. If you are looking for a really ligh grade red cabbage, we are confident Galoway's Imported Red Hollander will satisfy ou in every way. It has all the high grade nerits of the green Hollander, but the leaves re, of course, a fine, deep red.

Dat. No. 297-Price, large pkt., 5c; 1 oz. 10c; 1/4 lb., 35c; 1/2 lb., 60c; 1 lb., 31.00 (postpaid).

Galloway's Premium Late Flat Dutch

This well known late cabbage is without loubt the very best of its kind grown. It is emarkably uniform in size and type. The teads are oval in shape and flat and as solid as a rock. As a winter keeping cabbage it is vithout an equal. Owing to its compact, snug growth, it can be depended upon to produce nany tons of solid, crisp and tender heads to he acre. A great favorite with Market Gardensen on account of its excellent shipping qualities, falloway's Premium Flat Dutch is grown only rom specially selected heads and can be deended upon to produce only plants true to ame and of the highest quality. well known late cabbage

Cat. No. 298-Price, large pkt., 6c; 1 z., 15c; 1/4 lb., 35c; 1/2 lb., 65c; 1 lb., 31.10 (postpaid).

Galloway's Imported Early Winningstadt

This is without doubt one of the best of the early cabbages. It was originally imported from Germany, where it is a prime favorite owing to its compact and upright habit of growth and peculiar texture of its short, thick rich green leaves. This variety seems to suffer less from the cabbage worm than most other varieties. The heads are of medium size and pyramidal shape, but very solid and of excellent quality; keeps well both summer and winter. It is the hardiest cabbage of its kind and will resist excessive wet, drought, insects or disease better than any other variety.

Cat. No. 299—Price, pkt., 7c; 1 oz., 12c; 14 lb., 40c; 16 lb., 65c; 1 lb., \$1.40

14 lb., 40c; 1/2 lb., 65c; 1 lb., \$1.40 (postpaid).

Galloway's Imported Hollander or Ballhead

(True Stock)

(True Stock)

Probably no cabbage is better known or more universally appreciated than this grand variety. It is medium in size, very solid, with but few outer leaves, as a keeper it has no equal and for market use it is unparalleled. For boiling, slaw, sauerkraut, etc., it is unsurpassed, being crisp, tender and sweet. It grows well on all solls and under most conditions, withstanding hot weather and does not rot from the effects of a wet season and the heads do not burst. Our Hollander Cabbage is true to name and can be depended upon to give entire satisfaction wherever grown. Average weight, 7 to 8 pounds per head. pounds per head.

Cat. No. 300—Price, large pkt., 8c; 1 oz., 15c; ¼ lb., 70c; ½ lb., \$1.10; 1 lb., \$2.00 (postpaid).

Earliest Summer Cabbage

Copenhagen Market

Copenhagen Market

Absolutely the earliest and the very best Round-Headed Summer Cabbage grown. When sown in March, the heads are ready for cutting in July. Only 3 to 4 days later than the Early Wakefields. The plants are short-stemmed of compact stocky growth and the saucer-shaped, rather small and tightly folded outer leaves enclose large, solid, ball-shaped heads of the finest quality, smooth with fine veins and small core and averaging about 10 pounds in weight. Can be planted close (21 inches apart) and will yield a greater crop per acre than any other cabbage. In uniformity to type it is marvellous and its evenness in maturing is of the greatest importance for the Market Gardeners, entailing less labor in harvesting the crop and allowing them to clear the ground at one cutting.

cutting.
Cat. No. 301—Price, large pkt., 10c; 1 oz., 25c; ¼ lb., 85c; ½ lb., \$1.60; 1 lb., \$3.00 (postpaid).

Early Flat Dutch

An excellent second early cabbage, producing large solid heads of uniform shape, flattened on top. Fully developed heads frequently measure 10 to 12 inches across and weigh 12 to 15 pounds each. It also is fine grained and of dainty flavor. It succeeds everywhere, but is particularly suited to the South, as it has strong heat resisting qualities.

Cat. No. 302-Price, large pkt., 4c; 1 oz., 15c; 1/4 lb., 60c; 1/2 lb., \$1.10; 1 lb., \$2.00 (postpaid).

Charleston Wakefield

The Charleston Wakefield is an improved and larger form of Jersey Wakefield. It requires rather more time to reach maturity but it yields fully twice the crop of the original Wakefield Cabbages. It is about a week or ten days later than its parent, and comes along in a close succession to the earliest cabbage crop. It is a strain which cannot be profitably overlooked by any gardener, whether it is intended for a private garden or to be sent to market, to market

Cat. No. 303-Price, large pkt., 5c; 1 oz., 12e; ¼ lb., 35c; ½ lb., 60c; 1 lb., \$1.10 (postpaid).

Stone-Mason Marblehead

Medium sized, late, flat-head variety, forming a good solld head. The leaves are bright green, with conspicuous veins.

Cat. No. 304—Price, large pkt., 3c; 1

oz., 10c; ¼ lb., 35c; ½ lb., 65c; 1 lb., \$1.10 (postpaid).

Danish Summer Ballhead

Danish Summer Ball Head Cabbage is taking the place among the early varieties that the Danish Ball Head holds among the later sorts. In season it follows right after the early sorts, producing much larger heads of a light green color, extremely hard and solid, interior leaves bleached to the purest whiteness; of sweet fiavor and crisp, tender texture. Long keeping and of superb quality. It resembles the Winter Danish Ball Head quite closely. On light soil, it does particularly well, being a sure header. It is truly fine early cabbage in all respects. It has a noteworthy compactness of growth which permits close planting. Its beautiful large round heads are less attacked by worms, bugs and diseases, being extremely hardy it does well under adverse conditions, and pleases the most critical market gardeners. It has become a general favorite with market gardeners everywhere on account of adapting itself to all soils and conditions. Our stock of this superb strain is grown by the originator in Denmark.

Cat. No. 305—Price, large pkt., 8c; 1 oz., 15c; ½ lb., 60c; ½ lb., \$1.10; 1 lb., \$2.00 (postpaid).

Early Jersey Wakefield

Premium Late Flat Dutch

Lloway Brothers & Company

Borecole or Kale

Borecole or Kale

(Galloway's Scotch Favorite)

The seed of this choice vegetable we import direct from Europe in order to insure getting the right kind of seed. This plant in addition to its usefulness as a vegetable is also quite an ornament owing to its attractive dense and fern-like foliage. It is cooked in the same way as cabbage, but is preferred by many owing to its distinct and pleasing flavor. It has the distinction of being quite hardy in all but the extreme northern states. If the leaves at the top arc cut during the early winter it will greatly encourage the growth of the young shoots upon the stem.

Cat. No. 327—Price, large pkt., 3c; 1 oz., 10c; ½ lb., 20c; 1

lb., 80c (postpaid).

Collard Greens or Hardy Green Colewort

The Collard is a kind of cabbage which sometimes forms a compact head, a great favorite of most people after the vegetable has been subjected to a heavy frost or even icy weather, and the cold does not hurt them for eating purposes. The Collard leaves are excellent for all kinds of stock. The Collard leaves can be pulled from underneath the head of the plant, and cattle, horses; hogs and poultry are very fond of it. Such action does not injure the growing and the preserving of the Collard for human food.

The Collard is here, and here to stay, for when people, all kinds of stock, hogs, all kinds of poultry have a growing and yearning palatable desire for the plant, it is hound to grow. This is the case with the Collard.

Cat. No. 337—Price, large pkt., 5c; 1 oz., 10c; ¼ lb., 25c; 1 lb., 80c (postpaid).

Galloway's Giant Stock Carrots

White Mammoth Mastodon

"The best of all live stock carrots." This carrot "The best of all live stock carrots." This carrot is without doubt the most productive variety for stock. They yield immensely, a thousand bushels an acre being reported by growers. The quality of Mastodon Carrot is A1. In size they often obtain to 5 and 6 pounds each in weight. The shape of Mastodon Carrot is such that it is easily harvested by hand, being a stout conical root with a heavy shoulder and scarcely any lateral roots. They do not break easily in pulling or while being handled. Our own stock of Mastodon Carrots grown on our Experimental Farms at Waterloo are a sight worth going miles to see. They are a revelation to all who have seen them. Their weight, color, and perfectly uniform shape attracting everyone's attention. Fine for horses, cattle and milch cows. Use 7 to 10 lbs. of carrots with grain and dry fodder. This will constitute a perfect ration.

If you are a stock keeper you cannot afford to be without an acre or more of this very valuable stock feed. This seed imported from Europe.

Cat. No. 347—Price, large pkt., 4c; 1 oz., 10c; 14 lb., 30c; 1 lb., \$1.00 (postpaid).

Cabbages (Continued)

Fottlers Brunswick

One of the most popular of the flat-headed types, especially with the home gardener. Best for fall and winter.

Cat. No. 306—Price, large pkt., 4c; 1 oz., 12c; ¼ lb., 35c; ½ lb. 60c; 1 lb., \$1.15 (postpaid).

Glory of Enkhuizen

A variety of recent introduction from Holland. It is a valuable sor on account of its earliness, large size and fine keeping quaities. The heads are of nice size for market, weighing about 9 to 11 pound each, glove shaped and handsome dark green in color. For an early sort, the heads are unusually firm and solid. The leaves are fine ribbed, tender and of excellent quality. The outer leaves set close, per mitting planting of more heads to the acre, thus increasing the yield. This not only is raised for main crop but for fall usc. With marke gardeners this sort is sure to be popular because of its many valuable characteristics. characteristics.

Cat. No. 307—Price, large pkt., 8c; 1 oz., 25c; 1/4 lb., 70c 1/2 lb., \$1.30; 1 lb., \$2.50 (postpaid).

Brussels Sprouts

(The Galloway)

It is surprising to note how few people grow this fine, nutritious and palatable vegetable. It certainly is worth a place in every home garden and we are sure when once grown they will always remain prime favorites with the household. They may be boiled like cabbage or cooked in cream like cauliflower. The small cabbage-like head are usually boiled and served up whole. They are in every way most delicious and delicately flavored of the cabbage family. They usually grow from 2 to 2 ½ fect high and are covered with miniature cabbages.

Cat. No. 317—Large pkt., 4c; 1 oz., 15c; 1/4 lb., 45c; 1 lb. \$1.50 (postpaid).

Dcep River, Iowa, 3-18-15 3-18-15
I have bought seeds of you for the last three years and have had the best of luck with them. Last year at our fair I got 6 first prizes and 1 second out of 11 entries. H. C. ROGERS.

Brussels Sprouts

Cat. No. 348-Price, large pkt., 6c; 1 oz., 12c; 1/4 lb., 40c; 1 lb., \$1.50 (postpaid).

James' Scarlet Intermediate

(Imported Seed)

A carrot of the highest merit, being almost wilversally grown in Europe both for stock and the toole.
It is a deep orange color, intermediate in length, very
crisp, and sweet and a heavy yielder. When this
carrot becomes better known we anticipate for it a
position second to none among carrots.

Cat. No. 349—Price, large pkt., 3c; 1 oz., 10c; 34 lb., 45c; 1 lb., \$1.50 (postpaid).

Galloway Bros. & Co., Waterloo, Iowa.

Gentlemen:—I am sending you these few words to tell you about the Garden Seeds that I ordered from you last year. They were really the best Seeds I ever saw in my life: furthermore, no one can make me believe that they are not the Best Seeds on earth. I want to tell you the reason I am saying they are the Best, because every seed you sent came up fine with no delay whatever. I will always say a good word for you.

Yours truly, LAWRENCE GUILLEAU. Sunset, Iowa, March 19, 1915.

GUERANDE

OX HEART

OR

Galloway's Improved Danvers Half Long

A rich orange red variety, very smooth and handsome, producing very heavy crops; a fine market variety; flesh is very sweet, crisp and tender. Although a garden variety, it produces more bulk to the acre than many of the field varieties and has the special merit of succeeding in almost all soil conditions.

tions. Cat. No. 350—Price, large pkt., 5c; 1 oz., 10c; ¼ lb., 35c; 1 lb., \$1.35 (postpaid).

Galloway's Improved Long Orange

A standard late variety of great merit, very handsome and uniform in shape, roots are a rich, deep
orange color, good flavor, and yields very heavily.
Sow in a deep soil, thinning to 6 inches apart in 18inch drills for roots to attain their full size.
Cat. No. 351—Price, large pkt., 5c; 1 oz.,
10c; ¼ lb., 35c; 1 lb., \$1.35 (postpaid).

Galloway's Extra Early Dutch Horn

A very popular variety. Has a short stump-shaped root; grows well in shallow soil; one of the best extra early for outdoor planting and

Cat. No. 352—Price, large pkt., 4c; 1 oz., 10c; ¼ lb., 40c; 1 lb., \$1.50 (postpaid).

Galloway's Improved Chantenay

The best carrot for table use, rich orange in color and of delicious flavor, owing to its attractiveness it is especially suited to the market gardener.

Cat. No. 353—Price, large pkt., 5c; 1 oz., 8c; 14 lb., 30c; 1 lb., \$1.10 (postpaid).

Half Long Nante's Stump Rooted

An excellent variety for the home garden. Roots are about 6 inches long, very smooth and cylindrical, has no core, exceedingly sweet and tender, raised in France by one of the best carrot growers.

Cat. No. 354—Price, large pkt., 4c; 1 oz., 12c; ¼ lb., 45c; 1 lb., \$1.50 (postpaid).

Guerande or Ox Heart

The quality of Guerande or Ox Heart is exceedingly good, being of a firm texture and remarkably sweet. It is an ideal carrot for table use and certainly should be grown where land is shallow as it thrives much better under those soil conditions than the longer types of carrots.

Cat. No. 355—Price, large pkt., 4c; 1 oz., 10c; ¼ lb., 40c; 1 lb., \$1.50 (postpaid).

Peep o' Day (Extra Early)

The earliest of all Sweet Corn and on this account specially adapted to northern latitudes where other varieties are hard to grow. It is a pure white color, tender, juicy and sweet. It is perhaps the best kind for the home garden, owing to its earliness. Almost everyone looks forward to their first picking of Sweet Corn, and if you put in a batch of Peep o' Day you certainly will be able to satisfy your desires for early corn. Our Peep o' Day Sweet Corn is pure, genuine and unadulterated and can be relied upon to give you entire satisfaction.

Cat. No. 365-Price, large pkt., 5c; pt., 18c; qt., 32c (postpaid).

Country Gentleman

Without doubt one of the best of the late varieties. It is the most lusclous of all the Sweet Corns. The plump white kernels are of great depth, most delicious and the flavor will delight even an epicure. It remains tender and fit for use longer than most other sorts as the ear is enclosed in a thick husk which keeps it "in the milk." The ears average nine inches in length and are borne from two to five and sometimes six on each stalk. The cob is small and very closely packed from tip to butt and with slender, pure white kernels of the finest quality. It comes as true to type as any Sweet Corn we know of. If you desire a really delicious late white Sweet Corn, you certainly should try Country Gentleman; we know it will please you.

Cat. No. 367-Price, large pkt., 5c; pt., 16c; qt., 30c (postpaid).

Stowell's Evergreen

This variety has for many years stood at the head of the list of late Sweet Corn. For main late crop for the family garden or for the market gardener and farmer it cannot be excelled. It remains in good condition a long time after gathering, thus continuing in season after frost. This corn is distinguished by the large ear, the long deep kernels, its rich, sugary flavor and its long keeping qualities. There is perhaps more Stowell's Evergreen Corn sold for late planting than all the other late varieties put together. together.

When you get Stowell's Evergreen Corn from us you get the genulne thing and the absolutely best money can buy. Our seed is true to name, having been very carefully selected specially for us.

Cat. No. 366—Price, large pkt., 5c; pt., 16c; qt., 30c (postpaid).

Early Evergreen

This is a very popular Sweet Corn. It is in the second early class, comes to maturity fully 10 to 12 days earlier than Stowell's Evergreen and yields large handsome ears of most delicious flavor. It has a ready sale in the market on account of its handsome appearance and

Cat. No. 368-Price, large pkt., 5c; pt.. 16c; qt., 30c (postpaid).

Golden Bantam

The most popular of all the early sweet The demand for Golden Bantam is enormous, and great difficulty is experienced by seed houses in keeping the supply equal to the demand. It is rapidly taking the place of the white and older varieties on account of its

Black Mexican

One of the best medium early varieties. One of the best medium early varieties. Atthough when ripe, the kernel is dark bluish or black, when ready for the table, it is white. It is of especially fine sweet flavor and very tender. The cobs have 10 rows of kernels and the variety fills well.

Cat. No. 369-Price, large pkt., 5c; pt., 18c; qt., 32c (postpaid).

Tom Thumb

Dwarf, or Baby Rice. The Tom Thumb is a dwarf growing. White Rice Pop Corn. It is a neavy yielder and very attractive—see illustration opposite. Is ready for popping, soon after it is husked and does not have to dry until the second year, like other varieties. It is almost hulless and when popped there is absolutely no hard center. Ears are very uniform in size and nearly white in color.

Price, pkt., 5c; ¼ lb., 10c; lb., 20c; 2 lbs., 35c (postpaid).

Pop Corn

"Something Good for the Boys' Garden" Monarch White Rice

This variety is the best for popping. The ears are large sized, very handsome and productive, excellent quality, very crisp and delicious. It is a very profitable crop to grow, yielding at the rate of 8 to 10 tons per acre of shocked corn. Thousands of tons of White Rice Pop Corn are annually sold for popping purposes.

purposes,
Plant at the rate of 4 to 6 pounds to the
acre, Pop Corn should be planted much closer
than the larger varieties of corn.

Stowell's Evergreen

Genuine & Unadulterated Tested Seeds that Grow

Galloway's Improved White Spine (A Great Slicing Kind)

An extra early, exceedingly prolific and continuous bearing variety. The shape is unequaled, being rather longer than most sorts, the color is a beautiful dark green, shading off a little paler toward the bloom end. It is one of the best cucumbers for slicing and general use. The ficsh

The seed we offer has been taken from fruit selected for its ideal form, uniformity of size, shape and color and general appearance; an excellent variety either for the greenhouse or outdoor cultivation.

Cat. No. 383—Price, large pkt., 10c; 1 oz., 15c; ¼ lb., 35c; 1 lb., \$1.00 (postpaid).

"Early Frame or Short Green"

This is the very best standard pickling variety. Also good for family use for slicing and pickling. A good variety for successional sowing; fruits straight and handsome, smaller at each end, bright green, flesh tender and crisp, and makes fine pickles.

Cat. No. 384-Large pkt., 4c; 1 oz., 9c; 1/4 lb., 22c; 1 lb., 70c (postpaid).

Everybody Says So

I sent you a small order for vegetables and flower seeds in the early spring. The seed came up wonderful and we commenced picking beans and peas yesterday. Every one of our friends admires our garden and sturdy plants. It is really a beauty. MRS. CHAS. A. BEARD, 620 Southern Ave.

How to Treat Them for Diseases

Plant Lice—Found mostly on the underside of the leaves. Spray with 10 per cent kerosene, using an undersprayer for this work. Tobacco decoction is also good.

ng an undersprayer for this work. Tobacco decoction is also good.

Striped Beetle and Flea Beatles—Fresh. Bowdered tobacco applied around the base of the young plants will prevent the work of these insects.

Worms—These eat both the leaves and fruit and are common only in the south. Spray infested plants with arsenate of lead as soon as any worms are noticed. noticed

are noticed. Cucumber Mildew—A fungous affection causing the leaves to turn yellow or brown in spots. Spray with Bordeaux mixture three or four times at intervals of two weeks, making the first application when the vines are nearly half grown.

Galloway's Improved

Long Green

A well known standard variety about 12 inches in length, of excellent quality and flavor, when small make the finest of pickles; flesh is white and crisp. It is a very rapid grower and very productive; does well in almost any soil or climate. Our seed is selected from the best fruits only. Cat. No. 382—Price, large pkt., 6c; 1 oz., 9c; 1/4 lb., 22c; 1 lb., 70c (postpaid).

Galloway's Champion Pickler

This is the best known pickling variety and is used almost exclusively by the great pickling factorics because of its size and uniformity. It can be relied upon to produce an abundant crop of small, hard and crisp fruit, right throughout the season if they are picked when ready and not permitted to ripen on the vine. A small packet of Galloway's Champion Pickler Cucumber will grow enough cucumbers to keep a good-sized family from one season to another.

Cat. No. 385-Price, large pkt., 4c; 1 oz., 9c; ¼. lb., 22c; 1 lb., 70c (postpaid)

Davis Perfect

This cucumber has the merit of being not only a first class variety for forcing under glass, but is equally as good for out-door planting. The color is a dark glossy green, in shape it is smooth and symmetrical with average length of ten to twelve inches. It is very tender and of exceptionally good flavor. For shipping it is unsurpassed.

Cat. No. 386—Price, large pkt., 6c; 1 oz., 15c; 1/4 lb., 35c; 1 lb., 85c (postpaid).

Japanese Climbing

A good variety for training on a trellis. Forms long fruit of rich dark-green color. The flesh is white, crisp and of good flavor. Cat. No. 387—Price, large pkt., 5c; 1 oz., 10c; 1/4 lb., 30c; 1 lb., \$1.00 (postpaid). Just Read This

Gary, So. Dak., 2-24-15 I ordered garden seeds of you a year ago last spring. They were the best seeds I ever bought, Every seed grew. I didn't farm last year, but am farming this year so am sending another order for garden seeds.

E. C. GROVES.

Order Early

Howay Drothers & Compa

When young and tender they are fine for table use; when matured they keep splendidly and are excellent for feeding stock. Greenish white outside with clear white flesh; smooth short leaf, good for forcing, extra fine in quality. The best early Kohl Rabi for table use.

Celery

Golden Self Blanching

(Fine French Imported Seed)

This celery originated in France and has become the leading variety in America for all purposes. The quality is the very best, being solid, tender, crisp, with a soft golden yellow color. The flavor is dellicious, crisp and nutty. In habit it is dwarf, stocky, uniform in height and very compact. It is entirely free from stringiness. We stock only the French grown seed, raised by one of the best known celery raisers and we have every confidence that there is no better stock anywhere and that under ordinary circumstances this seed will give satisfaction wherever grown.

Cat. No. 397—Price, large pkt., 8c; 1 oz., \$1.00; ¼ lb., \$4.00; 1 lb., \$15.00 (postpaid).

Galloway's Giant Pascal

One of the most popular sorts for winter use. The stalks are very farge, crisp and nutty and of very fine flavor. It blanches very easily and quickly and retains its freshness much longer than any other variety.

Cat. No. 398—Price, large pkt., 6c;

1 oz., 25c; 1/4 lb., 50c; 1 lb., \$2.00 (postpaid).

Celeriac (Turnip Rooted Celery)

Treat seeds and plants the same as recommended for celery, with the exception that it is customary to set the celeriac plants in rows 1 foot apart. The roots are preserved for use in winter by storing in moist sand in the cellar.

Solid Crystal White

As a solid Crystal White

As a solid white variety it has no equal.
The heart is full and soind and the innerand outer stalks are a pure white color.
This variety is much grown by market
gardeners owing to its attractive appearance and the demand there is for a good
solid white celery for table use. The
flavor of this celery is delicious and is
bound to please the most critical. In short
it is without doubt the best white celery
grown today either for the market or
the home garden. Our seeds are specially
imported French stock and can be relied
upon to give entire satisfaction.
Cat. No. 399—Price, large pkt., 5c;
1 oz., 40c; ¼ lb., \$1.30; 1 lb.,
\$4.50 (postpaid).

Winter Queen

One of the best winter varieties, and we recommend it especially to market gardeners, It is tall and forms a large bunch. The leaves are light green, which blanch to a creamy white. Grows a thick and solid, heavy stock, with a large heart. Cat. No. 400—Price, large pkt., 4c; 1 oz., 20c; 14 lb., 60c; 1 lb., \$2.20 (postpaid).

White Plume Celery

A comparatively easy variety to grow, as it is fairly hardy, and being naturally white, is easy to blanch. The leaves are also white, tinted with green at tips. Forms a medium-sized bunch and is fairly tell accept.

Lettuce

Black Seeded Tennis Ball

One of the best for outdoor planting. Plants medium size, having thick, dark green leaves. When grown, forms solid heads which are crisp and tender.

Cat. No. 427-Large pkt., 4c; 1 oz., 12c; 1/4 lb., 25c; 1 lb., 80c, postpaid.

New York

Produces immense heads, solid as a cabbage. The heart blanches beautifully, being crisp, tender and delicious. A robust variety, it roots deeply, thus is able to resist hot, dry weather. Outer color is a distinct apple-green. Extensively grown all over the country, it is especially popular in California where it is known as Los Angeles Lettuce. A desirable standard summer lettuce.

Cat. No. 428-Large pkt., 5c; 1 oz., 12c; ¼ Ib., 25c; 1 lb., 80c, postpaid.

Improved Hanson

The Hanson is one of the most valuable of the crisp heading sorts, in all respects one of the very best outdoor varieties for both the professional and amateur gardener. This variety is very hardy and will stand extremes of weather better perhaps, than any other of the "crisp heading" sorts. In color it is of an attractive green. The head, which attains a large size, is hard, tender and crisp, with a blanched appearance in the center. The table quality is excellent, wholly free from bitterness and remains in splendid condition for use long after it has reached maturity.

Cat. No. 429—Large pkt., 4c; 1 oz., 10c; ½ lb., 25c; 1 lb., 80c, postpaid.

"WONDERFUL" IS THE WORD

Bloomer, Wis., Jan. 27, 1915

Galloway Bros. & Co., Waterloo, Iowa.

Gentlemen:—I received your Seed Catalogue today. Many thanks; you will surely get my Seed order. I have had your Seed the last two years and have some Hubbard Squash in my cellar now that weigh 24, 25 and 27 pounds each, and sound. Your Seeds are true to name, sure and strong. I will try to get some neighbors to send with me; they saw my garden last year. I had just two squash hills and had 35 nice squashes, from 10 pounds up to 27 pounds. Every seed is good.

Yours truly,

DR. H. D. MILLER, V. S.

Leek-Kelway's Prodigy

Galloway Brothers & Company, Waterloo, la.

Lettuce—Continued

Galloway's "Pride of Iowa"

Without doubt this is the best of all the head lettuces. An ideal variety for early spring planting. It is very hardy and will stand extremes of weather better than any other variety. In color it is of an attractive green. It is both tender and crisp and does not get bitter with age; the heads cut for market can be kept fresh for a long time, a quality which renders it invaluable for the market gardener. Our own crop, grown on our Waterloo Seed Testing Farm was all that the most critical could desire. We strongly urge lovers of head lettuce to give Pride of Iowa a trial. We are confident it will give satisfaction wherever tried.

Cat. No. 430—Price, large pkt., 5c; 1 oz., 16c; ¼ lb., 35c; 1 lb., \$1.00, postpaid.

Grand Rapids

(The Best for Forcing)

The most popular variety for greenhouse or frames. It will make a quick growth even under adverse circumstances. It is of handsome appearance; a strong grower and not subject like so many other varieties to rot; will remain fresh a long time after cutting, making it specially suitable for market growers. Its upright habit of growth will permit of much closer planting than is usual with lettuce plants; does not form heads but makes large compact bunches of light, crisp, delicious leaves.

Cat. No. 431—Price, large pkt., 4c; 1 oz., 12c; ¼ lb., 25c; 1 lb., 80c, postpaid.

Big Boston

A very desirable large variety for forcing in cold-frames and for outdoor planting. Plants large, hardy, vigorous. Leaves broad, smooth, thin, of a light green color. One of the most popular sorts in the South for shipment to northern markets. It forms good-sized heads and does particularly well during the cool fall and spring months. Heads of a pleasing light-green color, firm and of superior quality. When grown in cold-frames, the heads are not as tight as when grown outside. One of the best market varieties we know.

Cat. No. 432—Price, large pkt., 5c; 1 oz., 10c; ½ lb., 22c; 1 lb., 70c, postpaid.

"May King"

This is a German introduction of very great merit. It has solld heads and will bear transportation better than almost any other variety. For early spring planting in the open ground or under glass it is unequalled. The plants grow 6 to 7 inches in diameter and the outer leaves are so

closely folded the plant is practically all head. It is hardy as well as very early and a quick grower, thus insuring tenderness. Leaves are a light green, the outer leaves slightly tinged with brown, inner leaves a bright yellow. The flavor is particularly rich and buttery. It is an immense favorite everywhere, both in the home garden and the market. Cat. No. 433—Price, large pkt., 10c; 1 oz., 15c; ¼ lb., 35c; 1 lb., \$1.00, postpaid.

Prizehead

Forms a large, tender, crisp, loose head of bright green, crimped leaves tinged with brownish red, of superior flavor, long remaining sweet and slow to run to seed. A splendid variety either for forcing or the open ground. This is one of the finest lettuces for all the year round use in cultivation.

Cat. No. 434—Price, large pkt., 5c; 1 oz., 12c; 1/4 lb., 30c; 1 lb., 95c, postpaid.

"Black Seeded Simpson"

Much larger than ordinary Simpson, produces a compact mass of leaves, light color, crisp and nutty. Few lettuces are more widely known than Simpson's Black Seeded. It is an excellent kind, either for forcing under glass or for the open ground, a good heat resister and remains long in edible condition. We strongly recommend Black Seeded Simpson to anyone requiring a good lettuce.

Cat. No. 435—Price, large pkt., 4c; 1 oz., 10c; 1/4 lb., 23c; 1 lb., 75c, postpaid.

Giant White Cos

(Solid as a Rock)

Although not well known in America this beautiful lettuce is almost universally grown on the continent of Europe. In England or France it would be hard to find a garden without it. As a solid lettuce it is without an equal. Last season we had quite a number of our customers inquire for it and we made up our minds to secure a stock this season and list it with our other lettuces, thus giving our customers an opportunity to give it a trial. The Giant White Cos is the finest and most highly selected White Cos Lettuce in cultivation. It is of large size, perfect form, self-folding and very crisp. It is hardly ever known to run to seed. We feel sure our thousands of English, French and German customers will appreciate this opportunity to secure a lettuce like the one they used to grow at home.

Cat. No. 436—Price, large pkt., 8c; 1 oz., 15c; ½ lb., 45c; 1 lb., \$1.50, postpaid.

Watermelons

KleckleySweetWatermelon (Galloway's Improved)

(Galloway's Improved)

The sweetest meated watermelon grown. We again offer this finest of all eating watermelons to our customers and feel confident that the reputation of this exceptionally fine melon will be still further increased. Our customers who have already grown it speak volumes in its praise; for productivity it stands unrivaled. Some growers report sales of as much as \$200 to \$300 per acre and we believe that even this can be increased. It is not only a good eating melon but it is also a good keeper and holds first place on many markets. The melon is oblong, dark green color, flesh deep red and stringless, solid and very sweet with but few white seeds set firmly near the rind. Our seed was cut from exhibition melons and can be depended upon to produce fruit true to type. We cannot too strongly recommend this melon for the home garden or the market. Do not fail to order some of this seed. We believe that after growing our Kleckley's Sweet Watermelon once that you will make up your mind never to be without it.

Cat. No. 446—Price, large pkt., 10c; 1 oz., 15c; ½ lb., 35c; 1 lb., \$1.25, postpaid.

15c; 1/4 lb., 35c; 1 lb., \$1.25, postpaid.

Galloway's Improved Dixie

A decidedly popular melon. A cross between the Kolb's Gem and the old reliable Mountain Sweet. It surpasses the Kolb's Gem as a long distance shipping melon, while it fully equals Mountain Sweet in its excellent flavor, and is ten to twelve days earlier than either. In shape about one-third longer than thick; color of skin dark green and beautifully striped; rind thin, but remarkably hard; flesh bright scarlet, sweet and juicy.

Cat. No. 447—Price, large pkt., 5c; 1 oz., 10c. 14 lb. 25c. 1 lb. 80c. poettaid.

10c; 1/4 lb., 25c; 1 lb., 80c, postpaid.

Improved Phinney's Early

One of the best of the earlies, very extensively grown in the corn belt districts and highly spoken of by all who have grown it. A fine oblong melon, flesh pink, crisp and delicious flavor. An abundant

Cat. No. 448-Price, large pkt., 4c; 1 oz., 8c; 1/4 lb., 20c; 1 lb., 60c, postpaid.

This boy is happy. I want to see every boy in America put in a patch of melons this year. The first money I ever earned was selling melons I raised myself, at 10 cents each.

Wm. Galloway.

Improved Ice King

Fruit nearly round, with dark green skin, flesh deep pink, very sweet and melting, a general favorite with market gardeners everywhere, a very desirable melon in every way.

Cat. No. 449—Price, large pkt., 3c; 1 oz.,

7c; 1/4 lb., 18c; 1 lb., 60c, postpaid.

Improved Halbert Honey

(Sweet as Sugar)

(Sweet as Sugar)

This is a grand melon, equaling in flavor and as handsome in color as Kleckley's Swect, but much more regular in form and a great deal more productive. It grows quite as long as the Kleckley's Sweet. The melons are blunt at both ends and generally free from the slightest appearance of neck, in size they average 18 to 20 inches in length and 6 to 8 inches in diameter, color of rind a deep, glossy green. The flesh is a beautiful deep crimson, extending to within \(^{1}\frac{1}{2}\) inch of the rind, which, like the flesh, is so tender that it will not stand shipping any distance unless carefully handled. It is essentially the melon for the home garden and local markets. Our pure genuine and unadulterated seed is bound to give every satisfaction as it is saved only from the finest and best fruits.

Cat. No. 450—Price, large pkt., 5c; 1 oz., 10c; 14 lb., 25c; 1 lb., 85c, postpaid.

10c; 1/4 lb., 25c; 1 lb., 85c, postpaid.

Improved Tom Watson

An exceedingly fine melon for which there is a tremendous demand. It is oblong in shape, with a deep green skin over which is a thick netting. It is quite distinct from all other varieties. It originated in Georgia, a state noted for the production of fine watermelons, and this variety is a fine excample of what a really first class watermelon should be. The rind is thin, but very tough and the fiesh is a bright attractive red color of a sweet, delicious and satisfying flavor. Its fine appearance and quality makes it most desirable for both the home garden and the market. We cannot really say too many good things for this fine watermelon.

Cat. No. 451—Price, large pkt., 5c; 1 oz., 10c: 14 lb., 20c: 1 lb., 70c, postpaid.

10c; 1/4 lb., 20c; 1 lb., 70c, postpaid.

Improved Sweetheart

A real favorite and one of the best. This fine variety is an entirely distinct and handsome watermelon. Vines very vigorous and productive, ripening early, fruit large, nearly round, very heavy, uniformly marked with light and green lines, flesh bright red, solid and very tender, melting and as sweet as sugar. The melons retain their good qualities for a long time after ripening and being gathered. It at once establishes itself as a prime favorite wherever grown.

Cat. No. 452-Price, large pkt., 3c; 1 oz., 7c; 14 lb., 18c; 1 lb., 65c, postpaid.

Cole's Early

For the northern states this is desirable on account of its extreme earliness and vigorous growth. Rather small and nearly round in shape. Light green rind, striped with darker green. Scarlet flesh, solid and sweet.

Cat. No. 453-Price, large pkt., 4c; 1 oz., 8c; 14 lb., 20c; 1 lb., 60c, postpaid.

Galloway's Citrons

Preserving Citron or Melon (Red Seeded)

A large-fruited variety, pure white flesh and thin rind. This is expensive when bought, yet can be grown and preserved by any energetic housewife, who will then also know it to be absolutely pure and good. It is planted like watermelon.

Cat. No. 454-Price, pkt., 4c; 1 oz., 8c; 1/4 lb.,

Ice King

MRS, LORETTA E. JOHNSON.

Sweetheart

Anita, Iowa, We used your garden seeds last year and honestly believe they were the best we ever had.

MRS. WM. STEELE.

Dixie Watermelon

Miles, Iowa, 3-10-15.
Two years ago we ordered garden seed from you and were well pleased with them. They grew fine.
L. H. JUNGJOHANN.

Kleckley's Sweet Watermelon

Muskmelons

Honey Dew

The Sensation of Season 1916

This green-fleshed melon is unlike any other melon ever originated! It is supreme among melons of its size for flavor, meatiness, keeping qualities, and in its ability to capture the whole small melon market.

The rind of the Honey Dew Muskmelon when matured is a greenish yellow, without netting of any form. It is almost round in form, though longer than it is deep, and is 8 to 10 inches in diameter. The surface is more or less dotted with little roughnesses as shown in the illustration. The rind is very thin but tough and firm, and hard to scratch or bruise, which accounts for its wonderful keeping qualities.

Cat. No. 462-Price, per pkt., 15c; 2 pkts., 25c; 1 oz., 60c.

Burrell's Select Rust-Resistant Rockyford Cantaloupe

WHAT THE RAISER SAYS ABOUT THEM

This is the highest development yet attained in the Rocky Ford Cantaloupe, both in netting and rust-resistant qualities. The heavy gray netting being closely laced and interlaced over the entire surface of the melon from the stem to the well-developed blossom button. The length and thickness, as my crop run this year, was ideal. Fully 95% of the melons being choice standard size.

The meat is light green and very deep; its flavor is not excelled by any of the green meat sorts and none of them are better, if as good, shippers.

It is highly rust-resistant. Under unfavorable conditions when other strains rust badly the vincs of this strain remain green and thrifty, continuing to blossom and set on fruits. The value, owing to this quality, is very great, as in many localities rust often destroys the crop, and when other strains have lost their quality on account of rust, this continues to ripen melons of the highest quality. It yields a heavy crop, continuing long in bearing, and cannot fail to please.

Cat. No. 463-Price, large pkt., 5c; oz., 10c; 1/4 lb., 35c; lb., \$1.00.

Burrell's Gem Solid, Crisp and Sweet (GALLOWAY'S SELECT)

This is an abundant yielder, often producing 15 to 25 melons to the hill. The meat is rich golden color, very thick, and fine grained. The flavor cannot be excelled. The seeds are closely held in place in three lobes and do not easily shake loose. The rind is covered with a closely-laced gray netting, except the narrow stripe between the ribs, which is not netted. The blossom end is well protected. Shape oblong, averaging six inches long and tapering at the ends. It is an excellent shipper and will carry nearly two weeks without ice. Seed saved from fine, well-netted melons. We recommend this seed to market growers as being very desirable. This melon has brought hundreds of growers profitable returns. It will pay you to give it a trial, for if it is adapted to your soil and climate, you will be well paid for your efforts.

Cat. No. 468—Price, large pkt., 5c; 1 oz., 8c; ¼ lb., 25c; 1 lb., 70c (postpaid).

Henderson's Bush Muskmelon

This recent introduction is a very desirable addition to the list of melons, as it is a variety that can be grown to advantage in small gardens where there is not sufficient room for the running types. It is a small green flesh melon, a dependable cropper, sweet, and of good flavor.

Cat. No. 469—Price, large pkt., 5c; 1 oz., 10c; ¼ lb., 30c; 1 lb., \$1.00 (postpaid).

Paul Rose or Petoskey

Owing to its superiority as a shipper there is a very great demand for this melon from market growers. It is an ideal melon, form oval, about 5 inches in diameter; shape and general appearance similar to Netted Gem; of a light green or faint golden hue when fully ripe; flesh very firm; a fine, rich orange red, like the Osage, but much sweeter and better flavored; ripens right close down to the rind and the seed cavity is exceedingly small. It is just the right melon for hotel and private use, being of convenient size. Really has no equal as a market melon for professional growers and certainly one of the best sorts for the home garden. We cannot too strongly recommend Paul Rose or Petoskey to melon growers looking for a really high grade muskmelon.

Cat. No. 466—Price, large pkt., 6c; 1 oz., 10c; ¼ lb., 25c; 1 lb., 70c (post-paid).

Giant Montreal

(Green flesh.) This celebrated melon is in universal esteem. It is of large size and delicious, melting flavor. The skin is green and the flesh is light green in color. A weight of 20 to 25 pounds is not rare, and a weight of 39 ½ pounds is on record. The vine is prolific. The melon is a prime market sort and a good shipper. The best seed comes from the neighborhood of Montreal, and our stock is the true Canadian.

Cat. No. 467—Price, large pkt., 4c; 1 oz., 8c; ¼ lb., 25c; 1 lb., 80c (postpaid).

Extra Early Hackensack

A productive and profitable strain of the old Hackensack. The new form is about two weeks earlier and almost of equal size, the melons weighing from 5 to 10 lbs. each. In shape and color it is similar to the parent, the difference being in point of earliness, which is sufficient to commend it to market galdeners. It is a round melon, flattened at the ends and ribbed. The skin is netted and the flesh which is green is rich and very sweet. It is a very prolific bearer and fine for shipping. Also for the private garden.

Cat. No. 464—Price, large pkt., 5c; 1 oz. 8c; ¼ lb., 25c; 1 lb., 70 (postpaid).

Osage or Miller's Cream

A very popular melon of medlum size, nearly round, with skin ribbed and slightly netted. The flesh is salmon color and very luscious flavor. The flesh is exceptionally thick, there being scarcely any cavity in the center of the largest fruit. A favorite variety for the later markets.

Cat. No. 465—Price, large pkt., 4c; 1 oz., 8c; ¼ lb., 25c; 1 lb., 80c (postpaid).

Banana Cantaloupe

Shaped somewhat as name indicates; grows from two to two and one-half feet in length; flesh deep salmon of good quality. It is eagerly bought, owing to its odd appearance.

Cat. No. 470—Price, large pkt., 5c; 1 oz., 8c; ¼ lb., 25c; 1 lb., 80c (postpaid).

Mango Melon or Vegetable

Of golden yellow color, resembling an orango in shape and size, the flesh is snow white. They make splendid mangoes, stuffed like peppers. For sweet pickles, pies and preserving, they have no equal.

Cat. No. 471—Price, large pkt., 10c; 1 oz., 30c; ¼ lb., 80c; 1 lb., \$2.90 (post-paid).

Vegetable Plants

For vegetable plants and roots, see page 68. We shall have a fine stock of vegetable plants ready to ship out by the end of March, and during April and May. We specialize in cabbage, pepper, egg plant, cauliflower and tomato plants. You will note our prices are very reasonable.

Red Wethersfield (Re-Selected Seed)

It is an enormous yielder, producing anywhere from 600 to 900 hushels per acre. The skin is a deep purplish red, flesh, pure white. The handsome hulbs often weighing up to 2 pounds. It probably has a larger sale than any other red skinned onion. It matures early and the flavor is good and mild. Just the onion for boiling. A leading variety in all sections.

Cat. No. 485—Price, large pkt., 5c; 1 oz., 12c;

14 lb., 40c; 1 lb., \$1.25 (postpaid). Danver's Yellow Globe

A large early variety, an abundant cropper, very thick bulb, flat with slightly convex hottom, fine full oval top, with a small neck and rich, brownish-yellow skin, just the onion for critical growers. It is an excellent keeper and perhaps the best paying onion that is grown for general crop. It has been the leading variety for years. If you want to grow a fine crop of these handsome onions get our specially selected seed. It is absolutely the hest you can buy, and we guarantee you will be delighted with its.

Cat. No. 486—Price, large pkt., 5c; 1 oz., 12c; ¼ lb., 40c; 1 lb., \$1.50 (postpaid).

Silver Skin or White Portugal

A mild and pleasant onion, of somewhat flattened shape. It is very popular for family use and one of the hest for pickling, also for slicing or hoiling. A favorite with many when young as a salad or hunching onion; excellent for winter. This variety is largely grown for sets, and is regarded as a standard sort on account of it heing hard and firm.

Cat. No. 487—Price, large pkt., 6e: 1 oz., 12c: 14 lb.

pkt., 6c; 1 oz., 12c; ¼ lb., 40c; 1 lb., \$1.50 (postpaid).

Mixed Onions

This mixture contains a grand as-

This mixture contains a grand assortment of the different colored and various shaped onions, maturing at intervals, so as to give a supply of onions fit for the table when wanted, or for saving for winter use, as all are good keepers. A sowing of these should be quite valuable. valuable.

Cat. No. 488-Price, large pkt., 3c; loz., 8c; ¼ lb., 25c; 1 lb., 80c (postpaid).

ONIONS (Continued)

Favorite Pickler

An extra early, very small, round and handsome variety. The color is a heautiful waxy white, flavor mild and delicate. This onion is used in all the hest known pickle factories in this and other countries. A real favorite for the home garden owing to its very early maturity. Will mature from seed as early as those raised from the ordinary onion sets. As a pickler this delightful little onion stands absolutely by itself, unsurpassed and unsurpassable. Cat. No. 489—Price, large pkt., 4c; 1 oz., 12c; 14 lb., 40c; 1 lb., \$1.50 (postpaid).

Prizetaker "The King of All Onions"

Prizetaker is by far the handsomest, most productive, most popular and hest of all Yellow Globe onions. It is a bright, clear straw color, and always grows to a uniform shape, which is a perfect globe. It has a very small neck and ripens without stiffness of the neck. In the open market it never falls to attract attention on account of its beauty. It always brings a much hetter price than any other onion. The bulbs grow to an enormous size, often measuring 10 to 15 inches in circumference. The keeping qualities are all that can be desired.

Cat. No. 483—Price, large pkt., 7c; 1 oz., 20c; ½

lb., 45c; 1 lb., \$1.30 (postpaid).

Galloway's Waterloo Wonder

Galloway's Waterloo Wonder

A tremendous onion of the Yellow Globe type. The largest and heaviest cropper in existence. Its handsome form immediately attracts the attention and admiration of all who see it. The skin is pale yellow, the flesh snow white and the flavor delicious. As an exhibition onion it is without an equal. The bulbs attain to an immense size, bulhs of 2 to 2½ bs. each heing quite common. Notwithstanding their great size, they are as solid as a rock. It is a good keeper and to those who like an onion raw we recommend it on account of its acceptable pungent flavor. -Seed very scarce, Cat. No. 484—Price, large pkt., 7c; 1 oz., 22c; ½ lb., 55c; 1 lb., \$1.40 (nostnaid). lb., 55c; 1 lb., \$1.40 (postpaid)

Mammoth Silver King

In appearance, the most In appearance, the most striking onion grown. We hardly know which to commend the most, its large size, symmetrical appearance and beautiful silvery flesh, or its sweetness, tenderness and mild flavor. These qualities make it the best for exhibition and fancy high-priced trade. Not recommended for the extreme North except for bunching. bunching.

Cat. No. 490—Price, large pkt., 5c; 1 oz., 15c; ¼ lb., 30c; 1 lb., \$1.00 (postpaid).

Waterloo Wonder

Danvers Yellow

Red Wethersfield

e Gemine & Unadulterated Tested Seeds that Grow

Waterloo Marrow Parsnip

Parsnips

Galloway's Hollow Crown

The old, well-known variety, grown by market gardeners the world over; fine shape, crisp and of very fine flavor.

Cat. No. 500-Price, large pkt., 4c; 1 oz., 7c; 1/4 lb., 20c; 1 lb., 50c (postpaid).

Galloway's Waterloo Marrow Parsnip

A really fine parsnip. It is clean, smooth, at well shaped. Its flavor is unusually and well shaped. marrow-like and delicate. In our opinion it is the best strain of parsnip in cultivation. It is a perfectly clean root and has none of that

objectionable coarseness so often found in the commoner varieties. We cannot too strongly recommend it to our customers, either for the home garden or the market.

Cat. No. 501—Price, large pkt., 5c; 1 oz., 10c; ½ lb., 25c; 1 lb., 55c (postpaid).

Parsley

Galloway's Champion Dwarf **Moss Curled**

We seeded down two borders of this grand parsley, each about 250 feet long, in our Seed Testing Grounds, and we can honestly say that we have never at any time seen either here or on the Continent of Europe a better lot of parsley. It was in every sense of the word perfect. We used it as a border, backed up with pretty annual flowers of every kind and we must say the effect was simply splendid. The habit of Galloway's Champion Dwarf Moss Curled Parsley is distinctly dwarf, but very close and compact and beautifully curled. It would make a really good substitute for ferns as a table decoration. For garnishing and culinary purposes we proclaim it the very best in cultivation. The leaves are a beautiful dark green color. Sow broadcast or in drills in the early spring.

Cat. No. 522-Large pkt., 5c; 1 oz., 10c; 1/4 lb., 85c; 1 lb., 95c (postpaid).

Turnip Rooted or Hamburg Parsley

The edible portion is the fleshy root, which resembles a small parsnip and is esteemed for flavoring soups, stews, etc. The flesh is white, a little dry with the flavor of Celeriac. The foliage is the same as the plain parsley.

Cat. No. 523-Price, large pkt., 4c; 1 oz., 9c; 14 lb., 25c; 1 lb., 80c (postpaid).

Okra or Gumbo

1 Oz. Will Sow 20 Ft. of Row; 1 Lb. About 300 Ft.

About 300 Ft.

The seed is sown in rows, thickly like peas (in ground that is rich, after the frost and cold has disappeared), in rows 3 feet apart, when about 6 inches high it should be thinned out to stand 6 inches apart in the row. The pod is used when young and tender sliced in soups and stews; what is not utilized during the summer may be harvested, cut in slices and dried in the sun; after cured in this way it should be put on the pantry shelf for use during the winter. In this way one may have delicious Chicken Gumbo soup any day of the year.

WHITE VELVET OR CREOLE. The pods of this variety are very free from ridges, being almost perfectly smooth; they are tender and very light green, almost white in color.

An Extra Early Wrinkled Pea

Little Gem

The qualities of this pea are so distinctive and many and the strain such a popular favorite that its merits are well known to all. It is a dwarf green, wrinkled variety of an exquisite buttery flavor, almost perfection itself. It is a very early sort, of superb quality. Pods are of good size, and well filled. Grow about 18 inches high and very prolific. Cat. No. 557—Price, large pkt., 4c; pt., 23c; qt., 38c, postpaid; ½ pk., \$1.00; 1 pk., \$1.85; 1 bu., \$6.85. By express or freight.

Champion of England We are pleased to be able to offer our customers a very select stock of this grand favorite. Last season we had many calls for it but were unable to secure a stock that we would depend upon to give entire satisfaction, so left them entirely alone. The stock we now offer has been grown for us by one of the most reliable growers from specially select stock seed and we know all who grow it will be thoroughly pleased with their crop. It is a main crop variety of vigorous growth. about 4 feet high, producing an abundance of pods of immense peas that are noted for their tenderness and rich, marrow-like flavor. It would indeed be very hard to equal in quality and productiveness this grand old pea.

Cat. No. 558—Price, large pkt., 5c; 1 pt., 25c; 1 qt., 40c, postpaid; by freight or express, ½ pk., \$1.00; ½ bu., \$1.85;

1 bu., \$6.85. Alaska

The earliest pea on the market. The seed is smooth and of bluish color. On this account it is very popular with canners. It is also one of the most desirable first early market garden sorts. Very uniform in ripening and an excellent yielder. Grows only 1 foot high and is completely covered with well filled pods of deliclously flavored peas. Another fine pea for sowing at intervals of a few weeks during the season in order to insure a continuous supply. Owing to its hardiness Alaska can be sown earlier than any other dwarf pea.

Cat. No. 559—Price, large pkt., 4c; pt., 18c; qt., 30c, post-

paid; ½ pk., \$1.00; pk., \$1.85; 1 bu., \$6.00. By freight or

express.

or Gradus"

Peas Continued

"Prosperity or Gradus"—An Extra Early Wrinkled Pea

This remarkable pea has produced a sensation in the horticultural world, and there is no longer any doubt about its position and standing. It is now recognized as a leader. It is not only large and of best quality, but it is as early as the small, round, extra early sorts. It may be planted as soon as the ground is fit to work in spring, along with the smooth peas. It promises to take the place of the smooth peas in general culture to a great extent. Prosperity or Gradus is a wrinkled pca, with vine growing 18 to 30 inches high. It requires no sticks or brush, though sticks may be used, if preferred. The pcas are freely borne, and remain in good order for a number of days. The pods are The pods are of a bright green color, and measure 5 inches or more in length, being as large as Telephone, and equally well filled with luscious peas-8 to 10 or more in The peas themselves are of a first class table quality and retain their color and attractive appearance after cooking. The pods are round and plump. On a light sandy soil it attains a growth of only 15 to 18 inches, while on a rich, heavy loam it reaches 30 inches. It is entirely adapted to the purposes of the market gardener, requiring only good field treatment.

Cat. No. 550-Price, large pkt., 8c; pt., 37c; qt., 65c, postpaid; 4 quarts, \$1.85; 34 bu., \$3.00; 1 bu., \$10.50. By express or freight.

Telephone—Galloway's Improved

This is, without exception, the best main crop pea in existence. The pods are of immense size, of a fine dark green 'color, much more desirable than the light green of the ordinary Telephone, and are well filled with peas of the largest size, which are tender and deliciously sweet. The vines are tall and sure croppers. The best main crop pea for both the home garden and market growing. The Telephone is without doubt the most popular of all the garden peas. It has not acquired this public favor without merit. Medium early in season, bears a long time; the pods are always of good size, well filled, and the quality is of the very best. Does best when brushed.

Cat. No. 551—Price, large pkt., 5c; pt., 30c; qt., 50c, postpaid; ½ pk., \$1.15; pk., \$2.00; 1 bu., \$7.50. By express or freight.

Dwarf Telephone or Daisy

20 inch. This grand pea is rapidly gaining favor among gardeners of all classes. In habit it is dwarf and stocky. Bears close planting, and requires no sticks or supports. The pods frequently measure 5 inches in length, and are broad, straight, and remarkably well filled. A splendid mid-season variety.

Cat. No. 552-Price, large pkt., 5c; pt., 30c; qt., 50c, postpaid.

Laxtonian—"The Dwarf Gradus"

This new English introduction is the largest podded of all the early dwarf peas. The dark green pods are similar to the Gradus in shape and nearly as large in size; they mature earlier and require no support of any kind. The vines are vigorous and very productive, growth about 15 inches, pods are well filled with peas of the finest flavors. "The Laxtonian" cannot be recommended too highly.

Cat. No. 553-Large pkt., 7c; pt., 35c; qt., 65c, postpaid.

Thomas Laxton

Large podded, extra early pea. This fine early pea was raised by crossing Gradus with the Alaska. In earliness the Thomas Laxton is only two or three days behind the Alaska, but the pods are very much larger, containing on the average seven or eight large, sweet, wrinkled peas of the very richest flavor. The vines attain a height of from three to three and one-half feet. It is of hardier constitution than the Gradus and is earlier and of darker colored pod. In flavor this pea is unsur-

Cat. No. 554-Price, large pkt., 6c; 1 pt., 30c; 1 qt., 55c, postpaid.

Horsford's Market Garden

This is a real gent, appreciated by all who have grown it; only grows This is a real gent, appreciated by all who have grown it; only grows two feet high, very stocky and requires no brush, a wrinkled variety of superfine quality. The pods which are borne in pairs arc of good size and filled with deliciously sweet peas. An excellent variety for all purposes. The fact that this grand pea is in so much demand from market growers is in itself a guarantee of its real worth. We cannot too strongly urge our customers to give this fine pea a trial.

Cat. No. 555-Price, large pkt., 5c; 1 pt., 30c; 1 qt., 50c, postpaid.

Round Black Spanish. Skin black; roots globe shaped; white and quality excellent; one of the best for fall and winter use.

Cat. No. 619—Price, pkt., 4c; 1 oz., 6c; ¼ lb., 15c; ½ lb., 25c; 1 lb., 40c, postpaid.

White Chinese or New Celestial. Ready for use when three inches long and continues until nearly six inches long, making it almost an all seasons radish. Flesh firm, solid and pure white.

Cat. No. 620—Price, pkt., 4c; 1 oz., 6c; ¼ lb., 15c; ½ lb., 25c; 1 lb., 40c, postpaid.

Early Scarlet Globe

ure Genuine & Unadulterated Tested Seeds that Grow

Rhubarb (Pie Plant)—Victoria

Absolutely the best either for forcing or for outdoor culture. A good many "fake" new varieties of this popular plant have been thrown upon the market during the past few years, but we say without hesitation that Victoria is the best all round Rhubarb in cultivation today. When grown out of doors the stems are a nice rich red color; when forced under greenhouse stages the stems are much paler and during the winter months fetch much higher prices than when grown outside.

Cat. No. 630—Price, large pkt., 5c; 1 oz., 15c; ¼ lb., 30c; 1 lb., \$1.00, postpaid.

SPINACH Bloomsdale

This Spinach is also known as Norfolk Savoy Leaved. It is a prime favorite with Market Gardeners everywhere. It has fine, thick, dark green, wrinkled leaves, of exceptionally fine flavor. It is perfectly hardy; without doubt the best Spinach for fall sowing.

Cat. No. 650—Price, large pkt., 5c; 1 oz., 10c; 1/4

1b., 30c; 1 lb., 95c, postpaid.

Galloway's Long Standing Round Spinach

This excellent variety comes quickly to maturity and remains in condition for use longer than other sorts. The leaves are smooth and very dark rich green. In our estimation the best for the private garden as it is one of the most popular and profitable with market gardeners.

Cat. No. 651-Price, large pkt., 5c; 1 oz., 10c; 1/4 lb., 30c; 1 lb., \$1.00, postpaid.

Long Season

Forms a dense rosette of thick, tender and succulent crumpled or clistered leaves of dark green color. With this variety spinach may be continuously grown in any home garden. The best variety to be sown in the spring and at intervals for a successional summer supply. It is invaluable to both home and market gardeners.

Cat. No. 652—Price, pkt., 4c; 1 oz., 10c; ¼ lb., 30c; 1 lb., 95c, postpaid.

them.
When cooking the roots (a small piece of Codfish which should be discarded when the Salsify is done, boiled with them strengthens the oyster flavor); when cold, mash and fry as patties or fritters. This vegetable is also good stewed, plain boiled, and, also as a salad, sliced raw in vinegar with pepper and salt.

Cat. No. 640—Price, large pkt., 4c; 1 oz., 15c; 14 lb., 40c; 1 lb., \$1.25, postpaid.

SPINACH

Long Standing Prickly

A little later than the leafy sorts, but yields a large quantity of thick and finely colored leaves. It remains in condition fit for use for a long time. Seed is prickly. Cat. No. 653—Price, pkt., 5c; 1 oz., 9c; ½ lb., 25... 1 b. 90. 25c; 1 lb., 90c, postpaid.

Everlasting

Available for use during the hottest months of midsummer, when ordinary spinach is not to be had. Quite different from the true spinach, but an admirable substitute. Cooks like others. Cat. No. 654—Price, pkt., 6c; 1 oz., 10c; 34 lb., 25c; 1 lb., \$1.00, postpaid.

New Zealand

Entirely different from true spinach in type, in that it thrives during hot weather and in any soil, rich or poor. The tender shoots with golden yellow leaves are of good quality and may be cut throughout the summer. This is something new, but extra good. Plant three or four seeds in hills two feet apart each way.

Cat. No. 655—Price, pkt., 5c; 1 oz., 10c; ½ lb., 30c; 1 lb., \$1.00, postpaid.

salloway Brothers & Company, W

Squash

Fall or Winter Varieties— Chicago Warted Hubbard

The most popular of the whole squash family. There is perhaps more Chicago Warted Hubbard Squash sold than all the other varieties together. Our stock is Northern grown and specially selected for us by an expert grower. The vines are vigorous and bear a large number of handsome pear-shaped fruits, all nicely warted and a rich dark green color. The flesh is a bright orange yellow, fine grained, very dry, sweet and rich flavored.

Cat. No. 665—Price, pkt., 4c; 1 oz., 7c; ½ lb., 18c; ½ lb.,

30c; 1 lb., 50c, postpaid.

Galloway's Special Delicious

Well named, as it has the finest flavor of any squash, of oblong shape with a deep green skin and thin rind, with a seed cavity so small that it almost meets in the center. One of the best winter keepers; grown extensively for market; when matured it weighs from 5 to 10 lbs., and is in its prime during the early winter.

Cat. No. 666—Price, pkt., 8c; 1 oz., 12c; 1/4 lb., 30c; 1/2 lb.,

45c; 1 lb., 65c, postpaid.

Red or Golden Hubbard

This variety is in every way identical in size, form and fruitfulness with the Chicago Warted Hubbard, the chief distinction being that the heavily warted skin is a rich orange yellow, turning to a deep salmon red when ripe. The quality is exceptionally fine.

Cat. No. 667—Price, large pkt., 4c; 1 oz., 8c; ½ lb., 20c;

1/2 lb., 30c; 1 lb., 55c, postpaid.

Something New—African Pipe Calabash

The increasing popularity of the Calabash Pipe, made from the fruits of a South African Calabash Gourd, has aroused a widespread interest in the growing of the vine, especially now that it has become known that the plant will thrive in all parts of the United States. The pipes are formed from the crooked necks of the gourd, the netural shape being the shape of the pipe. The pipes are the lightest in the world for their size, graceful in shape, color like meerschaum, and provide a delightfully cool smoke. But at present they are almost prohibitive because the American dealers, although importing the gourds at prices ranging from 50c to \$2 per dozen, sell them in made-up pipes at prices ranging from \$1.50 to \$10.00 each. Anybody can grow their own gourds and make handsome pipes. Almost every smoker will buy one or two pipes at prices ranging from 50c to \$1.00 each. Rubber mouthpieces, nickel plated ferrule and plaster of paris bowl will cost about 20 cents for each pipe. The mouthpiece and ferrule can be bought at any cigar store, and the plaster of paris can be bought at all drug stores. If not making pipes for the market, the growing of a few plants as a means of providing pipes for the grower's private use and for his nelghbors will prove interesting.

The vine may be grown almost anywhere, and forms a very satisfactory cover for unslightly brush heaps or back fences, although the rather rather rather.

odor might prove objectionable if used on an arbor too near the house. To grow the vine for the sake of the gourd is the chief interest, and to do this well, it should not be trained on a trellis but should be allowed to trail over the ground.

Cat. No. 681—Price, pkt., 10c; 2 pkts., 15c.

Summer Varieties-Yellow Summer Crook Neck

Shaped like a club with a bent neck. The skin is very rough and warted, of an orange yellow color. Much preferred by the cook on account of its very dry meat when boiled. This is a variety with a running vine.

Cat. No. 668—Price, pkt., 4c; 1 oz., 6c; ¼ lb., 18c; ½ lb.,

30c; 1 lb., 50c, postpaid.

Earliest White Bush

Of round scalloped form with an ivory white skin. This variety has an abundance of meat of very fine flavor. It is one of the earliest to mature and is very prolific, bearing continually until killed by frost. Cat. No. 669—Price, pkt., 5c; 1 oz., 8c; ½ lb., 18c; ½ lb., 30c; 1 lb., 50c, postpaid.

Earliest Yellow Bush

A flat scalloped type, like the White Bush; the skin is of a light yellow color, which is very thin, leaving plenty of meat in the center; a bush or compact growing kind.

Cat. No. 670—Price, pkt., 4c; 1 oz., 7c; 1/4 lb., 18c; 1/2 lb.,

30c; 1 lb., 50c, postpaid.

Vegetable Marrow—Long Cream or Long Green

The Vegetable Marrow although not well known here in the United States, is a universal favorite over in old England. Over there everyone grows them. They are in every little garden patch and in every market. We had quite a number of customers ask, for it last season and made up our minds then that we would secure from the Old Country, seed of the two best kinds and offer it in this year's catalog. In appearance they resemble a watermelon of the Tom Watson type, but not so large. They are peeled and boiled the same as a turnip and served up in the same way. The flesh is white and of most deliclous flavor. Everyone should grow a few hills of this dalnty vegetable.

Cat. No. 691—Price, Long Cream, pkt., 4c; 1 oz., 18c; ½ lb., 30c nostnaid.

30c, postpaid. Cat. No. 692—Price, Long Green, pkt., 4c; 1 oz., 18c; ¼ lb., 30c, postpaid.

The only difference in the two varieties is the color of the skin, one being Green and the other White.

Unadulterated Tested Seeds that Grow

Cow Horn or Long White

This new type of turnip, owing to its extra fine quality, is fast forcing its way to the front. It is a white skinned variety, growing about 6 inches in length. The flesh is pure white, crisp, and tender and sweet, free from the stringiness so common with turnips of the inferior class, a quick growing variety. You certainly should get a trial packet of this fine turnip. You're sure to like it.

Cat. No. 729—Price, large pkt., 5c; 1 oz., Sc; ¼ lb., 18c; 1 lb., 65c, postpaid.

Early White Flat Dutch Strap Leaved

A very early white turnip, extensively used for the table, especially in the southern states. The leaves are entire and upright in growth. The roots are of medium size, flat, very white ileshed fine grained and sweet. The roots, when in best condition for table use, are about two and one-half inches in diameter. This variety is also grown as a field crop.

Cat. No. 730—Price, large pkt., 4c; 1 oz., 6c; ¼ lb., 20c; 1 lb., 65c. postraid 65c, postpaid.

Improved White Globe

One of the most productive kinds, and in good, rich soil roots will frequently grow to twelve pounds in weight. It is globe shaped or slightly flat tened; skin very white and smooth. Used for stock feeding; also good for table use is pulled when the roots are not more than four to five inches in diameter. Where the winters are mild the tops are used for greens.

Cat. No. 731—Price, large pkt., 4c; 1 oz., 6c; ½ lb., 16c; 1 lb., 4Sc, postpaid.

Southern Seven Top

This, the hardlest of all sorts, may be left standing in the open ground during winter as far north as Philadelphia. In the Southern States it yields in the spring abundant foliage for boiling with cured meats, and is only desirable for this purpose, as it forms no turnips.

Cat. No. 732-Price, large pkt., 5c; 1 oz., Sc; 1/4 lb., 24c; 1 lb., 70c, postpaid.

Rutabaga or Swedish Turnip

Kelway's Model Favorite

This variety is an enormous cropper and the highest quality rutabagas in cultivation. It possesses very hard, sound flesh. It grows freely in all kinds of soil. It is globe shaped with a neat short neck and a clean single tao root. If you sow this seed you may safely rely upon a record crop.

Cat. No. 742—Price, large pkt., 5c; 1 oz., 8c; 1/4 lb., 24c; 1 lb., 70c, postpaid.

Imported Hurst's Monarch

The heaviest yielding yellow flesh kind in cultivation; exclusively grown for stock feeding; it is oblong in shape and very hard. Keeps better than the round kind. Yields about 7 tons per acre more than any other kind of rutabaga. Cat. No. 743—Price, large pkt., 5c; 1 oz., Sc; ¼ lb., 1Sc; 1 lb., 65c, postpaid.

Galloway's Sweet German

White fleshed variety; very sweet and nutritious; excel-lent for table; a very great favorite everywhere on account of its early maturity.

Cat. No. 744-Price, large pkt., 4c; 1 oz., 5c; 1/4 lb., 1Sc; 1 lb., 50c, postpaid.

Record American Purple Top, Old Well Known Favourite

Cat. No. 745—Price, large pkt., 4c; 1 oz., 7c; 1/4 lb., 16c; 1 lb., 60c, postpaid,

Purple Top Strap Leaf

Purple Top Strap Leaf

Enormous quantities of this celebrated turnip are sold every year, leading seed houses sending out many tons in single season. It is unquestionably the best garden turnip offered to the public. It is also an excellent stock variety. It is fine grained and of delicious flavor, flesh white and crisp. The skin is purple above ground, white under, excellent variety for late fall sowing and for winter use. Can be sown broadcast or in drills. Will form good sized bulb in six weeks from time of sowing. Bulbs rather flat.

Cat. No. 725—Price, large pkt., 5c; 1 oz., Sc; ½ lb., 24c; 1 lb., 70c, postpaid.

Purple Top White Globe

A handsome and salable turnip, ideal either for the home garden or the market. It is a rapid grower, globular in shape, flesh pure white and delicious, sweet flavor, the skin is white with purple top. A very heavy yielder and excellent keeper, extensively grown and pitted for fall and winter.

A turnip that cannot fail to please.

Cat. No. 726—Price, large pkt., 5c; 1 oz., Sc; ½ ib., 18c; 1 lb., 50c, postpaid.

Golden Ball or Orange Jelly

Absolutely the best golden fieshed turnip in existence. It is distinctly a table variety. Matures six weeks from time of sowing, producing handsome, small, round roots, with smooth yellow skin and very small tap root; flesh deep yellow, fine grained texture, tender, sweet and rich. A good companion turnip to sow with Early Snowball, both maturing together. Being of quick growtn it is finely adapted for spring, summer or early autumn planting.

Cat. No. 727—Price, large pkt., 4c; 1 cz., 6c; ¼ lb., 20c; 1 lb., 65c, postpaid.

Early Snowball

The finest white fleshed early table turnip grown. It is perfectly round, about the size of a small table beef, skin a nice clean, white color. The fesh is pure white, crisp, tender and sweet. We know of no table turnip likely to please the housewife more than our Early Snowball. We have known boys to walk a mile to satisfy their desire for one or more of these exceptionally sweet and crisp little roots. In their raw state they are veritable thirst quenchers. Try them and see.

Cat. No. 72S—Price, jarge pkt., 4c; 1 oz., 6c; ¼ lb., 18c; 1 lb., 50c, postpaid.

Golden Ball

Salloway Brothers & Company, Waterloo,la

Order

Early

Yellow Husk or Ground Cherry

This fruit has a pleasant straw-berry-like flavor; is much pelished raw but generally used for pre-serves for which it is excellent. The small yellow fruits are en-closed in a husk or covering and when ripe are ½ inch in diam-eter and may be kept all the win-ter if the husks are not removed. They are easy to grow and do well on almost any soil.

Cat. No. 707-Price. large pkt., 5c; 1 oz., 15c; ¼ lb., 40c, postpaid.

Fruit-Shaped **Tomatoes**

Yellow Cherry-A small-fruited, bright golden-yellow variety very attractive for salads or preserves.

Cat. No. 708-Price, pkt., 5c; 1 oz., 16c.

Yellow Pear Shaped—A small-fruited variety, which is golden-yellow. It is very useful for salads, when the fruit is simply cut into lengthwise.

Cat. No. 709-Price, pkt., 4c; 1 oz., 18c.

Peach—These are excellent for eating raw. The fruits resemble a peach, even to the skin, which is covered with a slight bloom as in a peach or nectarine.

Cat. No. 710-Price, pkt., 4c; 1 oz., 20c.

Yellow Plum-Fruits are yellow, plum-shaped, growing in clusters. Excellent.

Cat. No. 711-Price, pkt., 5c; 1 oz., 20c.

Red Cherry-Identical with the Yellow Cherry except in color of fruit, which is of a light scarlet.

Cat. No. 712-Price, pkt., 4c; 1 oz. 18c.

Tomato Rot—This disease first shows itself on the blossom end of the fruit when about half grown. Three or four applications of Bordeaux mixture should be made at intervals of two weeks, making the first application as soon as the fruit begins to set.

Tomatoes

Galloway's Matchless

As an early tomato Galloway's Matchless stands without a superior. We gave this great tomato a good trial on our Seed Testing Farm this summer and I proved itself superior in every way to any of the other varieties tried. It is truly handsome tomato. The fruits are borne in large clusters, the stems bein completely weighted down with them. They are perfectly round in shape, searle color and perfectly smooth. The flesh is solid, of perfect flavor and almost core less. The skin is fairly tough, making it an ideal variety for shipping or keeping For canning or slicing it cannot be equalled.

Cat. No. 702-Price, large pkt., 10c; 1 oz., 30c; 34 lb., 90c, postpaid

Galloway's Dwarf Champion

The famous Dwarf Champion Tomato owes its wide popularity to its stiff, vigorous, upright growth, with fruit well above the soil and to the earliness with which it reaches maturity. In color the fruit is a purplish red and it is always round, smooth and symmetrical; size medium; table quality superior; a good shipper. Plants may be set 3 feet apart in rows 4 feet apart. One of the earliest and most profitable tomatoes grown. It is one of the best so-called tree tomatoes and everywhere recognized as a money maker.

Cat. No. 703-Price, large pkt., 5c; 1 oz., 18c; 34 lb., 55c, 18

Ponderosa

This is perhaps the largest of all tomatoes and is of a very fine quality for slicing. The fruit is oblong in shape and deep purple in eolor; very solid and fleshy with small seed cells. Flavor is very fine.

Cat. No. 704—Price, large pkt., 6c; 1 oz., 20c; 34 lb., 60c,

Galloway's New Stone

The largest, perfectly smooth, highest yielder, best keeping and finest flavored main crop tomato in existence. The fruit is very large, eolor bright searlet, ripening even to the skin without a erack, flesh is firm and solid. An excellent shipper, quality the best, not subject to rot. An attractive variety for the table and ideal for market gardeners and truckers.

Cat. No. 705—Price, large pkt., 5c; 1 oz., 18c; 1/4 lb., 55c, postpaid.

Golden Queen

Solid, smooth, large in size and ripens early. Makes a handsome, rich preserve. This tomato should be grown in every home garden; its flavor is better and more delicate than that of the red varieties, the flesh finer-grained and very tender. Try it, you'll like it.

Cat. No. 706-Price, large pkt., 4c; 1 oz., 15c; 1/4 lb., 55c, postpaid.

June Pink

The most desirable of the pink varieties, producing its fruit in clusters; ripens early, of fair size and continues bearing until frost.

Cat. No. 713-Price, pkt., 7c; 1 oz., 18c.

Bonnie Best

A very beautiful early variety, following the Earliana in ripening; fruit bright scarlet, solld, very productive and attractive; is suitable for both an early and main erop.

Cat. No. 714-Price, pkt., 9c; 1 oz., 20c; 34 lb., 75c.

Sparks' Earliana

This is the earliest Red Tomato known; it is originated with G. W. Sparks, of Salem County, New Jersey, which is the eenter of the great tomato growing district of New Jersey. The fruits are of a deep searlet color, produced in clusters of five to eight, averaging two and a half inches in diameter, and quite solid; it is a valuable and most profitable variety to grow for carly market, as the profit in tomato culture is always in the earliness of the crop.

Cat. No. 715—Price, pkt., 8c; 1 oz., 20c; ¼ lb., 65c.

Just Read This

Baldwinsville, N. Y., July 29, 1915

Baldwinsvine, N. 1., July 1., Dear Sirs: In early Spring I answered an advertisement in one of our monthly magazines—"42 feet of Sweet Peas for 10e."

The seeds came and were planted and now we are reaping the reward. Never before did I receive such Peas. Tall—they reach my very head—large blooms on long stems, and all varieties of colors. You are a new seed firm, to me, having always dealt with our own New York seedsmen, but I feel I must tell you what pleasure the seeds are glving us, and I feel a larger order is due you in the future.

Sincerely yours,

Mrs. E. H. Saeket.

he above photograph shows the beautiful effect that can be produced by using white Dutch clover with your lawn grass when sowing your lawn

Don't Use Turf (Sod)

Don't Use Turf (Sod)

Turf is nearly always full of weeds and unless it can be cut practically on the spot to use it is a much more expensive mode than sowing seds. In most places the cost of turf for an acre would be about ten twenty times more expensive than seed to sow the same area. Then gain, after the greatest care turf will often not take properly to the oil, and seeds have to be fallen back upon in the end.

For the small amount of money to be invested there is nothing that will add so much, not only to the appearance of the place itself but the general satisfaction of the dwellers, as a deep velvety green lawn, hroughout the entire summer season.

You never get tired of a good lawn. In fact, you never get enough it. You want just as much of it as you can possibly have.

Did you ever stop to think how much a good, well kept lawn adds to the general appearance and selling value of a home, to say nothing of the satisfaction the owner gets out of it?

We have an unexcelled mixture, of all the finest and purest evergreen rasses. A mixture that will insure the growth of a beautifully compact vergreen sod in the shortest time. There is no better mixture anywhere and we stake our reputation on it. Quantities to use; 1 pound for 300 quare feet; 25 pounds for ¼ acre.

Wear Well Grass Seed

Shady Nook Lawn Grass Seed - Grown Luxuriously Under Trees

riously Under Trees

Have you a lawn that is shaded by trees? Have you failed n your efforts to establish a grass patch there? If so, try a ew pounds of our Shady Nook Grass Mixture. It is just what you need in order to raise a patch of fine, close, compact, evivety grass, under such conditions.

Ground that has been continuously shaded by trees, often becomes sour and it would be necessary before sowing grass seed to give it an application of air slacked lime. Apply at he rate of 25 to 30 pounds to every 500 square feet. Thoroughly stir the surface of the soil before applying the lime.

Tat. No. 763—Price per lb., 30c; 4 lbs., \$1.00, bostpaid. By express, 10 lbs., \$2.75; 20 lbs., \$5.00.

Grass Seed Required

Quantity for New Lawns

lb. for 350 square feet, lbs. for 1,050 square feet, lbs. for 3,500 square feet, lbs. for 3,500 square feet, 0 to 125 lbs. per acre.

Royal Parks Lawn Grass Seeds

A perfect mixture of dwarf growing evergreen grasses, the same mixture that is sown in the Royal Parks of Europe and which produces such beautiful lawns and which are admired and envied by thousands of American visitors every year. Ready to mow four weeks from sowing. Use 60 to 80 pounds per acre to form new grounds, or 40 pounds per acre to renovate old ones. One pound of our solid seed is sufficient for sowing down a patch of 300 square feet.

Cat. No. 760-Price, 1 lb., 30c; 4 lbs., \$1.00, postpaid. By freight or express, 10 lbs., \$2.75; 20 lbs., (1 bu.), \$5.00.

Special "Wear Well" Grass Seed (For Hard Wear)

Just the kind of seed to sow down for golf course, putting green, tennis court, bowling green, croquet and football grounds. Cat. No. 761—Price, per lb., 25c, postpaid; by express or freight, 10 lbs., \$2.25; 20 lbs., \$4.00.

White Dutch Clover Galloway's Extra Special Selected

It is used very much with grass seed for lawns. It spreads very rapidly and acts as a binder. It is very hardy and is of great value in permanent pastures, as it affords a most nutritious food for sheep and cattle. Sow 6 pounds per acre.

Cat. No. 762-Price, large pkt., 10c; 1 lb., 55c, postpaid. By express or freight, 10 lbs. and upward, 40c lb.

Sow Pure Seeds

A certain amount of care must needs be taken in making a lawn, and if the following instructions are carried out at the commencement, a great deal of unnecessary, after-trouble will be avoided. Sow weeds, and you will be forever endeavoring to destroy them; sow coarse, tall-growing grasses and you will either have to destroy your produce and sow again next season or will enter upon a wearisome and prolonged course of eradication, and close mowing. Hoping by so doing to destroy the very plants whose weeds were sown by you and looking forward to the germination of close-growing sorts, which, if they be there at all, have no one to thank but chance. Rather be careful to obtain from a firm of repute, reliable seeds, perfectly freed from weeds by the machinery of the scientific seedsman, whose study is to supply only those sorts of close and tenacious habit in such a mixture as will insure the turf being green at all seasons of the year.

Lawn Life—The Great Lawn Fertilizer

Especially Prepared by Our Mr. Hall, Seed Expert

We have prepared a Special Lawn Fertilizer, which we have used upon our own Lawns and Playing Grounds during the Spring and Summer to great advantage. The grass which was in very poor shape and of unhealthy color, after two or three treatments soon began to improve and during the summer was a beautiful carpet of delightfully rich, dark green grass; something good to look upon, the admiration and envy of all who saw it and a real pleasure to tread upon. Now if your lawn or grass patch is in bad shape just let us send you a bag of our matchless Fertllizer. It certainly will do for your lawn what it did for ours. Many a good grass patch is spoiled for lack of a little plant food. Our fertilizer is good also for flower beds and borders; aso for pot plants inside and out of the house; has no objectionable odor. As a stimulant for tomatoes and other vines it is without an equal. Last but not least, the price is right.

Cat. No. 759—Price, 10 lbs., 60c; 25 lbs., \$2.00; 100 lbs., \$3.50.

About Flowers

Everybody loves flowers. Flowers are inexpensive and if you select the right kinds are as easy to grow as weeds. There is quite a knack in selecting the right flower seed to produce for you the right effect. Everybody is not familiar with the kind of flower seeds to buy and the quantity to buy to make the most satisfactory, quickest showing and results.

There are hundreds of flower seeds offered that when planted do not bring satisfactory results. Some are bard to grow, and some do not make the desired effect after they develop.

We make suggestions here which we believe you will appreciate and which will enable you to get the best and most satisfactory results, and in our selection of flower sceds offered we have been very careful not to put anything in that you would not care to use, and for that reason have limited our flower seeds to only the best and most nominary verieties. the best and most popular varieties.

We might have listed a thousand or more varieties but this would bewiider you and would have been a waste of good, valuable time on our part, for our Mr. Hall knows from his own experience that your selection would uitimately be made up of the popular varieties mentioned in our list in our list,

If a careful selection is made from our list we guarantee you perfect satisfaction. You can select from it an unlimited range either for color or for beauty, as our selection has been made to satisfy the most exacting lover of beautiful cut bloom.

Victoria Aster

Our seed of this magnificent Aster is im-Our seed of this magnificent Aster is imported by us direct from the leading European Aster Specialists and can be relied upon to produce a magnificent display of perfect blooms, unequaled for their gorgeousness of coloring. The flowers are as large as a Chrysanthemum and grow about 18 inches high.

Cat. No. 1000—Price, large pkts., 7c each; 2 pkts., 12c (sufficient seed for a good-sized bed); 1 oz., \$1.00.

Comet Aster

(Mixed)

(Mixed)

This lovely Aster is perhaps better known than any other. It is immensely popular, as it surely should be. It is a very large flowered variety. Its loose petals making it resemble a good-sized Chrysanthemum. Single blossoms sometimes measure 4 to 5 inches across. They are wonderfully prolific and continue to bloom right through the summer. Owing to the great diversity of color a bed of Comet Asters have a wonderfully gay and enlivening effect. In fact, we know of no flower for the bed or border more likely to give real pleasure to the grower than our choice Asters. If you have never previously grown them, let us advise you to make a start right now. We know how defiorts.

Cat. No. 1001-Price, large pkt., 8c; 2 pkts., 14c (sufficient seed for good size bed); 1 oz., \$1.00.

Galloway's Early Geni-Mixed

Galloway's Early Geni—Mixed Mixed A truly magnificent Aster of branching pyramidal form. The plants are very sturdy and produce bloom weeks earlier than most other varieties. The blooms are borne on long strong stems which make them ideal for cutting. The blooms, however, should be cut before fully expanded and allowed to develop after cutting. This prolongs their usefulness as cut flowers. Galloway's Gem Aster Mixture has a much larger range in color than most Aster mixtures, making them specially useful for bedding purposes.

poses. No. 1002—Price, large pkt., 10c; 2 pkts., 15c; 1 oz., \$1.00.

Giant Victoria

Ageratum—Dwarf Blue

A grand border plant; flowers light blue and remaining in bloom right through the summer. A few plants of this delightful little flower will soon cover a good-sized flower bed as the plants when well started extend themselves rapidly and soon become a mass of dazzling blue flowers. We don't know of a flower anywhere better suited to the border or for window boxes or flower baskets than this delightful little flower. We ourselves had four beds, each 60x20 feet, in which we grew exclusively our We ourselves had four beds, each 60x2 feet, in which we grew exclusively our Dwarf Blue Ageratums. They were the admiration of all who saw them and we know the effect will be that many more of our customers will put in a bed of them that next swing. of our customers will them this next spring.

Cat. No. 1008-Price, large pkt., 4e; 2 pkts., 7e; 1 oz., 50c.

Sweet Alyssum

A fine old-fashioned flower, appreciated by everyone appreciated A fine old-fashioned flower, appreciated by everyone, especially those requiring a good, pure white edge to their garden or a good plant for rock-work or hanging basket. It is a beautiful, pure white, sweet-scented and quite dwarf, growing only about 4 inches high. It blooms most profusely, one plant alone sometimes bearing upwards of one hundred pure white, sweet-scented and exquisitely pretty heads of bloom. The main drive of our Seed Testing Farm was this year bordered both sides with Sweet Alyssum and no words of ours can adequately describe the beautiful effect. Our drive is about 500 feet long and the Alyssum spreads itself a yard wide. The whole length it was a perfect carpet of snow right through the season.

Cat. No. 1010-Price, large pkts., 5c; 2 pkts., 8c; 1 oz.,

Arctotis Grandis (African Daisy)

A remarkably handsome annual from Southwest Africa. It forms much-branched bushes 2 to 3 feet high; its flowers are large and showy, being pure white on the upper surface, the reverse of petals pale lilac-blue. There are few annual flowers grown in the garden more valuable for cut flower work than the Arctotis. It is easily grown from seed, and may be started in hotbed, in the purse or in the open ground the seed germinating. from seed, and may be started in hotbed, in the covered with a sheet of pure white flowers as soon as the house, or in the open ground, the seed germinating in about five days, and the plants may be expected to come into bloom early in July and continue until quite hard frost. It delights in a sunny situation. As a cut flower it is especially valuable, the blooms lasting a week or ten days in water, and if undeveloped buds are cut and placed in a sunny window, every one will open and produce as fine flowers as though left on the plant.

Cat. No. 1012—Price, pkt., 4c; 2 pkts., 7c.

Cat. No. 1012-Price, pkt., 4c; 2 pkts., 7c.

Bachelor's Buttons (Mixed)

This beautiful flower is loved by all who appreciate an old-fashioned garden. Such a garden would be incomplete without it. The beautiful, artistic flowers are borne on long stems and when cut will stand for a long time in perfect condition. A bed of these with Marigolds (African and French), Poppies and Zinnias make a grand display. Our mixture contains a fine range of color, pure white, lilac, rose pink, lavender and purple. A packet of our seed is sufficient for a fair size bed.

Cat. No. 1014-Price, large pkt., 5c; 2 pkts., 8c; 1 oz., 20c.

La Crosse, Wis., 2-22-15.

La Crosse, Wis, 2-22-10.

I am only a girl in her "teens" who loves to raise flowers. Last year among the seeds bought of you was some Phlox Drummondii. That Phlox took first prize at the Interstate Fair, held at La Crosse last September, competing against some of the oldest flowermen in the state. I had varieties in blosom continuously all summer. There was a bowl of it on our table November 8th, just the day before the frost killed it. Your seeds cannot fail to please.

Dwarf Blue Ageratum

Leaves red, yellow and green; a very hand-some and showy plant; 3 feet.

Cat. No. 1018-Price, large pkt., 4c: 2 pkts., 7c; 1 oz., 15c.

Galloway's Long-Spurred Aquilegia (Columbine)

Hardy perennials of great beauty and utility in borders, where they will bloom freely when established, early in the summer. The long-spurred type, of which we make a specialty, gives elegant cut flow-

Cat. No. 1020—Price, large pkt., 5c; 2 pkts., 8c; 1 oz., 60c

Balloon Vine (Love in a Puff)

Annual climber of rapid growth; foliage very pretty, flowers white; seed vessels look like miniature balloons. Height, 8 feet; suc-ceeds best in light soil and warm situation.

Cat. No. 1022-Price, large pkt., 4c; 2 pkts., 7c; 1 oz., 25c.

Balsam, Camellia

Double Flowered Lady Slipper

The balsam is not only one of the most beautiful, but one of the very easiest to grow. Imagine about five hundred of these magnificent large double blooms upon a plant at one time. The branches being perfect pyramids of bloom, which is no uncommon sight with this plant. It is marvelous, truly a revelation to the many who never knew what really good balsams arc. A rich soil is not necessary; all they require is plenty of room. The gigantic flowers are double and perfect like camellias, about 2 inches in diameter. And as the colors are some of the most beautiful to behold, their gorgeous splendor is a remarkably attractive sight.

Cat. No. 1024-Price, large pkt., 5c; 2 pkts., 8c; 1 oz., 20c.

Carnation Marguerite

Candytuft White Rocket

One of the oldest annuals in existence and more popular than ever. It flowers in wonderful profusion throughout the whole season and its dwarf habit, growing from 4 to 5 inches high, makes it an exceptionally fine border plant; hardly a public park of note in the country is without it. Perfectly hardly, grown easily; splendid for cut flowers. Extremely fragrant.

Cat. No. 1028-Price, large pkt., 4c; 2 pkts., 7c; 1 oz., 20c.

West Salem, Ill. Box 95.

Bartonia Aurea

Bartonia

CULTURE-Sow in the open ground early in May where they are in-

culture—sow in the open ground early in May where they are intended to bloom.

One of the most showy of annuals, excellent, both for beds and borders, Producing showy, golden yellow flowers. The foliage is gray and thistle-like and is exceedingly brilliant in the sunshine. It does not bear transplanting so should be sown where intended to bloom. They commence to bloom right through the summer and fall.

Cat. No. 1026—Price, large pkt., 4c; 2 pkts., 7c; 1 oz., 15c.

Carnations Marguerite Mixed Bloom in Six Months from Seed

Carnations are favorites with all lovers of flowers. This new strain will bring them within the reach and the cultivation of everybody, as it is one of the most valuable introductions of modern times.

Sow under glass in January and February and transplant as soon as ready. They commence to flower in July, producing a wealth of large blooms of great variety in color until cut off by the frost, thus producing a supply after the perennial varieties are over. Being equally valuable for indoor cultivation, some can be potted and placed in a cool greenhouse, where they will provide a succession of bloom during the winter months. They produce a very large percentage of double flowers and include a most varied assortment of fancy yellow ground bizarre as well as selfs, rich with delightful fragrance and diversity of color.

Cat. No. 1029—Price, large pkt., 4c; 2 pkts., 7c.

Centaurea (Dusty Miller)

A very effective border plant popular everywhere, its thic white, silvery leaf being very much admired.

Cat. No. 1030—Price, large pkt., 5c; 2 pkts., 8c

Coix Lachryma (Job's Tears)

An ornamental grass with broad leaves and shiny, pearl like seeds, used for beads. Plant early in the spring, fou or five seeds in a hill, one-half inch deep. Three feet high Cat. No. 1032—Price, large pkt., 4c; 2 pkts., 7c 1 oz., 15c.

Clarkia Mixed

Bright and attractive annuals of easy culture. The long graceful sprays are valuable for table decoration. The thrive in sun or shade, growing 2 to 2 ½ feet high, wit masses of double flowers, which all open in water whe cut. All colors mixed.

Cat. No. 1034—Price, large pkt., 4c; 2 pkts., 7c

Canary-Bird Vine

1 oz., 25c.

Easy-growing, free-blooming annual climber for house or garden. Brigi yellow flowers resembling a canary bird with extended wings. Ten feet. Cat. No. 1036—Price, large pkt., 4c; 2 pkts., 7c; 1 oz., 20c.

White Rocket

Pure Genuine & Unadulterated Tested Seeds that Grow

Extra Early Flowering Cosmos

The earliest flowering variety in cultivation, blooming fully two months in advance of any other strain known. Seeds sown in open ground, in early May, will produce blooming plants in July, and continue a mass of bloom until killed by frosts. It is the result of painstaking selection from a few plants several years ago, which showed a decided tendency to earliness. This desirable trait is now so well established, that instead of a few plants coming early—as in all other so-called early varieties—our Extra Cosmos is uniformly early, and will bloom in any part of the North. Its delicate fern-like foliage and conspicuous crimson pink and white flowers form a pleasing contrast. The plants grow about 4 feet tall and bloom freely, where all others fail to show a bud, eliciting expression of admiration from every true lover of flowers. For ornamenting the home or church the cut blooms will be found most desirable, lasting a week or more if kept in water. The flowers are of good average size and are borne upon long stems, well above the foliage.

Cat. No. 1038-Price, large pkt., 5c; 2 pkts., 8c; 1 oz., 20c.

Extra Early Flowering Cosmos In Separate Colors

Cat. No. 1039—Deep Crimson, pkt., 5c; 2 pkts., 8c.

golden and crimson colors, usually
with a garnet eye.

Cat. No. 1051—Price, large pkt., 4c; 2 pkts., 7c; 1 oz., 25c.

Castor Oil Plant (Ricinus Mixed)

A well known ornamental plant of stately growth and picturesque foliage, extensively used around lawns and in shrubberies to give a sub-tropical effect; make delightful center plants for beds. Just try a bed planted in the following way: Center of bed two or three Caster Oil plants, surround these with Salvia (Scarlet Sage) and as an outside porder use White Rocket Candytuft. The varied foliage of the Caster Oil plants, the brilliant scarlet of the Sage and he snow-white border of Candytuft will make a magnificent tisplay very hard to beat. Our mixture is a delightful blend of all the best named varieties and includes all the following shades and colors: Bright Green, Deep Red, Bronze, Green and White, Carmine and Pink, a truly magnificent mixture, worthy of a place in every garden. As a pot plant for veranda decoration they are fine; they hold their own with the best of Palms, Dracenas, etc. Put one plant in a 12-inch pot or tub. Two or three stood about the veranda or porch will add dignity to any home.

Cat, No. 1953—Price, large pkt., 4c; 2 pkts., 7c; 1 oz., 15c.

Cobaea Scandens. Cathedral Bells

One of the handsomest and most rapid growing of the annual climbers. Climbs thirty feet in a season. The flowers are bell-shaped. Very prolific and perfectly hardy. The vine is always clean and free from insects. Flowers Blue, White and Pink.

Cat. No. 1049-Price, large pkt., 5c; 2 pkts., 8c; ¼ oz., 25c.

Chrysanthemum (Annual)

Sow in the open ground early in May where they are intended to bloom. Of all annuals these pretty flowers perhaps hold a leading position and many of them have been raised on our Seed Farms. All are beautiful in beds and borders and good for window boxes or cutting. Sow seeds in spring in boxes for early flowering, and in the open for general work. Some varieties make useful pot plants; for this purpose they should be sown under glass and thinned out. One and one-half feet high.

Cat. No. 1055—Price, large pkt., 4c; 2 pkts., 7c; 1 oz., 20c.

Drothers & Compan

Dianthus or Indian Pinks

Godetia

Sow in the open ground in May where they are intended to bloom. This delightful flower is not so widely known as it deserves to be. We have not the slightest hesitation in saying for it that it is one of the loveliest of annuals and certainly no garden should be without a batch of them. The care and culture bestowed upon them has produced some really marvelous varieties, far exceeding in size of bloom and brilliance of coloring the old kinds. Perhaps there is no class of flower producing more abundant bloom. The habit of the species is excellent and the glossy, silky texture of the petals is worthy of inspection. The Godetia makes an excellent cut flower, a spike of half open buds continuing to develop for a long time if fresh supplies of water be given daily. It also makes an effective pot plant for the greenhouse when sown at end of summer and kept growing through the winter in a cool house. Put in a bed of Godetias and Larkspur mixed and you will certainly be delighted with the effect.

Cat. No. 1067—Price, large pkt., 4c; 2 pkts., 7c; 1 oz., 25c.

Gypsophila (Baby's Breath)

The delicate, mist-like sprays of the Gypsophila are invaluable for bouquets. They serve to lighten the effect of masses of other flowers, and are especially useful with Sweet Peas, and other flowers that cannot readily be cut with their own foliage. Flowers snow white.

Cat. No. 1069-Price, large pkt., 4c; 2 pkts., 7c; 1 oz., 25c,

Gourd (Ornamental)

Rapid growing annual climbers for covering arbors, fences, etc., with ornamental foliage and curious shaped fruit.

Cat. No. 1071 -Price, large pkt., 4c; 2 pkts., 7c; 1 oz., 30c.

Dianthus (or Indian Pinks)

For early flowering sow seed in boxes in the early spring and transplant to the open ground when weather will permit or sow in the open ground when all signs of frost are past.

Positively one of the loveliest of flowers. Our mixture contains every known shade and color in the Pink family. There is probably no better known flower than this beautiful one. They are unequalled for color and fragrance. They produce an immense wealth of bloom. A bed of Indian Pinks are a delightfully pleasing sight and cannot fail to attract the attention of all who see them. For cut bloom they are hard to beat. The more you cut the longer and stronger they continue to bloom. They can be grown in any soil and withstand drought better than most other flowers. If you want a truly magnificent display of bloom try a bed of Pinks and Phlox Drummondii. The effect of these two flowers growing together is simply dazzling.

Cat. No. 1057—Price, large pkt., 4c: 2 pkts., 7c: 1 oz., 60c.

Cat. No. 1057-Price, large pkt., 4c; 2 pkts., 7c; 1 oz., 60c.

Dolichos Lablab (Hyacinth Bean)

Splendid climbers with abundant clustered spikes of purple and white flowers, which are followed by exceedingly ornamental seed pods. It is of rapid growth and often runs 30 feet in a season. Average height 10 to 20 feet. Tender annual.

Cat. No. 1059-Price, large pkt., 4c; 2 pkts., 7c; 1 oz., 15c.

Datura (Horn of Plenty)

Very attractive, bushy plants of easy growth, that during the whole season are covered with elegant, fragrant, trumpet-shaped flowers. Hardy annual. Three feet.

A magnificent variety. The blooms average 8 inches long by 5 inches across; the color is white inside, while the outside is most beautifully marbled with royal purple.

Cat. No. 1061—Price, large pkt., 5c; 2 pkts., 8c; 1 oz., 30c.

Dimorphotheca Aurantiaca

Orange African Daisy

rare and extremely showy annual Daisy from South Africa which thrives under our climatic conditions perfectly, and we expect it to become a favorite. The bushy plants grow 12 to 15 inches high. The flowers, 2½ inches across, are a unique, rich, glossy orange-gold, with dark disc and these glitter in the sunshine and present a magnificent sight. Seed may be sown in the same way as Asters and should have a sunny position. They bloom the greater part of summer and fall.

Cat. No. 1063—Price, large pkt., 5c; 2 pkts., 8c; ¼ oz., 50c.

Foxglove (Digitalis)

The Foxgloves are quite stately and highly ornamental plants, when well grown, with flower stems at least three feet in height. They are fine for the mixed border, or planted singly in half shady places near a walk or drive. The racemes of flowers are often two feet in length, containing scores of the prettily-spotted thimble-shaped flowers. Perfectly hardy. Sow the seed in spring in the garden, and transplant as desired. Perennial. MIXED VARIETIES.

Cat. No. 1065—Price, large pkt., 4c; 2 pkts., 7c; 1/4 oz., 25c.

Kochia Scoparia (Trichophylla)

Kochia Scoparia or Mock Cypress, is one of those old-time plants that fell out of general cultivation for many years. In improved type has now been evolved, which makes a retty plant, with a habit much resembling one of the compact evergreen shrubs. In Kochia Trichophylla we have an innual with feathery foliage, which changes as the summer dvances from a light green to a rich crimson. The seed hould be sown in Spring under glass, and the seedlings botted off singly, to be ultimately bedded out or plunged in the pots in which they are growing. The plants should be pinched back and trimmed to shape when necessary. Jeight, about 2 ft.

2at. No. 1079—Price, large pkt., 4c: 2 pkts., 7c: ie pinched back and triming leight, about 2 ft. Jat. No. 1079—Price, large pkt., 4c; 2 pkts., 7c; Jat. No.

Larkspur (Dwarf Rocket)

CULTURE—Sow in boxes in the early spring and protect rom frost, or in the open ground in May.

One of the easiest of easy flowers to grow and certainly ne of the prettiest. It is the Annual Delphinium, grows ½ to 2 feet high. Fine for cut flowers and the border, lue, rose, white, delicate pink, carmine, light blue, mauve, wurple, etc., spikes of bloom. Don't miss the real picasure o be derived from a batch of these glorious flowers. If you lave any favorite colors you will surely get them all in a latch of our Dwarf Rocket Larkspurs.

Galloway's Everblooming Hardy Garden Pinks

Very beautiful sweet-scented, double, semi-double and ingle flowers in great diversity of color. Lat. No. 1083—Price, large pkt., 5c; 2 pkts., 8c.

Hollyhock (New Annual)

To insure early bloom it is best to sow hollyhocks about March or April in boxes or pans in a cold frame, or where they will be protected from frost, and transplant them where they are intended to bloom, early in May, or when all signs of frost have passed. A comparatively new class, of easy culture, and flowering as quickly from seed as any garden annual. The plants from early sown seed set out in May, begin flowering in July; the May sown, in August; but in either event they flower profusely until frost. The plants are vigorous in growth and naturally branching in habit, and if given the best of treatment will thrive luxuriantly. The soil should be very rich deeply dug, and during dry weather, water liberally. The diversity of forms and colors is delightful. There is a great variety of colors and color combinations in this strain, including maroon, pink, rose, crimson, white, cerise, scarlet, and many variegations of dainty and exquisite blending. These lovely plants make a lovely background for a border or as a hedge to divide the kitchen garden from the flower beds.

Cat. No. 1075—Price, large pkt., 10c; 2 pkts., 15c; ¼ oz., 30c.

Mignonette

(Mammoth Flowering, Sweet Scented)

(Mammoth Flowering, Sweet Scented)

Sow in the open ground after all fear of frost has passed. No garden can be complete without a batch of this delightfully fragrant and pretty flower. Our Mammoth Flowering Mignonette is much superior to the common variety so often bought in stores, that will develop into nothing much better than a weed. We offer you a great strain of this increasingly popular little flower. The most beautiful bright red mignonette in existence. The color being a magnificent pure bright red, extremely showy and enormous grand flowers, foliage beautiful rich green; a perfect flower for cutting, will remain quite fresh and fragrant for ten to twelve days in water, the water being changed each day.

Cat. No. 1085—Price, large pkt., 4c; 2 pkts., 7c; 1 cz., 15c.

2 pkts., 7c: 1 oz., 15c.

Morning Glory

(Japanese Improved or Giant Flowering)

Flowering)

Flowers of huge size, with colorings and markings that are quite beyond description. They include every shade and color from snow white to deep purple. Many are spotted, marbled, striped, flaked, and splashed. They are unquestionably the largest and most beautiful of this handsome family of easily grown climbers. Wherever climbers can be grown this handsome strain should have a prominent place. Cat. No. 1089—Price, large pkt., 3c; 2 pkts., 5c; 1 02., 15c. 2 pkts., 5e; 1 oz., 15c.

"Morning's Bride"

(Sweet Scabious Mixed)

Sow the seed in heat in February and March in a pan or small box, and transplant the seedlings three inches apart in larger boxes; harden off as spring advances, and set out in the border towards end of May. They may also be sown where intended to grow.

During recent years this delightful flower has been much improved both in the size of the bloom and the range of color and is fast becoming one of the most popular of flowers.

They range in color from the purest white to the richest purple. No matter what your fancy colors may be you will find them in this splendid mixture. When given plenty of room and the secd vessels are kept regularly picked off, it will last in bloom right through the summer and fall; owing to its sweetness the bees are very fond of it and its floral facours also attract all the most beautiful types of butterflies to the neighborhood. One of the finest plants for bed or border and for cutting it is hard to surpass. Height 18 lnches. The flowers are borne on long wirv stems.

Cat. No. 1087-Price, large pkt., 4c; 2 pkts., 7c; 1 oz., 50c.

Morning Glory

Love in a Mist

(Nigella)

CULTURE. Sow in the open ground in May. A compact, free-flowering plant, with very finely cut foliage. The plants grow to oval bush from 15 to 18 inches high. A very curious and interesting plant. In the finely cut fernlike foliage nestle hundreds of lovely, bright blue, double flowers, 1½ inches across, a distinct and pretty novelty that is bound to interest and please all who grow it.

Cat. No. 1099-Price, large pkt., 4c; 2 pkts., 7c; 1 oz., 20c.

Mathiola Bicornis

(Evening Scented Stock)

Sow in the flower beds or border as soon all signs of frost are past.

A dainty little flower with a delightful odor, seen in all old-fashioned gardens. The flowers are purple liliac and emit an entrancing odol during the evening and after showers.

Cat. No. 1101-Price, large pkt., 4c; 2 pkts., 7c; 1 oz., 50c.

Galloway's Sweet Scented Mignonette

Japanese Kudzu Vine

To this must be awarded first place as the fastest growing hardy climbing plant. It will grow 8 to 10 feet the first year from seed, and after it has become established there seems to be no limit to its growth, 50 feet in a single season being not unusual. Its foliage is large and covers well; it bears small racemes of rosy-purple, pea-shaped blossoms towards the close of August, A splendid subject for covering permanently verandas, dead trees, etc.

Cat. No. 1091—Price, large pkt., 5c; 2 pkts., 8c.

> Mimosa (Sensitive Plant)

Curlous and interesting annuals, with plnklsh-white flowers; the leaves close and droop when touched or shaker; 1½ feet.

Cat. No. 1093—Price, large pkt., 4c; 2 pkts., 7c; 1 oz., 50c.

Myosotis

Forget-Me-Not

Half-hardy perennial, which flowers the first year from seed if sown early. Will bring forth lovely blossoms throughout the whole summer and fall. Plowers are borne on long, stiff stems and of the most exquisite sky-blue, with a delicate white center. They succeed best with moisture in a somewhat shaded position. Cat. No. 1095—Price, large pkt., 4c; 2 pkts., 7c;

14 oz., 30c.

Marvel of Peru

Four O'Clocks (Mixed)

CULTURE. Sow where intended, in bloom in May. This handsome, well-known, free-flowering garden favorite does well in any soil and under almost all conditions. Produces large, convolvulus-like flowers of many brilliant colors. The flowers are at the height of perfection during the afternoon, when the flowers are fully expanded. Height 2 feet. Cat. No. 1097—Price, large pkt., 4c; 2 pkts., 7c; 1 oz., 15c.

SEEDS JUST FINE

SEEDS JUST FINE

Springfield, Ohlo, June 24, 1915.

Marigold

African Marigold

We never really appreciated the worth of the Marigold as a bedding plant until this season, but after seeing them in the borders of our Sced Testing Farm we are convinced that their value as a bedding plant cannot be over estimated. The African Marigold produces densely double flowers 8 to 10 inches in circumference and of the regularity and perfection of a Dahlia. For effective garden display during the summer and fall nothing can surpass the gorgeous masses of color of these grand plants. Color of flowers brilliant golden orange and pale canary yellow. This fine old fashioned flowers was the pride of our Grandmother's garden. Cat. No. 1103—Price, pkt., 4c; 2 pkts., 7c; ¼ oz., 20c. 7c; ¼ oz., 20c.

French Marigold

4c; 2 pkts., 7c; 1/4 oz., 20c.

Tall Nasturtiums

Giant Flowering (Mixed)

This grand mixture contains a wealth of color seldom found in other nixtures, crimson, rose, yellow, pink, orange, white, spotted, etc., etc. For rilliancy of coloring and general excellence nothing excels Nasturtiums. they are easy of culture. All they need is a moderately good soil in a well drained sunny position and from within a few weeks from the time hey are sown until hard frost comes, there is an endless confusion of corgeous blossoms. An excellent and luxuriant climber for verandas, trelises, etc. Useful for covering unsightly buildings, soon transforming he unsightly into the beautiful. When the position does not admit of its climbing it is equally at home as a creeper and can be a reeper and can be a sereeper and can be a fall and use them for ickles. They nake a good ubstitute for aper sauce, to garden is Giant Flowering (Mixed)

African Marigold

ubstitute for aper sauce. No garden is o m plete without a patch of the pretty climbing annual.

Shirley (or Ghost) Poppy

Ghost Poppies Galloway's Beauty Mixture

Sow out of doors where they are intended to bloom, as soon as the weather

tended to bloom, as soon as the weather permits.

It is impossible in describing these lovely flowers to do them full justice. There is nothing more graceful than the silky blooms of this magnificent variety, and we can safely say that no flower will give more pleasing display of gorgeously brilliant bloom. This strain particularly, is considered by many the most charming in cultivation. The individual flowers are large and elegant, the exquisite colors range from purest white to deep blood-red, in every conceivable combination and markings. Plants grow from eighteen to twenty-four inches; are well branched, and produce immense quantities of flowers right through the summer. Many of them measure as high as four inches across. Put in a bed of our Beauty Shirley Poppies and border them with Sweet Alyssum. The effect will be pleasing in the extreme and bound to please the most critical lover of the artistic in flowers. Cat. No. 1135—Price, large pkt., 4c; 2 pkts. 7c; 1 oz., 25c. 4c; 2 pkts. 7c; 1 oz., 25c.

Giant Double Poppies (A Beautiful Mixture)

CULTURE-Same as for Single Shir-

Ley Poppies
A truly magnificent collection of double annual Poppies of immense size and dazzling brilliance. In this nixture is included only the richest, most brilliant and loveliest shades and colors. The flowers, which are 4 to 5 inches in diameter, are produced in great abundance on stems 2½ to 3 feet high, and if the seed pods are plucked off as they martine, a continuous supply of bloom may be expected for many weeks. A few

batches of these very showy flowers will add life and galety to the brightest of gardens. For imposing effect there are no better Poppies anywhere than our Glant Double Mixture. One packet contains sufficient seed to make a gorgeous display. Cat. No. 1137—Price, large pkt., 4c; 2 pkts., 7c; 1 oz., 25c.

Iceland Poppies

While these are hardy perennials, they While these are hardy perennials, they flower the first year from seed, blooming almost as qulckly as the annual sorts. They are of graceful, neat habit, with bright green, fern-like foliage, formed in tufts, from which issue slender stalks about 12 inches high, bearing their brilliant flowers in endless profusion; most useful for cutting, for which purpose pick when in bud, and, if the seed pods are picked off, continue in flower the cntire season. They remain evergreen throughout the winter, coming into bloom early the following spring. Mixed colors.

Cat. No. 1136—Price, large pkt., 5c: 2 pkts., 8c; 1 oz., 40c. 5c; 2 pkts., 8c; 1 oz., 40c.

White Swan Poppy

Immense double flowers, beautifully fringed and of purest white, of the same dwarf habit as Cardinal and Shell Pink. Cat. No. 1138—Price, pkt., 5c; 2 pkts., 8c; 1 oz., 40c.

Cardinal Poppy

A splendid dwarf variety of the car-nation-flowered type, growing about 2 feet high and bearing large, globular, fringed flowers of an intense cardinal

Nemophila

BABY-EYES—A charming little annual plant, thriving especially well in moist, shady places, but quite at home in the open garden. The pretty, bell-shaped flowers, in shades of blue, and variously marked, are freely produced all summer. Plants eight inches in height, of neat, bushy habit. Mixed varieties.

eties. Cat. No. 1130—Price, large pkt., 4c; 2 pkts., 7c; 1 oz., 20c. Nicotiana Affinis (Tobacco Plant)

Nicotiana Affinis (Tobacco Plant)

Sow in boxes or pans in the early spring and protect from frost and cold winds. Plant out as soon as all fear of frost is over.

A real gem for bedding. Most showy and profuse bloomer, giving a continuous display of waxy white flowers right through the summer and autumn. They commence to bloom a few weeks from sowing. The plants are of branching, bushy habit, 2 to 3 feet high, carry the flowers in clusters. One single plant will bear thousands of blooms during the season. The effect in the garden is simply unsurpassable. Delightfully sweet scented.

Cat. No. 1132—Price, large pkt., 4c; 2 pkts., 7c; 14 oz., 20c.

California Poppy (Eschscholtzia Californica)

Sow in the open ground when all signs of frost are past. Thin out when the plants are sufficiently large to handle.

Unusually attractive. Exquisite foliage.

Few plants are of more delicate appearance and attractive to the eye than this poppy-shaped flower, yet it is one of the hardiest and most easily grown. It is very showy and comes into bloom soon after its appearance above ground. It stands considerable cold and blooms after the first frosts. Very attractive as an edging because of its interesting and bluish foliage. The plants grow bushy and about 12 inches high. In sunshine the petals open up to the fullest and altogether it is as unusual as one could wish for.

Giant Orchid Flowering

There is no flower so universally and extensively grown as the Sweat Pea, and everybody wants the finest and best flowers obtainable. Now we say unhestratingly that if you sow our Giant Orchid Flowering Mixture you will get absolutely and positively a mixture unsurpassed anywhere in the wide world. All the old small flowering types have been eliminated and nothing but the very highest type put in. Many of the stems of this grand new Sweet Pea carry 3 to 4 blooms each, of immense size and beautifully crimped. There is no limit to the range of color. The mixture contains fully one hundred of the best known large flowering varieties and covers every known shade and color. The stéms are long, fully 12 to 14 inches, making it an ideal mixture for cut bloom. In order to prolong the flowering period of Sweet Peas the seed pods should not be allowed to develop. This can be done by keeping the blooms picked. There is really no need to pay high, fancy prices for named Sweet Peas, when you can get them all in this mixture at so reasonable a price.

Cat. No. 1157—Price, large pkt., 5c; 2 pkts., 8c; 1 oz., 20c.

Galloway's Everlasting Sweet Peas

These are very valuable from the fact that they are in full bloom early in the spring before the others have begun to flower. They live year after year, bearing magnificent clusters of flowers. Perfectly hardy and grow eight to ten feet high.

Cat. No. 1158—Price, large pkt., 5c; 2 pkts., 8c; 1 oz., 40c.

Passiflora Coerulea Portulaca Rose Moss

(Passion Flower)

A most interesting and well known order of climbers, bearing singularly beautiful flowers. They are the pride of South America and the West Indies, where the woods are filled with their species, climbing from tree to tree, bearing flowers of striking beauty.

Cat. No. 1170-Price, per pkt., 4c; 2

"Painted Tongue"

(Salpiglossis Mixed)

Seed should be sown early in spring in a hotbed or window and transplanted when weather is settled or directly out of doors after danger of frost.

A beautiful bedding plant with Orchid-like flowers, greatly used for cut bloom, will remain a long time fresh after being cut. Produces an abundance of fascinating blooms and throughout the entire summer and fall, strong, of erect growth, bearing flowers of the finest markings. The exquisite beauty of the flowers with their rare combination of color is a revelation to all who see them for the first time, Our mixture contains only the very best and largest flowering varleties. A mixture that is sure to please the most exacting of our cus-

Galloway's

PANSIES

Giant Butterfly Pansies

"The Largest Flowering Pansy in the World"

"The Largest Flowering Pansy in the World"
CULTURE—The pansy will succeed in any soil that is not too high or dry. In early spring the seed should be sown in boxes and, when the plants are large enough, planted out in the garden. Plant not less than six inches apart. There should be no check in their progress either by cold winds, very hard frost or long drought; nor should they be watered with very cold water during the hottest weather.

Everybody, young and old, loves the Pansy, and we are sure our Giant Butterfly Mixture will compel an even greater appreciation of this lovely flower than ever. It is a superb mixture of all the largest and best types in every known class. Will produce enormous blooms in all the richest colorings and markings. It is the best of all the American and Continental strains and secured by us only at great expense. They are variously colored in all the richest shades, markings and lacings, many of them being beautifully crimped, a very curious combination of coloring that cannot fail to elicit astonishment by all who see them. The mixture from which growers often discover new and beautiful strains. A grand class from which to select exhibition blooms.

Cat. No. 1178—Price, large pkt., 10e; 2 pkts., 15c; 1 oz., \$2.00.

Verbenas
(Giant Mixed)

(Giant Mixed)

CULTURE. To insure early bloom it is best to sow Verbenas about March or April in boxes or pans. In a cold frame or where they will be protected from frost, and transplant them where they are intended to bloom early in May, or when all signs of frost have passed. Another flower that has been improved almost out of recognition, whereas only a few years ago the flowers were woefully small and their color limited to but a few shades. Today it is a handsome plant with a range of color that is almost bewildering. Few plants are better liked and give more satisfaction. They are strong, healthy and vigorous, bloom freely right through the summer and fall. For garden, beds and massing these verbenas are unrivaled. A bed of verbenas with a border of white Candytuff or Sweet Alyssum make a gorgeous display.

Cat. No. 1242—Price, large pkt., 4c; 2 pkts., 7c; 1 oz., 85c.

Wallflowers

(Finest Mixture)

(Finest Mixture)

These beautiful flowers are great favorites with the European gardeners. They are not much grown in this country as they deserve to be, they are perennials and make nice bushy plants 1½ feet high bearing in the spring long spikes of fragrant flowers of many colors. They are excellent for cutting. Cat. No. 1244—Pkt., 5c; 2 pkts., Sc; 1 0z., 25c.

CHERRIES

Plant cherries both for home and market use. The cherry is the most profitable small fruit grown. Ideal either as "fillers" in apple orchards, or planted separately, Cherry trees are infected by fewer diseases than any other fruit tree. Require little or no pruning. Will grow on any well drained soil.

The so-called "sour" cherries are hardy, vigorous growers, always dependable. "Sweet" cherries are not quite so hardy, but do well in many parts of the East, Our cherry stock is as fine as any home.

South and west.

Our cherry stock is as fine as can be grown. All are budded on imported Mahaleb seedlings, which make the best and longest lived trees.

bearer. June. Cat. No. 2230. LATE DUKE.

Cat. No. 2230.

LATE DUKE. Large, heart-shaped; color light, mottled with bright red at first, becoming rich, dark red when ripe; flesh pale amber, sub-acid; season very late. English origin. Last of June.

Cat. No. 2231.

LARGE MONTMORENCY. There are several distinct strains of Montmorency; all of them are good, but we consider our Large Montmorency the best, and it should be planted largely in every orchard. The fruit is large, dark red, handsome and one of the finest flavored cherries of its class. Tree strong grower, hardy, very productive. Late June

be planted largely in every orchard. The fruit is large, dark red, handsome and one of the finest flavored cherries of its class. Tree strong grower, hardy, very productive. Late June.

Cat. No. 2232.

WINDSOR (Sweet). We recommend this variety for the hardiness of the tree and fruit buds, as it is of Canadian origin. A large, delicious cherry of remarkable qualities; reddish brown or liver colored. Valuable for late market or home use. July.

Cat. No. 2233.

WRAGG. Best of the late sour cherries. Large roundish, heart-shaped, dark crimson. Flesh firm and good quality. Tree strong, vigorous grower. Hardier, more productive, more profitable than any other cherry of the Morello type. Very late.

Cat. No. 2234.

PEARS

The cultivation of this noble fruit is rapidly extending as its value is appreciated, and the demand for it is increasing every year, making it one of the most profitable fruits to plant. The range of varicties is such that, like apples, they can be had in good eating condition from August until early spring. Every home orchard should contain a good assortment of pears. From a commercial standpoint they are profitable—they should be planted by the hundreds.

Prices, Guaranteed First Class Trees

Each 10 100 1000

BARTLETT. One of the most profitable sorts both for home and market, Large, handsome, waxen yellow with red blush; fiesh buttery, rich and juicy, highly flavored. Bears young, produces enormous crops. Not nearly so liable to be damaged by insects and diseases as some other varieties. One of the best pears for dessert and for canning. August and September.

Cat. No. 2255.

CLAPP'S FAVORITE. Fruit handsome, large, long, yellow, spotted dull red where exposed to sun; flesh fine grained, juicy, rich, sweet flavored. Resembles Bartlett. Should be picked about a week before ripe to insure its keeping. Tree vigorous grower and productive. August.

Cat. No. 2256.

KOONCE. Exceedingly hardy—almost frost-proof; will bear heavy crops when most other sorts are destroyed. Vigorous grower and seldom blights. Handsome, medium size, yellow with carmine cheek; juicy, sweet, fair quality. Fruit may be packed green and will color up in few days. Good market variety and excellent shipper. July and August. August. Cat. No. 2257.

FALL AND WINTER PEARS

FALL AND WINTER PEARS

DUCHESS D'ANGOULEME. Largest pear among the really good ones. Skin dull, greenish yellow; flesh white, melting, juicy, well flavored. Tree a vigorous grower and reliable bearer. Profitable on the markets and fine for the home garden. Does well as a dwarf. October and November.

Cat. No. 2258.

FLEMISH BEAUTY. Fine for Montana and the Northwest on account of Its hardiness. Tree strong grower, annual abundant bearer, succeeds over a wide range of climates. Fruit large; skin yellow, spotted with reddish brown; flavor sweet and melting. One of the few pears that can be allowed to ripen on the tree without rendering it flavorless. September and October.

Cat. No. 2259.

KIEFFER. One of the best, keeps long, brings good money. Extra large, handsome, rich golden yellow, with light vermilion cheek. Fine for canning or preserving. For commercial purposes one of the most profitable. Bears young, every year, and the tree is remarkably free from diseases of all kinds. October and November.

Cat. No. 2261.

SECKEL. This well-known little pear has attained the rank of standard quality or account of its rich, deliclous flavor; it is very popular for dessert. Frult small, brownish rather russety. The tree is erect, stout, but not a fall grower, and very round-headed September and October.

Cat. No. 2263.

PLUM TREES

Often called "the poor man's tree," because they require such little room to grow and are always such prolific bearers. The market demand for high grade plums is almost unlimited, and for dessert, cooking and canning no fruit is more delicious.

Plant a commercial orchard of plums, give it your undivided attention—it will bring you large profits and prove a good investment. Or use plum trees to fill in the places on your farm where other fruit trees will not have room to grow. You will be surprised at the amount of good fruit that can be raised in this way.

Plums do best in light, sandy soil, but they will grow in most any soil as long as it is well drained. The trees should be sprayed annually with Bordeaux mixture.

The varieties we offer below have been thoroughly tested and are old "standbys." You can plant them with every assurance of success. The trees we offer are clean, healthy and sturdy two-year old, budded on the finest Myrobolan plum stock.

Prices, First Class Trees

Cat. No. 2249. Cat. No. 2249,

PEACHES

Live on a farm? Either plant a peach orchard to grow fruit for home use or put out a commercial orchard—it will pay. Live in the city? Plant at least a few trees in your back yard, Raise peaches to eat fresh or to can. In spite of the fact that large peach orchards are planted every year, there are not near enough peaches grown to supply the market. Grow your own and help supply the other fellow. There is profit in it either way you take it.

BELLE OF GEORGIA. A great market peach of the South. Large white, freestone peach with a red cheek; flesh white, red at the pit, firm; juicy and excellent flavor. Tree a rapid grower and very productive. Early July. Cat. No. 2269.

Cat. No. 2269.

CARMAN. Profitable, being the first real freestone peach of the season. Large, yellowish white; flesh creamy white, tender, rich, spicy and juicy. Tree hardy, good grower, bears large crops regularly. A fine shipper. August.

Cat. No. 2268.

CHAMPION. A splendid freestone; large, cream white with slight blush; flesh white, rich, sweet and juicy, of excellent flavor. Hardy, productive. A profitable market sort; sells and ships well. August.

Cat. No. 2270.

CRAWFORD'S EARLY. Large, yellow freestone of finest quality; bright red cheek.

Good for canning and eating fresh. Largely planted all over the country. Valuable. Late August.

Cat. No. 2271.

Thens two

CRAWFORD'S LATE. Similar to Crawford's Early but ripens two

to three weeks later. Cat. No. 2272. CROSBY. One of CROSBY. One of the hardiest. Medium, round, bright yellow splashed with carmine; flesh yellow and of good flavor; freestone. Inclined to overbear, and if allowed to do so the quality is inferior. Should be thinned. September. Cat. No. 2273 ELBERTA. An old favorite of proven worth. Fruit large size, with golden yellow skin, covered largely with crimson; flesh is yellow, julcy, good and ships well. A great canning peach. Tree a vigorous grower, healthy, fairly hardy, and a regular cropper. Freestone. August and September. Cat. No. 2274.

- 63 -

alloway Brothers & Company, Waterloo, la

There is probably no flower more popular and better known than the rose. Never before was there ever such a wealth of roses for the amateur to choose from as now. They are being bred for the beauty of the plant form, as well as for the beauty of the flower. It is also bred for health, hardiness, freedom and continuity of bloom. As a result there are some wonderfully beautiful productions, both as to form and color, the latter ranging from pure white through all the shades of pink, red and yellow.

The ideal location for a rose garden is an airy, but sheltered spot (sheltered especially from the chilling winds of winter)

but exposed all day, if possible, to the sun. A southern exposure is best.

When roses are received, if they seem to be at all dry, soak them in water, being careful at all times not to allow the roots to be exposed to the air. The roses root deeply, therefore the bed should be thoroughly prepared and dug up to a depth of at least two feet.

The roses which we offer below are all good standard varieties, well suited to the home garden and guaranteed to give satisfaction. Field-grown roses are those that have been propagated in the field and grown from two to three years in the

open and are considered more reliable for outdoor planting.

Because of the vast increase each year in varieties it is necessary that careful selection be made. We offer but few varieties, but these are the cream of them all, the best and most superior of their class. Remember, we offer only hardy varieties and you could go through six catalogs and in the confusion of hundreds of kinds, could not find a better selection than the ones we offer.

Climbing Roses Crimson Rambler

Two-year plants will attain a height of 10 to 20 feet in a single season, and the second year they will continue to produce a marvelous profusion of rich and glowing crimson flowers in large clusters. It presents a vivid crimson mass of beauty when in full bloom, during June and July. It is absolutely hardy everywhere.

Cat. No. 2650—Price, 2-year-old plants, 25c each, by express; 3 for 73c.

White Rambler

Flowers the size of a silver quarter, perfectly filled, very fragrant, color white, sometimes tinged with blush; vigorous and hardy. This particular climbing rose deserves a place wherever roses are grown. Our strong 2-year-old plants will give you flowers a year after planting. Cat. No. 2651—Price, 2-year-old plants, 35c each, by express; 3 for 94c.

Golden Rambler

Flowers deep yellow, changing to a fine white, with yellow center, full and fragrant and a constant and profuse bloomer. Plants of this variety have been known to retain from 75 to 100 buds and flowers till the middle of November.

Cat. No. 2652—Price, 2-year-old plants, 26c, by express;

3 for 76c.

Pink Rambler

Has large trusses of clear shell plnk flowers and is very popular. Differs from the Dorothy Perkins in larger flowers and clusters, and should be added to your order. Cat. No. 2653—Price, 2-year-old plants, 28c, by express; 3 for 79c.

Dorothy Perkins

Flowers are borne in large clusters, are very double, with prettily crinkled petals; remarkably pretty pointed buds, beautiful clear shell-pink in color, lasting a long time without fading. The bush is perfectly hardy in all localities, a rapid and thrifty grower, bearing its wondrous flowers in great clusters. flowers in great clusters. Cat. No. 2654—Price, 2-year-old plants, 24c each, by express;

3 for 69c.

Veilchenblau, Blue Rambler

This new rose has been introduced recently from Holland. It is a vigorous plant. Has a beautiful bright fresh green color. It is of the Rambler type, and like the Ramblers the blossoms are borne in huge clusters. When they first open the calyx are brilliant crimson, changing shortly to a shade of blue, closely approaching, or as the German calls it, widely blue.

violet blue.

Cat. No. 2655—Price. 2-year-old plants, 35c each; 3 for 95c, by express.

Baby Rambler Roses

This type of rose is becoming very popular for bedding purposes. They form shapely, compact, bushy specimens about 18 inches high and produce a great profusion of bloom from early in the season until severe frost. 2-year-old plants.

Crimson Baby Rambler

One of the best hardy bedding roses; vigorous, and grows 18 to 24 inches high; flowers are borne in clusters of fifteen or more to the cluster, Perfectly hardy, may also be grown in pots for winter blooming. Bright crimson pink. 2-year-old plants.

Cat. No. 2657—Price, 38c each; 3 for \$1.05, by express.

Pink Baby Rambler

This is similar to the Crimson Baby Rambler, except that the blossoms are a delicate pink. 2-year-old plants. Cat. No. 2658—Price, 34c each; 3 for 98c, by express.

White Baby Rambler

Pure white, the yellow stamens show prettily; produced in large trusses. Fine 2-year-old plants.

Cat. No. 2659—Price, 36c each; 3 for \$1.04, by express.

Hybrid Perpetual Roses

These are the hardiest, most persistent to bloom. We recommend them especially for garden culture. They constitute a very important group and embrace a number of varieties. They cover the whole scope in color, size and texture. They are the roses for the amateur as well as for the professional grower.

Frau Karl Druschki

(See Cut Below)

(See Cut Below)

Often known as the white American Beauty. This brilliant white type rose has become renowned as the very best of its class and the best snow-white rose ever introduced. It is an extraordinarily strong grower, branching freely and has the vigor and hardiness of an oak. It has large, heavy foliage and magnificent flowers that are nothing less than glorious and are immense in size and produced in extraordinary profusion. The color is pure white, without a tinge of yellow or any other shade. Is hardy anywhere.

Cat. No. 2660. Price

Growers & Importers of High Class Nursery Stock

Tree Roses

The Tree Roses are grafted on hardy rose stalks 4 to 5 feet high and when in full bloom are objects of beauty. Handsome plants for the rosc

rder.

BABY RAMBLER. This is
of the most attractive BABY RAMBLER, This is one of the most attractive novelties in hardy tree roses. The round bushy Baby Rambler tops are at all times a perfect mass of crimson bloom, The best bloomer of all the tree roses. Cat. No. 2679—Price, 4 to 5 ft, tree, 75c each; 3 for \$2.00, by express.

by express.
DOROTHY PERKINS.
DOROTHY PERKINS.

DOROTHY PERKINS,
Nothing can surpass the becauty
of this rose. It has a delicate
pink shade of the Dorothy Perkins, but being the hardy
dwarf it is completely covered with flowers throughout summer and fall. Very desirable. Cat. No. 2680—Price, 4 to 5 ft, tree, 85c each; 3 for \$2.24,

by express.
WHITE BABY RAMBLER. The flowers are the same on this as on the bush Baby Rambler. Cat. No. 2681—Price, 4 to 5 ft. trees, 80c each; 3 for \$2.15.

by express,

WHITE AMERICAN BEAUTY. Flowers of purest white without a tinge of yellow. Very hardy and a strong grower. Immense flowers. Cat. No. 2682—Price, 4 to 5 ft. trees, 85c each; 3 for \$2,25, by express.

Hybrid Perpetuals (Continued)

ANNE DE DIESBACH, often called Glory of Paris and is a great favorite. It has a brilliant rose color and the large, perfectly formed flowers have large pointed petals and are deliciously scented. Very hardy and will do well in any location.

Cat. No. 2670—Price, 2-year-old field grown plants, 28c each,

by express; 3 for 80c, by express.

Crested Moss Rose

This is a beautiful pink rose. Mossing is handsome and effective. Entirely hardy everywhere and when planted is practically permanent. The flowers and buds have a backing of deep green moss which makes it an exceptionally good plant for cemetery planting. A very beautiful plant and will be more planted when better known. Cat. No. 2671—Price, strong 2-year-old field grown plants,

28c each, by express; 3 for 75c, by express; 12 for \$2.75, by

express.

Clio

This is a dainty, fresh rose shaded in the center with rosy pink. It is one of the finest of the hybrid-perpetual roses, hardy and vigorous and one of the very best roses for outdoor planting. This rose is especially recommended for cemetery planting or for foreground at the edges of shrubbery planting.

Cat. No. 2672-Price, 2-year-old field grown plants, 26c each, by express; 3 for 75c, by express.

Coquette Des Alps

(See cut opposite)

This is one of the best blooming white varieties faintly tinged with rose. Has long large flowers and is hardy in any locality. The flowers are large, full and finely formed.

Cat. No. 2673—Price, 2-year-old field grown plants, 28c each, by express; 3 for 80c, by express.

Gruss En Teplitz

The sweetest, richest hybrid tea rose. This is an extraordi-lary hardy rose and a very vigorous grower, often attaining a cight of 4 or 5 feet. This is one of the most fragrant of roses and has fiery crimson flowers shaded to a velvety dark color and produces in wonderful profusion, sometimes single and some-imes in clusters. It blooms throughout the entire growing cason and is a rose which should have a place in every garden. at. No. 2674—Price, 2-year-old field grown plants, 32c, by xpress; 3 for S0c, by express.

General Jack

One of the most noted roses ever produced. There is no rose etter suited to outdoor culture as it grows into very large, urdy specimens which bear gorgeous red flowers in great prosion. In color the flowers are a gorgeous, shining crimson, added to very dark, forming one of the handsomest of all roses. There is no other rose in our list better known than this old worte or one more universally popular.

at. No. 2675—Price, 2-year-old field grown plants, 30c each, r express; 3 for S0c, by express.

Magna Charta

Another old favorite which is of a bright deep pink, being a very hardy and healthy grower, with large and productive blooms. This great old favorite is not superseded by any variety in its class of this color. Cat. No. 2676—Price, 2-year-old field grown plants, 30c each, by express; 3 for S0c, by express.

Mrs. John Lang

This is a soft pink, beautifully formed, very fragrant, remarkably free flowering, producing immense flowers, borne in great profusion, which are remarkably shaded. This is the best hardy pink rose for outside cultivation and deserves a place in every garden.

Cat. No. 2677—Price, 2-year-old field grown plants, by express, 28c; 3 for 80c.

Paul Neyron

This, no doubt, is one of the best roses of its class, the flowers are of an immense size and one of the largest roses grown. The color is a bright shiny pink; clear and beautiful; very double and full; finely scented. This rose is also exceptionally hardy and will do well in any climate in the United States. It is a good bloomer and will produce flowers all summer long.

Cat. No. 2678—Price, 2-year-old field grown plants, by express 200; 3 cm 250.

press, 30c; 3 for 85c.

Rose Collection

For the benefit of our customers who are not certain as to the best varicties, we have made up a collection of six roses, including climbing, tree and bush roses. They are all hardy, are the best of their types and we are sure will give every satisfaction to our customers.

May 20, 1916. Gentlemen: Progressive strawberry plants came all right— in good condition and they are fine plants.
Wm. M. Alden,
Seward, Ill.

A Strawberry Talk

(By Wm. Galloway)

If there is anything that grows on a tree, bush, vine or plant that is more delicious than a fully ripened and freshly picked strawberry, it is something that I have never had the pleasure of tasting.

A family garden without strawberries is as incomplete as a home without children. No amount of money can buy boys and girls like those you raise yourself. Neither can any amount of money buy strawberries like those you can raise yourself, right in your own garden, picked when and as you want them.

To have fresh strawberries and cream, shortcake, pure jam, pre-serves and canned berries is a luxury enjoyed only by those who own strawberries.

To grow strawberries requires no more experience or work than any other common vegetable and will yield more dollars worth of the best fruit per square foot than any crop grown. Any soil that will grow vegetables or grain will grow strawberries.

I want to call your particular attention to the new American Everbearing Strawberry. This berry has been thoroughly tried out and tested and is a success in every way and it insures a fine crop of strawberries in the fall about corn cutting time.

By all means get a hundred of these and also some of our old standard varieties and raise some of these great berries.

Senator Dunlap

Early Ozark

The very earliest strawberry grown, originated in the Ozark Mountains of Missourl several years ago and is by far the very best extra early variety. The berries are very large and productive and will be ready for picking about June 1st and will continue to bear until about the latter part of that month. They are done bearing before the latest varieties come on the market. The berries are very firm, glossy and have a deep red color. The plants are models of growth, a great deal more vigorous than any other variety. This variety is of the perfect sort and do not need the companionship of any other variety to produce perfect fruit. There is quite a demand for this berry and it should be included in every order for strawberries.

Cat. No. 2690—Price, 25 for 50c; 100 for \$1.50; 500 for \$7, postpaid.

Senator Dunlap

This is known as Dunlap, also as Senator, and is one of the most pop-This is known as Dunlap, also as Senator, and is one of the most popular of all the varieties. Usually begins to ripen the latter part of June and will adapt itself to all kinds of treatment. In the hands of an expert it can be grown to perfection and in the hands of an ordinary grower, it will give about the best returns of any strawberry you can grow. The plants are very strong, healthy growers and will soon cover the ground with plants when once started. The berries are medlum to large in size depending on the treatment they get. They are of a deep, rich, dark red color and have excellent qualities. If part of the plants are thinned out, the yield in quality of the berries will be vastly improved. It is also a perfect variety and will produce perfect fruit when planted alone.

Cat. No. 2691—Price, 25 for 40c; 100 for \$1.15; 500 for \$5.50, postpaid.

New Everbearing Variety Americus

Our Americus Everbearing Strawberries are not only a novelty for the man who wants something his neighbor lacks but is a money maker from a commercial standpoint. The Americus will bear as commercial standpoint. The Americus will bear as many quarts to the acre in the fall as will the common June bearing kind at the regular season. One hundred plants set out in April or May should produce 80 to 100 quarts of berries in the fall of

produce 80 to 100 quarts of berries in the fall of the same year.

This variety originated in Iowa in 1905 and is without doubt the best variety for the average person to grow of the fall bearing kind. It is not a large plant maker but has very healthy foliage and will stand extraordinary hot weather. The flavor is the best of all the fall bearing kind and a shortcake of Americus in September or October is the most attractive dish Imaginable. We have a very large stock of these and are offering genuine Americus plants true to name at an exceptionally low price.

Cat. No. 2695-Price, 25 for 90c; 100 for \$3.00; 500 for \$12.00, postpaid.

Brandywine

This is a variety that has proven very satisfactory to all who have grown it and is therefore in great demand. It is a special good berry for the home garden for reasons of its productiveness, large size, beauty and good quality. It is a medium to late variety and the berries retaining a good size to the last, ripening in succession and every berry maturing fully. It has strong-growing, clean, healthy foliage.

Cat. No. 2692—Price, 25 for 30c; 100 for \$1; 500 for \$4.50, preserved.

postpaid. Gandy

A perfect variety and is the most popular of the late market varieties. We have no hesitation in recommending this as one of the very best late sorts for home or market use. Cat. No. 2693—Price, 25 for 30c; 100 for \$1; 500 for \$4.50, received.

postpaid. Marshall

Readers of the Rural New Yorker will recognize this as the variety grown at Hope Farm by Editor Collingwood and considered the best. In quality it is really considered excellent and if given good care will make a heavy yield; a very large and handsome berry. It needs fair cultivation in order to do its best and does not thrive under neglect. Cat. No. 2694—Price, 25 for 40c; 100 for \$1.15; 500 for \$5.50, postpaid.

Missoula, Mont.

Galloway Bros. & Co.:

The Ever-Bearing Strawberries I got of you last year had berries on them until the snow came, HENRY HUNTSMAN,

1819 Cooper St.

Ann Arbor, Mich., May 18, 1915.

Galloway Bros & Co.:

Just a few lines to let you know that I received the strawberries all right on the 17th. The plants look nice, fresh and green. We thank you very much for your kindness.

MRS. AMANDA KALMBACH.

Iterated lested Seeds

Lilium Tigrinum Splendens

(Improved Tiger Lilly)

The grandest of all the Tiger Lilles. Black polished stem, with very large nodding flowers. Red salmon with dark spots. Three to five feet high; very hardy and highly recommended.

Cat. No. 3008—Large bulbs (postpaid), each,

10c; per doz., \$1. (See Back Cover)

Lilium Tigrinum Splendens Flore Pleno

(Double Tiger Lily)

A very pretty type of Tiger Lily, Flowers double, orange red, spotted with black; when clumped together with the single varieties, they are very effective.

Cat. No. 3009—Price, each, 10c; per doz., \$1; per 100, \$7.

Lilium Candidum

(Madonna Lily)

This is the real old favorite, loved by all because of its spotless whiteness and sweet fragrance. It is sometimes known as the "Annunciation Lily;" it grows three to four feet high and blooms in the open ground in June. When grown in masses they are especially effective. The purity grown in masses they are especially effective. The purity of their snow white flowers against the surrounding green of shrubs, grass and trees is very pleasing. They require no special treatment and will thrive in any ordinary garden soil. They like to be left undisturbed when once planted. One or two bulbs will soon develop into a mass and make a magnificent display.

Cat. No. 3010—Price, large bulbs (postpaid), each, 15c; per doz., \$1.50.

Elephant Ear (Caladium Esculentum)

Caladinn

One of the most effective plants in cultivation, Equally desirable for lawn planting or for massing in borders for a tropical effect. It has enormous rich green leaves, from which it bears its name.

Cat. No. 3011—Large bulbs, 10c each; 3 for 25c.

Order Early

Cannas as Cut Flowers

Cannas

One of the most effective of summer flowering ints. For effectiveness, it is not confined to ly a few weeks but increases in bloom each day, sey can be planted in the open ground as soon all danger of frost is over in the spring and are sure that the list below cannot fail to give isfaction to our customers.

Charles Henderson—Of uniform, compact habit, owing about 3 feet tall. Flowers a deep crimater, with yellow flame at the throat.

It. No. 3022—Price, strong plants, 15c.

Ch: \$1.50 per doz., by express.

ch; \$1.50 per doz., by express.

Propence Vaughan—Height, about 5 feet. A endid variety. The flowers are a rich golden low, thickly dotted with bright golden red. at. No. 3023—Price, 16c each; \$1.60

Cactus Dahlias

Ambassador—Pure white, medium size. Flower held erect on good stem.
Cat. No. 3019—Price, strong plants, 16c r doz., by express.

Queen Charlotte—A beautiful and distinct va-ty. Rich pomegranate red, bordered with sht golden yellow. Height, about 4 feet. t. No. 3024—Price, strong plants, 14c

ch; \$1.40 per doz.

Wived Cannas—Our mixed Cannas contain a glist of choice varieties, such as and including following well known sorts: Scarlet Bedder, rbank, Mrs. Kate Gray, David Harum, etc. [t. No. 3025—Price, strong plants, 10c]

ich; \$1 per doz.

"Lilium Auratum" (See Back Cover) The Golden Rayed Lily of Japan

The most beautiful of all the hardy lilies. The flowers are pure white, thickly spotted and splashed with crimson. Through the center of each petal runs a clear, broad band of yellow. The flowers measure fourteen inches across when fully expanded; one plant will often bear as many as thirty blooms and we have seen one plant actually carry seventy of these magnificent flowers. The Auratum is perhaps the easiest of all the Lilies to cultivate and the most hardy.

Cat. No. 3012—Large bulbs (postpaid), 25c each; \$2.50 per doz.

Lilium Lancifolium Album (See Back Cover)

A pure white lily with a greenish band through the center of each petal. The Speciosums are amongst the most heautiful of the Japanese Lilles, The broad re-curved petals are thickly dotted or banded and the graceful form, brilliant coloring and sweet fragrance makes this class of lily one of the most effective and desirable of the whole lily family.

Cat. No. 3013—Large bulbs (postpaid), each, 15c; per doz., \$1.50.

Lilium Lancifolium Roseum (See Back Cover)

This is a very beautiful lily of the Speciosum type. The rich rose spots on pure white have a very striking effect. When grown in clusters together with the album and rubrum they are charmingly effective. They are perfectly hardy and especially suited for the planting in herbaceous borders and make fine pot plants for the house. Cat. No. 3014—Large bulbs (postpaid), each, 15c; per doz., \$1.50.

Lilium Lancifolium Rubrum

This lily in habit and form resembles in every way the album and roseum except in color. The beautiful large flowers are spotted and splashed with deep, rich crimson upon a white background, giving them a very attractive appearance. A few clumps of this beautiful lily should be grown in every home garden and all the speciosum varieties are fine for cutting.

Cat. No. 3015—Large bulbs (postpaid), each, 15c; per doz., \$1.50.

Dahlias

We strongly recommend these beautiful flowers to our customers for an attractive bedding plant and something that will give a liberal supply of cut flowers. They are also effective when planted among shrubbery. For best results they should be planted early and we have listed only the varieties of real merit and which we are sure will give satisfaction to our customers.

Show Dahlias

Annie Moore—A fine variegated flower of me-um size. Color, a beautiful combination of dlum size. Color, a beautiful combination of cherry pink and white.

INDIAN PINKS

Galloway's Extra Select List of Choicest Flower Seeds

Everybody loves flowers. Flowers are inexpensive and if you select the right kinds are as easy to grow as weeds. There is quite a knack in selecting the right kind of flower seed to produce for you the right effect. Everybody is not familiar with the kind of flower seeds to buy and the quantity to buy to make the most satisfactory, quickest showing and results. There are hundreds of flower seeds offered that when planted do not bring satisfactory results. Some are hard to grow, and some do not make the desired effect after they develop.

If a careful selection is made from our list we guarantee you perfect satisfaction. You can select from it an unlimited range either for color or for beauty, as our selec-tion has been made to satisfy the most exacting lover of beautiful cut bloom.

For flowers all summer long and for all kinds and colors of flowers at all times, be sure and plant Sweet Peas, Hollyhocks, In-dian Pinks, Carnations and more of the old fashioned favorites.

WM. GALLOWAY

Aster

Galloway's Giant Crego

The Largest and Most Beautiful Aster Grown.

The twisted and curled petals give the flower the appearance of a huge flat chrysanthemum. The flowers are very large, often measuring 5 inches in diameter. The strong erect stems average 20 to 24 inches in length. Though the flowers are large they are produced in abundance.

Calliopsis

"Galloway's Golden Crown"

Few annuals are so easily grown and so satisfactory as Calliopsis, and this grand variety we consider one of the best, having large golden-yellow flowers that closely approach the perennial Coreopsis Grandiflora in size and color. Forms compact plants 9 to 10 inches high, with the flowers thrown well above the foliage on strong 18-inch stems.

Cat. No. 1259-Price, per pkt., 10c; 2 pkts., 15c.

Galloway's Rainbow Corn

(Zea Japonica Variegata)

As an ornamental foliage plant this is not only highly effective, but very interesting. It grows about five feet high, quite bushy, the wonderfully variegated leaves being striped with bright green silvery white, rosy-purple, and sulphur yellow. It makes a very pretty dividing line between the vegetable and flower garden, or it may be used in the mixed border.

Cat. No. 1261-Price, pkt., 8c; 2 pkts., 12c.

Cosmidium Burridgeanum, **Orange Crown**

Very handsome new annual, forming elegant, many-branehed bushes of 1½ to 2 feet in height. The flower heads, 1½ to 1¾ inches in diameter, are carried on long slender, but self-supporting stems well above the graceful, linear foliage. Ray florets golden yellow with a broad conspicuous circle of a rich orange around the disc, a pleasing combination of colors. As the plants produce a constant succession of bloom throughout the summer and the flowers last well in water for days, this novelty will prove to be very useful for cutting purposes.

Cat. No. 1263-Price, pkt., 10c; 2 pkts., 15c.

Chrysanthemum

Galloway's Giant Japanese

A mixture of the large-flowering, florists' varieties. These mixtures are the large, autumn flowers used in exhibitions and by florists. They are usually grown from cuttings and do not come true from seed.

Cat. No. 1265-Price, pkt., 10c; 2 pkts., 15c.

Delphinum or Hardy Larkspur

Galloway's Belladonna

The freest and most continuous blooming Hardy Larkspur, never being out of flower from the end of June until cut down by severe frost. The clear turquois blue of its flowers is not equaled for delicacy and beauty by any other flower. Seed sown in early spring will produce plants that will bloom freely through the late summer and autumn. autumn.

Among the best plants for mixed borders, where they make an imposing display with their long spikes of graceful flowers, ranging in color through many shades of blue and others. The foliage is attractive and the plants strong and neat in habit. Perennial Larkspurs grow better than annual varieties; they should be planted further apart. By keeping the plants well watered and the flowers cut, a second crop of bloom may be had.

Cat. No. 1267-Price, pkt., 10c; 2 pkts, 15c.

Galloway's **Everlasting** Flowers Mixed

Large, full, double daisy-like flower heads with prominent centers and stiff overlapping scales. Produced in various shades of bright yellow and scarlet on stems of good length. Desirable as dried specimens and for use in making winter bouquets. For this purpose, the flowers should be gathered when on the point of expanding point of expanding.

Sow early in spring; thin to one foot apart each way. Hardy annual; two to two and one-half feet high.

Cat. No. 1269-Price, pkt., 5c; 1 oz., 35c.

Echinocystis

Japanese Wild Cucumber

The most rapid growing vine we know of. It will reach a height of 30 feet in one scason. To cover a pillar or trellis or to embellish an ungainly tree trunk, fences, unsightly buildings, there is nothing which so completely fills as does this. It is thickly dotted over with pretty, white, fragrant flowers, followed by quantities of ornamental and prickly seed pods.

Cat. No. 1271-Price, pkt., 5c; 1 oz.,

SALVIA

BACHELORS BUTTON

GODETIA

CALLIOPSIS

Choice Flower Seeds Continued

Forget-me-not Galloway's Victoria

A favorite old-fashioned flower, bearing in profusion, especially in Fall and Spring, clusters of dainty blue five-petaled blossoms. It thrives well in the shade or open border, but flourishes best in a moist, shady situation.

Cat. No. 1275-Price, pkt., 6c; 2 pkts, 10c.

Godetia

Galloway's Gloriosa

Galloway's Mammoth Donble Mixed

A magnificent strain of Hollyhocks. The flowers are of the largest size, perfectly double, and grow close together on the stem, forming a mass of the most beautiful flowers equal to camellias. These are undoubtedly the finest double Hollyhocks grown.

Cat. No. 1287—Price, large pkt. (500 seeds), 10c; ¼ lb., 30c; ½ lb., 50c; 1 lb., \$1.00, post-paid. 500 seeds sufficient for 1 row 40 ft. or 2 rows 20 ft.

Cat. No. 1279-Price, pkt., 8c; 2 pkts., 14c.

New Nasturtiums of Unusual Beauty

Variegated Queen, or Tall Variegated Leaved Mixed

Every leaf is variegated with yellow, white and green. Some of the leaves are one-half to two-thirds white and yellow, while others are mostly green, but beautifully striped and blotched. This gives a new and very handsome appearance to the plant. The flowers are of all colors. It comes entirely true from seed. Cat. No. 1281-Price, pkt., 10c; 2 pkts., 18c; 1 oz., 30c.

Variegated Foliage, Queen of Tom Thumbs' Mixed

The colors range from the deep crimson of parent to yellow, buff and spotted; of fine form and of the largest size. Very effective, forming a fine contrast to the silver variegated or cream and green colored leaves of the foliage. Useful for growing as single plants among other flowers, for edging walks, or surmounting walls. Very showy and a decided novelty of most surpassing

Cat. No. 1283—Price, pkt., 10c; 2 pkts., 18c; 1 oz., 30c.

Pansy

manner as to make the flowers appear double. Many of the flowers are curled at the edge, giving them a very striking and pleasing appearance. The beauty, brilliancy and richness of this pansy mixture cannot possibly be surpassed. If you have been disappointed in the past with your pansies, just try a packet of our GOLIATH and you will be delighted.

Cat. No. 1285-Price, 10c per pkt.: 3 pkts., 25c.

Our Great Sweet Pea Offer

Galloway's Masterpiece Mixed

Galloway's Gloriosa

The loveliest of all the Godetia family, producing long spikes with 16 to 18 beautiful deep crimson flowers. They are excellent for cutting. A spike of half-opened buds continuing to develop for a long time if fresh water is supplied each day. A bed of Gloriosa is exceedingly effective, especially when Sweet Alyssum or White Candytuft is grown for a border.

Cat. No. 1277—Price, pkt., 6c; 1 oz., 35c.

Hollyhock

Galloway's Mammoth Double Mixed

Galloway's Mammoth Double Mixed

We have made arrangements with our growers to furnish us with unusually large quantities of Sweet Peas at special prices. This enables us to offer them to our quality. This is not a mixture of the old, common type of Sweet Peas, but consists of all the latest and in this splendid assortment; all small flowering types have been eliminated and only large flowering, long stemmed varieties are included. In this splendid mixture will be found many of the new creations bearing 3 to 4 blooms on a stem.

Cat. No. 1287-Price, large pkt. (500 seeds),

Poppy

Galloway's Giant Peony Flowered, Double

Galloway's Giant Peony Flowered, Double
Positively the grandest and most gorgeous mixture
of giant flowering poppies ever offered ranging in color
from pure snow white to deep purple, the easiest of
easy flowers to grow. Seed may be scattered on the
soil and raked in, the seed germinates rapidly. In two
or three weeks nice sturdy plants will develop. It is
well to make several sowings at intervals to keep up a
succession of bloom. If they come up too thickly the
plants should be thinned out to stand 3 to 4 inches
apart. This will insure best results. For beds or borders, this huge showy poppy is hard to surpass.

Cat. No. 1289-Price, per pkt., 5c; 1 oz., 25c.

Salvia (Flowering Sage)

ZURICH—A splendid dwarf variety, growing about 2 feet high, and is especially valuable on account of being the earliest to bloom, flowering 10 days in advance of any other sort and among the most brilliantly colored of garden flowers and extremely useful for bedding; also valuable for pot culture and cutting. Blooms are borne in long spikes well above the foliage and are of fiery red, continuing in flower a long time. The densely filled llower spikes are often eight to ten inches long and include thirty or more tube-like florets, one to two inches in length. Seed can be sown outdoors after danger from frost is past. Tender perennial, but blooms the first season.

Cat. No. 1293-Price, pkt., 10c; 2 pkts., 18c.

Galloway's Giant Double **Zinnias**

Galloway's Goliath Mixture

The Largest and Handsomest Pausies on Earth
We claim for this superb mixture of pansies that it cannot be beaten by anyone. It is a real record-breaker. The flowers are of a tremendous size and are borne on long stems, making them excellent for cutting. The plants are robust and form compact bushes of round shape and are literally covered with massive blooms of every conceivable shade and color. The individual petals are exceedingly broad and cover each other in such a

Gladioli

EUROPA. The finest pure white Gladiolus. This new variety is of perfect form, produced on strong, stiff, tall spikes, usually bearing from 20 to 25 pure white blooms. The flowers open very rapidly and it is not uncommon to have from ten to twelve of these open at the same time; the formation is very close and compact, making a perfect spike from the time when the first hud opens until the last. Cat. No. 3026—Each, 10c; doz., \$1.10.

MRS, FRANK PENDLETON. A magnificent variety which has won various awards on account of its practicability for cutting, as well as for its beauty. Every bud opens up in water fully and perfectly. Flowers are very large and well expanded, of a lovely flushed salmonink, with blood-red blotches in the throat. Cat. No. 3027—Each, 12c; doz., \$1.35.

SCHWABEN. Yellow Gladioli. The flowers of this striking new Gladolus are of a pure canary yellow, shaded to a soft sulphur yellow when pening; the golden yellow center is blotched with a brilliant brownish zarmine. Flowers open 6 to 8 at one time. About twenty finely-formed lowers are produced on extremely strong stalks. The foliage is large and vigorous, of a beautiful dark green, which, combined with the brilliant sulphur-colored flowers, makes it very effective for groups of beds. Cat. No. 3028—Each, 10c; doz., \$1.10.

PINK PERFECTION. Very large blooms of fine form, long spikes of a beautiful shade of apple blossom pink, similar in color to Carnadom Enchantress. Cat. No. 3029-Each, 12c; doz., \$1.35.

WAR. A Giant Red Gladiolus. Undoubtedly the largest of all laddolus, showing from 4 to 6 open flowers at one time. Color, a deep lood red, shading to crimson.

Oat. No. 3030—Each, 12c; doz., \$1.35.

Galloway's **Choicest Named Varieties**

CULTURE-Plant in any fairly rich soil except stiff clay, a sandy loam, retentive of moisture preferred, but it should be well drained. Soil recently in grass is, perhaps, the best. Avoid contact with manure which is fresh. If the same soil be used for several years it is recommended that ashes (wood) and old manure be plowed in the Fall previous. If the soil be clayey or stiff put sandy loam in the furrow when planting. Plant in full exposure to the sun but do not plant among the roots of trees or against the south side of a house.

AUGUSTA. Lovely pure white with blue anthers. One of the most attractive white varieties. Cat. No. 3031—Each, 5c; doz., 50c; 100, \$2.75.

WILLY WIGMAN. Delicate pink tinted cream, with large carmine red blotch. Cat. No. 3032—Each, 10c; doz., \$1.00; 100, \$5.75.

NIAGARA. Of American character, but somewhat larger; rich cream color deepening to canary yellow on lower petals. A faint carmine blush at tips of petals and streak at throat, with purple stamens and carmine Stigmas, make a combination of exquisite beauty and attractive-

Cat. No. 3033-Each, 8c; doz., 80c; 100, \$4.75.

GOLDEN KING. (See back cover.) Golden King resembles its parent, Golden Queen, but is much larger in flower and habit of growth. The color is a bright glistening yellow, with a crimson blotch in the throat. This variety produces a large spike and from 21 to 24 flowers on a plant are common. This variety was awarded the highest bonors by the National Gladiolus Society of England.

Cat. No. 3034—Each, 10c; doz., \$1.00; 100, \$6.00.

Cat. No. 3034—Each, 10c; doz., \$1.00; 100, \$6.00.

AMERICA. (See back cover.) Without an exception America is the most beautiful and useful Gladioli yet introduced. Strong and healthy, with luxuriant dark green foliage. Flower spike two to three feet long, erect with a great number of large spreading blossoms. Color exquisite soft lavender pink, the same as seen in the most beautiful Cattleva Orchids. No color like it in any other Gladioli, none so beautiful. Cat. No. 3035—Each, 5c; doz., 40c; 100, \$2.50.

PANAMA. A new seedling of America which resembles the parent in every way except that it is a much deeper pink. A grand variety which evokes words of praise wherever exhibited, Spike very long with flowers large and well arranged. Many awards.

Cat. No. 3036—Each, 8c; doz., 70c; 100, \$4.25.

INDEPENDENCE, All things considered, the best light red in market under name. Strong, upright grower, clean foliage, large cherry flower in perfect shape, marked white and maroon in throat, and on good spike. Stem always straight. Fine by artificial light.

Cat. No. 3037—Each, 6c; doz., 45c; 100, \$3.00.

IIALLEY. Delicate salmon pink predominates with a slight rosy

HALLEY. Delicate salmon pink predominates with a slight rosy age, lower petals have a creamy blotch with a bright red stripe in

No. 3038-Each, 6c; doz., 45c; 100, \$3.00.

Cat. No. 3038—Each, 6c; doz., 45c; 100, \$3.00.

MRS, FRANCIS KING. A new variety which excites great comment and admiration. both for size of flower and beauty; the color of the flower is a light scarlet; the flowers are very large, usually measuring from 3½ to 4 inches in diameter.

Cat. No. 3039—Each, 5c; doz., 40c; 100, \$2.50.

PRINCEPS. (The Amaryllis Flowered Gladiolus.) Rich crimson with white blotches across the lower petals. The flowers open out wide and perfect and are of monstrous size.

Cat. No. 3040—Each, 8c; doz., 70c; 100, \$4.25.

BRENCHLEYENSIS. (See back cover.) This variety is so well known and appreciated that we need not here enter into any lengthy description except to say that it is the most showy of all the Gladioll. Its immense flower spike of dazzling scarlet attracts the attention and admiration of all. This stately flower grown in conjunction with Hyacinthus Candicaps and Delphiniums make a very fine display, the brilliant scarlet setting off the white and blue shades of the Hyacinthus and Delphinium to great effect.

Cat. No. 3041—Each, 5c; doz., 40c; 100, \$2.50.

EMPRESS OF INDIA. A glorious rich dark mahogany red uniquely

EMPRESS OF INDIA. A glorious rich dark mahogany red uniquely

EMPRESS OF INDIA. A glorious rich dark management veined.

Cat. No. 3042—Each, 8c; doz., 80c; 100, \$4.25.

BARON HULOT. (See back cover.) Flowers of medium size on good, straight spikes. In color a dark violet, bordering on purple. The finest of its color and a very attractive and showy variety.

Cat. No. 3043—Each, 5c; doz., 50c; 100, \$2.75.

KUNDERD'S RUFFLED GLORY. A new departure in Gladiolus form, a recently developed strain having distinctly and beautifully fluted or ruffled petals. This "Glory" variety is of good size in flower and spike, with long stalks. Color, delicate cream pink, with a crimson stripe on each lower netal.

Cat. No. 3044—Each, 8c; doz., 80c; 100, \$4.50.

Peonies!

Galloway's Famous First Prize Peonies

Progressive Everbearing Strawberries

See illustration inside back cover

This everbearing strawberry, which is absolutely the best everbearing variety on the market, originated in 1908 by Harlow Rockhill of Iowa.

The plants are very similar to the Senator Dunlap, strong, healthy and very hardy, and is a good plant maker.

We find the Progressive to be the very best berries on earth, as they are of the highest quality, very delicious, bright red from center to circumference, and a splendid keeper on the vine or in the box.

The fruit is good medium sized, blossoms strongly staminate, and every bloom makes a perfect berry. The blossoms and fruit are well protected by the foliage—a very valuable feature, as it takes hard freezing to injure the fruit.

the fall months, when the market is bare of any other kind of berries. It is the most perpetual of all the fall-bearing strawberries, giving good crops for over three months in the fall when the weather is favorable, and even the driest weather Cat. No. 2085-Price, 75c, per doz.; 25 for \$1.20, postpaid; will produce a good crop of berries during the fall months. \$3.50 per 100; 500 for \$15 by express.

Progressive Strawberries

The fruit sells very readily at 25c to 35c per quart during Many plants produce over a quart of berries between August 1st and November 1st.

> Any of our customers wanting the best in the line of everbearing strawberries we recommend this variety as the very best in existence.

Giant Himalaya Berry

This wonderful berry originally came from the cold regions of the Himalaya Mountains, and is a berry that is becoming more popular every year. Its habit of growth is that of a grapevine, making a growth of from 25 to 40 feet in a season, and can be trained on a trellis or arbor.

There is no berry in existence like it, as it begins to fruit in July and continues to produce fruit until October, and the plants grow larger and produce more fruit each year. They do well in the hot, dry sections of the South and are also making wonderful records in the central and northern states.

The fruit is large, black in color and a splendid keeper, as this fruit was shipped 1,000 miles last year and arrived in perfect condition. It is unsurpassed for eating, picked fresh from the vines, cooked, canned or preserved in any form.

Cat. No. 2086-Price, strong canes, 15c each; 3 for 35c, postpaid; by express, 10c each; \$1 per doz.

Climbing **American Beauty**

The grace and airiness of this wonderful rose will appeal to all lovers of roses. It is a seedling of the famous Amer-

ican Beauty and most undoubtedly has a great future.

It possesses the same wonderful color, size and fragrance of the parent plant, with the advantages of its climbing habit.

It has good foliage, withstands mildew well and has even better blooming qualities than the American Beauty, which, combined with its extreme hardiness, makes it one of the most valuable of climbing roses.

Cat. No. 2088-Price, 2-year-old field-grown plants, 75c each; 2 for \$1.25, postpaid.

Everblooming Crimson Rambler

Most Wonderful of all Ramblers

(Always in Bloom)

It has long been the ambition of every rose grower to produce an everblooming type of the famous Crimson Rambler, and this has been done in a most complete manner, in the production of this marvelous new rose.

It is a rampant climber, and bears continuously enormous clusters of brilliant crimson flowers from early spring till Absolutely hardy everywhere and retains the bright, fresh green of its foliage all summer.

We cannot recommend this NEW ROSE TOO HIGHLY, and we are sure it will give to everyone unbounded satisfaction.

No matter how pretentious your home, or how humble, this rose will beautify it, with its magnificent clusters of brilliant crimson flowers, which will fairly glow with their brilliancy of color all summer.

Cat. No. 2089-Price, 2-year-old field-grown plants, 85c each; 3 for \$2, postpaid.

Plum Farmer (Black Raspberry)

Best for Home and Market

The Plum Farmer is the best Blackcap Raspberry for home or market ever introduced. It ripens very early, berries large, thick meated, juicy and very sweet. They pick very easily and stand up and carry well. In quality, firmness and productiveness it is all that can be desired either by wholesale growers or for the home garden.

The plants are hardy and vigorous, the berries large, good in color and quality. It certainly should be given a trial in all commercial plantations.—(From report of Geneva Experimental Station.)

Cat. No. 2087-Price, 20c each; 3 for 50c, postpaid; by express, 15c each; \$1.50 per doz.

The World's Most Famous Apple

The new popular Delicious apple originated here in Iowa—on the Jesse Hiatt farm in Madison County, near Peru—a quarter of a century or more ago, and since its introduction in 1895 has been grown in nearly all parts of the United States with wonderful success. From the Atlantic to the Pacific, from the Great Lakes to the Gulf, Delicious has been planted by the thousands of acres and has unquestionably "made good." We heartily recommend the planting of this most cosmopolitan apple to our host of friends and customers all over the country. country.

over the country.

Delicious, in our opinion, has not a peer. Its bright, clear red color, suffused and striped with crimson over yellow, makes it one of the most beautiful of all apples. The flesh is tender and firm, with rich, highly flavored juice. Not a "sweet" apple, nor is it sour, but its delicious sub-acid flavor appeals to the old and young alike. No written description can really give a fair idea of its wonderful quality—it must be seen and tasted to be appreciated. A splendid shipper and long keeper, Because of its origin in the cold climate of Central Iowa, Delicious is essentially a hardy apple in tree. Even north of Iowa and in Canada,

Delicious has proven hardier than McIntosh, Northern Spy and Wealthy. There is no section in which it will not grow. The tree is one of the strongest and thriftiest growers in the orchard. Bears young, abundantly, and is very resistant to orchard pests—absolutely aphis proof, and is never known to blight.

Delicious is a remarkable profit-producer. When these apples first went on the market they sold right along at from \$5 to \$6 per bushel box. Apple men at that time said that such high prices would soon be a thing of the past. But buy Delicious now, in Chicago, for instance, and you will pay just about the same for them. The supply, although it is increasing every year, has never equaled the demand, and is not likely to for many years to come. The better the apple becomes known the stronger the demand.

Delicious should head your apple list by all means. Plant an orchard of this sort and cash in on its popularity. Our hardy Iowa-grown Delicious trees are especially adaptable to northern planting—they make the right kind of an orchard foundation.

Stayman Winesap

The best and largest apple of the Winesap famlly. Originated by the late Dr. J. Stayman, of Kansas. Resembles old Winesap in colordark, rich red, striped with crimson. Much better quality than Winesap. Flesh tinged with yellow, firm, crisp, fine grained, very juicy, sub-acld flavor. Where an apple of the Winesap type is wanted we advise the planting of Stayman Winesap. Hardy and dependable every time. Wlll grow anywhere. A splendid keeper. Commands high prices on the market. Ranks close to the famous Delicious as a seller. Should be planted in large quantities for commercial purposes. Adapted to a wide range of climates. Profitable from coast to coast. The tree a strong grower, seldom affected by drought. Stayman Winesap, Delicious, Black Ben and Klng David make a good apple com-

bination for profit. They go a long way toward meeting the demand for "qual-ity" apples so noticeable at this time, especially in the larger cities. Plant an orchard of Stayman Winesap—it will pay

Black Ben

Black Ben

This big, handsome, dark red apple—"the barrel filler of the orchard"—is fast gaining in popularity. Next to Delicious it is probably the most profitable apple grown. Much better in cvery way than old Ben Davis, Gano and apples of that type. Originated in the Ozark Mountains and is absolutely hardy and dependable. Bears young, every year and is enormously productive. That noted authority, E. P. Powell, says—"Superb in color, size and keeping qualities; while in flavor it is totally unlike Ben Davis. It is a great commercial fruit." Brings around \$3 per box when Ben Davis will not bring \$3 per barrel. Flesh firm, white juicier than Ben Davis—a fairly good eating apple and a splendid cooker. Tree growth similar to Ben Davis but stronger, hardier, thriftier and resists drought much better. Foresighted orchardists who, a decade ago, dropped Ben Davis entirely and planted Black Ben instead, are now making three times as much as the much who are still growing that old sort. Our advice is to cut if tout of your planting list, and to plant Black Ben by the thousands.

King David

This beautiful apple of the Jonathan type is reating a sensation wherever known. Somewhat resembles Jonathan but is larger and better quality. Solid, deep, rich red with crimson markings. Flesh firm, crisp, juicy, tinged with yellow. King David, an early winter sort, keeps and ships well. Brings good prices because of its wonderful beauty and Demand always much stronger than quality. the supply. More of them should be grown. Tree hardy, a thrifty grower, bears young, excellent to plant either as "filler" or "permanent." A late bloomer, stands frost better than most apples. remarkably free from blight. Apples stick tight to the tree when Jonathan drops badly. King David does well in all the Central States, has made a good record in the East, becoming popular all over the country. A prize winner in the Southwest. Plant King David along with the other specials on this Better money-makers cannot be found.

All have been tried and stood the test. They are now much sought after by the apple consuming public. It naturally fol-lows that they are the most profitable

apples grown.

The Following Varieties Grow from Tips, Not from Suckers CARDINAL—Fine quality, dark red, or almost purple berry; lasts a long season, very fine for family use. One of the most vigorous growers and the hardiest of all raspberries. In fact, it is considered one of the best of all purple berries. The best proof of this is that most of the berry growers, after once getting the Cardinal, discard most all other purple varieties.

GREGG—Known for many years and has proven the leader in the black caps for market. It is held up well to the standard, and is known by more people than other raspberries on the market. In many places the name itself sells the berry. The berries are large, showy and black, firm, and ship well. The plants are hardy and vigorous growers. Mid-season is ripening.

Cat. No. 2134—25 plants for 90c; 100 plants for \$2.00; 1,000 plants for \$19.00; by express.

HAYMAKER—Very large, firm berry, good shipper, and one of the best for home use. A lighter red than the Cardinal, very hardy plants, and not so strong a grower, but a good crop may be depended on each year.

Cat. No. 2135—25 plants for 75c; 100

plants for \$2.00; 1,000 plants for \$17.00; by express.

KANSAS—Berrics black, good size, good quality, and firm. Plants are strong, vigorous growers, will stand extremes of drought and cold weather, and still bear large crops. A variety that will grow with less care than any other variety we are offering of the tlp raspberry kinds. The fruit has such a handsome appearance that it always brings a high price on the market.

Cat. No. 2136—25 plants for 50c; 100 plants for \$1.90; 1,000 plants for

\$14.00; by express.

BLOWER—Claimed to be the hardiest, most productive and of the finest quality and to bring the very nighest market price. Large jet black berries and has very good shipping properties.

Cat. No. 2138—Price, 12c each; 15 for 75c; 100 for \$6.00, by express.

EARLY HARVEST—Best early blackberry in culation. Needs some protection in winter.

Cat. No. 2139-Price, 10 plants for 40c; 100 for \$2.90; 1,000 for \$18.75, by express.

ELDORADO—This is a comparatively new variety and has proven itself to be the best of all varieties under cultivation. The best proof is the berry growers, who after once growing the Eldorado will diseard almost all other varieties they have. It has no equal in hardiness, productiveness, flavor or shipping qualities. We recommend this variety over all others.

Cat. No. 2140-Price, 10 plants, 65c; 100 for \$3.00; 1,000 for \$19.50, by express.

Gentlemen:

The St. Regls Ever-Bearing Rasp-berries are doing nicely, and thank you for the extra one.

E. D. McGINNIS MATTOON, ILL.

May 21, 1915

Gooseberries

One of the hardiest of the bush fruits.

The best results are obtained by planting gooseberries in moist, but not soggy, clay loam, but they will do reasonably well in any well-drained soil if they are well fertilized once each year. The gooseberries bear most freely on two and three-year-old wood. Therefore, the aim would be to keep a continuous supply of vigorous shoots. Prune freely to encourage upright growth. We offer all first class two-year-old plants.

DOWNING-One of the most favored of all gooseberries for family use, and a very good market berry. Medium-sized fruit; flesh soft and juicy. This variety is planted more extensively than any other kind by the fruit growers

Cat No. 2150-Price, 18 cents each; 6 for \$1.00; 100 for \$15.00,

HOUGHTON-Very productive, good and vigorous grower, an old and reliable variety, very hardy. Cat. No. 2151-Price, 16 cents each; 6 for 90 cents; 100 for \$13.50.

INDUSTRY—One of the best-known and most successful of the English varieties yet introduced. Berries very large, of excellent flavor, pleasant and rich, dark red color when fully ripe. Bush strong, upright grower, an immense cropper, less subject to mildew than most of the foreign varieties.
Cat. No. 2152—Price, 20 cents each; 6 for \$1.10; 100 for \$17.

JOSELYN—Of English type, very good grower, large-sized berries, very productive, affected somewhat with mildew through America.

Cat. No. 2153—Price, 25 cents each; 6 for \$1.30; 100 for \$20.

SMITH'S IMPROVED—Bush moderately vigorous and very productive; fruit large, pale yellow and thin skin; excellent quality for preserves or cooking.

Cat No. 2154—Price, 14 cents each; 6 for S3 cents;

Cat No. 2154—Price 100 for \$10.25.

urrants

Experience teaches that a cool, moist soil is best adapted to the growth of Currants, Strong, moist loams, with a considerable mixture of clay, are preferable. Even well drained stiff clay will give good results.

The pruning is simple, but very important. The younger the wood, the finer the fruit, It is absolutely necessary, however, that a fair supply of the old wood be left in order to insure productiveness. No wood over three years old should be allowed to remain. Plants should be set in rows if for wide and about three fort over in the year. 2.500. six feet wide and about three feet apart in the row. can be planted to the acre.

Dewberries

The Dewberry is a trailing or vine form of the blackberry. May be trained to run over stone piles, over rough embankments, or rocky hillsides, and sometimes produces a very large crop of fruit annually over land where no other crop could be grown. The fruit is very large, fine quality and always at a premium with the commission men or the open market. Where they are planted so they can be cultivated, they should be plowed, and in the winter a coarse litter of mulch thrown over them. The vines will grow up through this and keep the fruit from the ground. We are only offering one variety, which is considered the best of all Dewberries now in cultivation.

LUCRETIA DEWBERRY-Fruit of high quality and very large, often from one to two inches long and one inch in diameter. Perfectly hardy and a great bearer.

Cat. No. 2176—Price, 10 plants for 50 cents; 100 plants for \$3.50; 1,000 plants for \$24.00.

Fay's Prolific Currants

Landscape Gardening Improve Your Grounds

Look over these pictures and see the beautiful effects that can be produced by proper planting of hardy trees and shrubs. Everyone loves nature and landscaping is only the art of imitating nature. We are printing these pictures to give you an idea as to what can be done when you know what, where, when and how to plant.

Free

If you are interested in planting your grounds we will be very glad to mail you upon application our booklet entitled, "The Gateway to Beautiful Grounds;" or we will be glad, upon receipt of sketch from you by mail, showing the location and size of grounds, buildings, etc., to draw up a landscape plan which will give you information as to the proper varieties to plant and where to plant them. We make a specialty of landscape gardening and our plans are drawn up by expert landscape gardeners and are worth a great deal of money to anyone desiring to do this class of work. Remember this work is free and if you want full information as to these plans send for our booklet, "The Gateway to Beautiful Grounds."

This shows an attractive arrangement of a side yard with hydrangeas in pots in the foreground. We can plan a display of this kind where the grounds are small and where a great many flowers are desired.

REMEMBER To send to us for information about laying out your grounds

Trees of the right sort should not be overlooked in any planting. This cut shows a photograph of the American Linden. When allowed to grow naturally they make a very beautiful effect and should not be trimmed only where necessity requires.

This photograph shows a park scene and will give you an idea of the natural effect produced by low growing ornamental shrubbery. This class of plants planted about your house and grounds will transform them to a place of beauty.

Spirea Van Houttei Are Great Flowering Shrubs. (See page 83)

Ornamental Shrubs

Just a little peep at Nature will reveal the fact that there is always a greater or less amount of shrubbery to be found in every grove, forest and along the banks of streams, provided that man has not been there with his destroying hand. Likewise, a well-planted lawn or park is not considered complete unless there is some shrubbery planted along the borders, drives, walks and around the foundations of the buildings. By carefully studying the surroundings of a place, certain features may be effectively brought into prominence, unsightly objects screened, and a great amount of comfort and coziness secured by a judicious arrangement of the shrubbery and perennials. It is an impossibility to arrange a general plan for all places, because each place is a law unto itself. One thing to be borne in mind, in the planting of a lawn, is to do it in such a way as to convey the idea of as much space as possible. It is well to study the varieties of shrubbery that are native to the given locality and plant such of those species together with those varieties that fit into the landscape. Avoid isolated specimens. A much better effect can be obtained by grouping the different varieties, planting the taller species in the background and the lower ones towards the front. Most varieties of shrubbery are easily cultivated. However, it will always prove best to have the whole border dug or plowed up to a depth of from one to two feet, give it a liberal supply of manure—preferably from a cow stable—and mix it thoroughly with the soil. Plant in the fall after the stock has thoroughly matured or in the spring before the new growth has commenced. There are so many varieties of beautiful shrubs that, by carefully selecting the varieties, a succession of bloom may be had throughout the season until after frost. If undecided as to what to plant for a given space, write us and we will be only too glad and willing to offer suggestions as best we can.

 ${\bf ALMOND}$ (Double Red). The flowering almond of our gardens giving a profusion of attractive bloom in early spring.

Cat. No. 2300-Price, 18 to 24 in., 18c; 3 for 53c; 2 to 3 ft., 29c; 3 for 85c; by express.

ALMOND (Double White). Similar to the above, except the flower is white.

Cat. No. 2301-Price, 18 to 24 in., 18c; 3 for 53c; 2 to 3 ft., 29c; 3 for 85c; by express.

BARBERRY, COMMON. Berberis Vulgaris. A handsome and hardy ornamental shrub, very attractive in the spring with its golden yellow flowers and bright green foliage, and in the fall its bright scarlet fruits, which remain on most all

Cat. No. 2302—Price, 18 to 24 in., 19c; 3 for 57c 2 to 3 ft., 31c; 3 for 91c; by express.

BARBERRY, PURPLE. Berberis Vulgaris var. Atro-Purpurea. Similar to the common barberry, but more effective with its purple, colored leaves. Very good for massing with other plants. Cat. No. 2303—Price, 18 to 24 in., 21c; 3

winter.

for 61c; 2 to 3 ft., 34c; 3 for 95c; by express.

BARBERRY, JAPANESE. Berberis Thunbergii, This barberry, introduced from Japan, is one of the most valuable of the species. It is especially desirable because of its low dense, horizontal growth; its large, brilliant, red fruits, which remain fresh until the following spring, and for its bright fall colorings. It is quite hardy and will endure partial shade. Especially valuable for borders of walks or drives and for massing.

Cat. No. 2304—Price, 12 to 18 in., 19c; 3 for 57c;

2 to 3 ft., 31c; 3 for 91c; by express.

BUCKTHORN. Rhamnus Cathartica. A hardy, ornamental shrub or small ree, growing to about 12 feet in height, and usually thorny. The inconspicuous greenish flowers appear in clusters shortly after the leaves, and are followed by black berries.

Cat. No. 2305—Price, 18 to 24 in., 22c; 3 for 64c; 2 to 3 ft.,

36c; 3 for \$1.04; by express.

CORAL BERRY. Indian Currant. Symporicarpus Vulgaris. A more compact bush than the Snowberry. The fruit is dark red and remains on until ate in the winter.

Cat. No. 2306—Price, 18 to 24 in., 21c; 3 for 61c; 2 to 3 ft.,

34c; 3 for 95c; by express.

CORNUS SANGUINEA. Red-Twigged Dogwood. A handsome shrub growing from 10 to 12 feet high, with purple or dark blood-red branches. Flowers greenish-white in dense cymes. The fruit is black.

Cat. No. 2307—Price, 18 to 24 in., 20c; 3 for 58c; 2 to 3 ft.,

34c; 3 for \$1.01; by express.

A Specimen Plant of "Deutzia Lemoinei." (See page 82)

Hills of Snow (Hydrangea Arborescens) (See below)

HIGH BUSH CRANBERRY—See Viburnum Opulus.
HIGH BUSH CRANBERRY—See Viburnum Opulus.
HIJDRANGEA PANICULATA GRANDIFLORA—This is the best known form of the Hydrangea. A hardy, ornamental shrub to 10 feet with dense globose head. The large white flowers appear in August and September. The sterile flowers changing later to pink and brown. Cat. No. 2314—Price, 18 to 24 in., 24c; 3 for 78c; 2 to 3 ft., 40c; 3 for \$1.18; by express.

Hills of Snow (Hydrangea Arborescens)

This is a wonderful addition to the summer flowering shrubs and will produce finer and more flowers during July and August than any other shrub grown. They produce magnificent large heads, covering the entire bush and attracting the attention of everyone. The immense flowers are so conspicuously white and imposing that they can be used as single specimens, as cut flowers, or in groupings. The shrub is of an upright habit, with large leaves of a deep green color, and is one of the most hardy of plants. It does well in most soils and a 4-year-old plant has been known to produce 126 perfect blooms at one time. Be sure to order a few of these wonderful shrubs. Cat Xo 1310—18 to 24 in plants 40c each; 3 for \$1.00. Cat. No. 1310—18 to 24 in. plants, 40c each; 3 for \$1.00, by express.

KERRIA JAPONICA (Globe Flower, Japanese Rose)—One of the first shrubs brought from Japan. It grows 4 to 8 feet high with numerous short branches, spreading stems. Attractive in winter for its light green branches, in June, when its yellow flowers appear in greatest abundance, in November when its leaves are a clear yellow, and is not unattractive throughout the year. It is a refined plant and deserves free use in the ornamental border. Not thoroughly hardy in all situations in the Northern States. It grows in any good garden soil,

Cat. No. 2315—Price, 18 to 24 in., 20c; 3 for 58c; 2 to 3 ft., 30c; 3 for 89c; by express.

LONICERA ALBERTA—A small shrub with slender branches, rigid and spiny in high altitudes. The rosy pink, fragrant flowers are borne on slender and erect stems. May and June.

Cat. No. 2316—Price, 18 to 24 in., 18c; 3 for 53c; 2 to 3 ft., 36c; 3 for \$1.07; by express.

LONICERA TARTARICA (Upright Honeysuckle)—This is one of the oldtime favorite shrubs. It attains about 10 feet in helght, and is extremely easy to cultivate. The pink white or cream colored flowers are produced in pairs. The upper lip is deeply divided and

Cat. No. 2317—Price, 18 to 24 in., 20c; 3 for 58c; 2 to 3 ft., 30c; 3 for 89c; by express.

LONICERA TARTARICA VAR. ALBA. This is similar to the above, excepting that flowers are pure white and larger. Cat. No. 2318—Price, 18 to 24 in., 22c; 3 for 65c; 2 to 3 ft., 28c; 3 for 83c; by express.

MOCK ORANGE-See Philadelphus Coronarius,

OLIVE RUSSIAN (Eleagnus Angustifolia)—A highly ornamental shrub with handsome silver green foliage that makes a very effective contrast to the darker greens. A shrub or small tree to 20 feet, very hardy and well adapted to planting in the Northwest. Useful and beautiful for hedge.

Cat. No. 2319—Price, 18 to 24 in., 19c; 3 for 59c; 2 to 3

ft., 34c; 3 for 98c; by express.

Shrubs—Continued

CORNUS ALBA VAR. SIBERICA (Siberian Dogwood)

—A tall shrub with bright coral-red branches. The small white flowers, followed by bluish berries, making them very ornamental, even after the flowers are gone.

Cat. No. 2308—Price, 18 to 24 in., 20c; 3 for 58c; 2 to 3 ft., 34c; 3 for 98c; by express.

DEUTZIA GRACILIS—A handsome shrub, about three feet high, with slender, often arching, branches. A neat little shrub that blooms in May, wreathing its branches in pure, white flowers. Valuable for shrubberies or for foreing.

Cat. No. 2309—Price, 12 to 18 in., 19c; 3 for

54c; 18 to 24 in., 30c; 3 for 89c; by express.

DEUTZIA PRIDE OF ROCHESTER—A showy and early large flowering sort that blooms in May before the others. Grows 6 to 8 feet high. White flowers large and double. One of the best of the Deutzias.

Cat. No. 2310—Price, 18 to 24 in., 22c; 3 for

64c; 2 to 3 ft., 28c; 3 for 83c; by express.

DEUTZIA LEMOINEI—Spreading shrub to 3 feet in height. Its pure white flowers appear in broad panicles. A very desirable shrub, more vigorous, and with more showy flowers than some of the other forms. Excellent for forcing. Very hardy. Cat. No. 2311—Price, 18 to 24 in., 20c; 3 for 59c; 2 to 3 ft., 35c; 3 for \$1.02; by express.

ELDER, GOLDEN (Sambucus Canadensis var. Aurea) A beautiful type of Elder with very large golden —A beautiful Cat. No. 2312-Price, 18 to 24 in., 19c; 3 for 55c; 2 to 3 ft., 30c; 3 for 89c; by express.

FORSYTHIA VIRIDISSIMA—Shrub to 10 feet with erect, green branches. Leaves very dark green, 3 to 6 inches long, flowers about 1 inch long, twisted lobes of bright, greenish-yellow.

Cat. No. 2313—Price, 18 to 24 in., 22c; 3 for

64c; 2 to 3 ft., 34c; 3 for \$1.00; by express.

A Spray of Our Purple Lilac (See page 83),

Great Bargain

This photograph represents a planting of hardy shrubs which will give a succession of flowers for all the different seasons and will assist in the beautifying of your grounds. Why not put this planting around the foundation of your or along the side of your lot? It will beautify your grounds and increase in beauty year after year. Specifications for above planting are as follows:

PHILADELPHUS LEMOINE. A graceful shrub with slender, arching ranches. The blossoms appear in 3 to 7-inch short racemes, very swect scented.

Dat. No. 2323—Price, 18 to 24 in., 20c; 3 for 59c; 2 to 3 ft., 34c; 3 for 89c; by express.

PHILADELPHUS CORONARIUS. Mock Orange. This is not quite as showy as some of the other species and of somewhat stiff habit, but lellclously fragrant.

Lat. No. 2324—Price, 18 to 24 in., 21c; 3 for 61c; 2 to 3 ft..

B6c; 3 for \$1.06; by express.

PHILADELPHUS CORONARIUS VAR. AUREUS. Similar to the above variety, except the foliage has a beautiful golden color.

Dat. No. 2325—Price, 18 to 24 in., 20c; 3 for 58c; 2 to 3 ft., 34c; 3 for 98c; by express.

SNOWBALL, COMMON. See Viburnum Opulus Var, Sterilis.
SNOWBALL, JAPANESE. See Viburnum Tomentosum var. Plicatum.
SNOWBERRY. Waxberry. Symphoricarpus. Racemosus. A perectly hardy shrub from 2 to 6 feet high. These little American plants
re excellent for massing in the lower parts of bed or borders. They
full thrive in almost any garden soil from heavy clay to dry, gravely
anks. The rose-colored flowers appear in loose, often leafy racemes,
uring July and August. The white waxy-like berries
emain on until late in the season.

Dat. No. 2326-Price, 18 to 24 in., "1c; 3 for 61c; 2 to 3 ft., 35c; 3 for 11.03; by express.

QUINCE, JAPAN. Cydonia Japonica. A ommon garden form, growing from 3 to feet, with spreading, spiny branches. The carlet-red flowers appear before the leaves, ind are followed by globular fruits from ½ to 2 inches high, yellowish-green.

Vat. No. 2333-Price, 18 to 24 in., 100c; 3 for 58c; 2 to 3 ft., 34c; 3 for 11.00; by express.

SYRINGA (Lilacs). The lilacs are among the most popular and ornamental of the lowering shrubs, and no garden or park is emplete without a collection of them. forme varieties are very fragrant, while others are scentless.

KINDS OF LILACS

JOSIKAEA. Hungarian Lilac. Violet owers and shining, dark green foliage. aluable for late blooming.

Vat. No. 2334—Price, 18 to 24 in., 1c; 3 for 61c; 2 to 3 ft., 32c; 3 for 5c; by express.

GEANT DES BATTAILLES. A beautiful nade of single bluish lilac.

(at. No. 2335—Price, 18 to 24 in., 12c; 3 for 64c; 2 to 3 ft., 36c; 3 for 1.07; by express.

LUDWIG SPATH. A single, dark purple secles, with very large panicles; the best of the dark varieties.

(at. No. 2336—Price, 18 to 24 in., oc; 3 for 58c; 2 to 3 ft., 30c; 3 for 19c; by express.

SPIREA THUNBERGII. Five feet. A very graceful shrub, early flowering. The slender arching branches, clothed with feathery, bright green foliage, turning late in the fall to orange and scarlet. Almost hardy, but tins of branches are sometimes killed by severe cold. The pure white flowers, about one-third inch across, appearing in April and May. Cat. No. 2328—Price, 18 to 24 in., 22c; 3 for 64c; 2 to 3 ft., 30c; 3 for 89c; by express.

SPIREA BILLARDII. A shrub to 6 feet in height with oblong leaves, usually gravish beneath, at least when young. Flowers are bright pink on 6 to 8 inch long tomentose panicles, usually rather narrow and dense. July and August.

Cat. No. 2329—Price, 18 to 24 in., 21c; 3 for 61c; 2 to 3 ft.,

33c; 3 for 97c; by express.

SPIREA PRUNIFOLIA. A graceful shrub, 6 feet high, with slender, upright branches. The ovate leaves are 1 to 2 inches long. Flowers are pure white born on stender pedicles in 3 to 6 flowered umbels. Blooms in May. Cat. No. 2330—Price, 18 to 24 in., 22c; 3 for 64c; 2 to 3 ft., 32c; 3 for 94c; by express.

SPIREA VAN HOUTTEI. This is one of the most beautiful, or perhaps the most beautiful of the early blooming Spirea, and is quite hardy. It grows to a height of 6 feet, with arching branches that are completely covered with pure white flowers in May. Very effective when planted as a hedge.

Cat. No. 2331—Price, 18 to 24 in., 18c; 3 for 52c; 2 to 3 ft.,

33c; 3 for 98c; by express.

Mock Orange. See Philadelphus Coronarius on this page

Galloway Brothers & Company, Waterloo, la.

Shrubs (Continued)

VIBURNUM DENTATUM. Arrow Wood. A gorgeous, upright native shrub, thriving best in moist soil. It is especially hardy, doing well from New Brunswick to Minnesota. It blooms in May or June, followed by black fruits.

Cat. No. 2338—Price, 18 to 24 in., 20c; 3 for 58c; 2 to 3 ft., 30c; 3 for 89c; by express.

VIBURNUM LANTANA. Wayfaring Tree. This is a hardy shrub, especially for dry situations, and limestone soil. The large, white flower-clusters open in May and June and are followed by red fruits. The foliage is particularly soft and heavy.

Cat. No. 2339-Price, 18 to 24 in., 21c; 3 for 61c; 2 to 3 ft., 32c; 3 for 95c; by express.

VIBURNUM MOLLE. Similar to the above. Extremely handso account of its larger, darker green foliage and more robust habit. Extremely handsome on

Cat. No. 2340-Price, 18 to 24 in., 22c; 3 for 64c; 2 to 3 ft., 34c; 3 for \$1.01; by express.

VIBURNUM TOMENTOSUM. A strong growing, beautiful shrub. It attains the height of 8 feet, and has spreading branches, handsome felty leaves and showy flowers. The fruits, too, are decorative, especially before they change to black. Very hardy.

Cat. No. 2341-Price, 18 to 24 in., 21c; 3 for 61c; 2 to 3 ft., 32c; 3 for 95c; by express.

VIBURNUM OPULUS. Highbush Cranberry. Handsome, native shrub, attaining 12 feet, with rather smooth, light gray branches and stems. The pure white flowers appear in May and June, followed by decorative fruits, which begin to color by the end of July, and remain on the branches and keep its bright, scarlet color until the following spring. The berries are not extent by high care to be supported by the color until the following spring. are not eaten by birds.

Cat. No. 2342—Price, 18 to 24 in., 20c; 3 for 58c; 2 to 3 ft., 30c; 3 for 89c; by express.

VIBURNUM OPULUS VAR, STERILE. Common Snowball. This is the well-known common snowball of the old-fashioned gardens. Besides the snowy white flowers in May, the foliage is decorative and assumes a bright color in fall.

Cat. No. 2343-Price, 18 to 24 in., 21c; 3 for 64c; 2 to 3 ft., 34c; 3 for \$1.01; by express.

VIBURNUM VAR, PLICATUM. Japanese Snowball. One of the choicest shrubs with much to recommend it and no objectionable features. Foliage is abundant during the summer and fall and its balls of pure white are borne in great profusion. Fine for specimen planting.

Cat. No. 2344—Price, 18 to 24 in., 22c; 3 for 64c; 2 to 3 ft., 34c; 3 for \$1.01; by express.

WEIGELA (DIERVILLA.) This embraces a valuable type of graceful shrubs. The beautiful, trumpet-shaped flowers appear in May and June in such a profusion as to almost completely hide the foliage. They are very desirable for grouping and for the border. They vary in color from pure white to dark red. Following are choice varieties.

WEIGELA. HYBRID. Diervilla Mad. Coutourier. Yellowish-white flowers changing to pink.

Cat. No. 2345—Price, 18 to 24 in., 19c; 3 for 54c; 2 to 3 ft., 30c; 3 for 89c; by express.

WEIGELA ANABELIS ROSEA. Diervilla Amabelis Rosca. Very fine blooming and hardy; good habit, rapid growth, soon forming a fine specimen plant 6 feet tall, large, deep, rose-colored flowers. Cat. No. 2346-Price, 18 to 24 iu., 21c; 3 for 62c; 2 to 3 ft., 32c; 3 for 95c; by express.

WEIGELA ROSEA. Diervilla Florida. This is one of the most cultivated species of Weigelias, very free flowering, and rather hardy. May and June. They are of spreading habit and thrive in any common, humid soil and partly shaded positions.

Cat. No. 2347—Price, 18 to 24 in., 24c; 3 for 70c; 2 to 3 ft., 36c; 3 for \$1.06; by express.

WEIGELA VARIEGATED. Diervilla Florida var. Nana Variegata. This is a dwarf species with leaves variegated with white and nearly white flowers.

Cat. No. 2348—Price, 18 to 24 in., 20c; 3 for 59c; 2 to 3 ft., 32c; 3 for 94c; by express.

WEIGELA EVA RATHKE. Diervilla re a deep carmine red, ercct, Rathke. Flowers r very free flowering.

Cat. No. 2349-Price, 18 to 24 in., 21c; 3 for 61c; 2 to 3 ft., 34c; 3 for \$1.00; by express.

WITCH-HAZEL. Hamamelis Virginiana. WITCH-HAZEL. Hamamelis Virginiana. Hardy ornamental shrub or small tree with deciduous alternate leaves. Petals of flowers bright yellow, appearing from September to November. It thrives best in moist locations. Valuable on account of their blooming at a time when hardly any other shrub outdoors is in flower.

Cat. No. 2350-Price, 18 to 24 in., 22c; 3 for 64c; 2 to 3 ft., 32c; 3 for 95c; by express.

Hedge Plants

Snowballs are Great Shrubs to Plant in the Background

wers & Importers of High Class Nursery

Norway Maple

Ornamental

A noted man once said that if he knew he were to die tomorrow, he would plant a tree today. There is nothing that will give you quite as much pleasure and satisfaction in the years to come as to see a good, strong maple or other tree of your own planting.

Our list of trees consists of only the best varieties of their class, and our prices are so low that they are within the reach of everybody.

Mountain Ash

MOUNTAIN ASH—Quick growing; make handsome, symmetrical specimens; good for lawn planting. Leaves turn a brilliant yellow in fall.

Cat. No. 2470—Price, 5 to 7 ft., 50c each; 3 for \$1.35

White Birch

BIRCH WHITE (Betula Alba)-A quick growing tree that, after a few years, develops the beautiful white bark so familiar in landscapes.

Cat. No. 2471-Price, 6 to 8 ft., 75c each; 3 for \$2.00.

Weeping Cut Leaf Birch

BIRCH WEEPING CUT-LEAVED (Betula Lacinata Pendula) - Tree acquires graceful drooping habit at a very early age. Leaves are deeply cut. A very popular tree.

Cat. No. 2472-Price, 6 to 8 ft., \$1.50 each; 3 for \$3.85

Western Catalpa

CATALPA WESTERN (Catalpa Speciosa)—Ornamental especially in June, when laden with a profusion of white flowers; good for lawn or street planting.

Cat. No. 2473-Price, 6 to 8 ft., 55c each; 3 for \$1.50.

American Elm

ELM, AMERICAN (Ulmus Americana)—A familiar tree; grows well in any section. Grows fast and its gracefulness makes it invaluable for landscape work.

Cat. No. 2474—Price, 8 to 10 ft., 55c each; 3 for \$1.50.

Tree Collection

Three wonderful trees that will do well in nearly all locams. Order this bargain now. Cat. No. 2175.

Norway Maple

MAPLE NORWAY (Acer Platanoides)—One of the best hard maples. Strong and vigorous, forming a round head. Good for shade.

Cat. No. 2476—Price, 6 to 8 ft., \$1.00 each; 3 for \$2.70.

Silver Maple

MAPLE SILVER (Acer Dasycarpum)—A most reliable grower in all sections. Mares very rapidly. The silver under surface of the leaves is very beautiful.

Cat. No. 2477—Price, 55c each; 3 for \$1.55.

Scarlet Oak

OAK SCARLET (Quercus Coccinea) - Unsurpassed for lawn. Tree has a characteristic habit of growth. Leaves striking, turning to an orange scarlet in the fall. Cat. No. 2478—Price, 3 to 4 ft., 75c each; 3 for \$2.00.

Lombardy Poplar

POPLAR LOMBARDY (Populus Fastigiata)—A tall tree; good because of its columnar habit of growth, which makes it contrast with the usual spreading tree, Valuable for landscape work.

Cat. No. 2479—Price, 8 to 10 ft., 50c each; 3 for \$1.40.

Tulip Tree

TULIP TREE (Liriodendron Tulipifera)-Belongs to the family of poplars. It flowers freely in June. A good tree any place.

Cat. No. 2480—Price, 4 to 5 ft., 45c each; 3 for \$1.30.

Weeping Willow
WILLOW, WEEPING (Salix Babylonica)—This is the well known tree whose long
pendulous branches droop gracefully. An admirable lawn tree. Grows well in all
locations. For landscape work it is unexcelled.

Cat. No. 2481-Price, 8 to 10 ft., \$1.00 each; 3 for \$2.80.

Horse Chestnut

HORSE CHESTNUT (Aesculus Hippocastanum)—Good for ornamental or shade tree. coms freely in May. Striking deep green foliage.

Cat. No. 2482-Price, 3 to 4 ft., 75c each; 3 for \$2.00.

Mugho Pine Mugho Pine

A pine of low, dense spreading growth of very dark foliage. It is of dwarf habit, grows rapidly everywhere and becomes more beautiful cach year.

Cat. No. 2454-Price, 1 to 11/2 ft. plants, 85c each; 3 for \$2.00, by express.

Larch, European

(Larix Europea). This variety has an upright habit, and is one of the best lawn trees, making very attractive specimens for grouping or individual planting. In the spring it is among the first to be covered with its new growth of soft, feathery, light-green follage. The flowers are purplish and the cones are small, with small scales. The Larch stands transplanting well, but this must be done early in spring before new growth begins.

Cat. No. 2455-Price, 2 to 3 ft., 40c each; 3 for \$1.00, by express.

EVERGREENS

A WORD ABOUT THEM

A WOKD ABOUT THEM

There is no tree I like better than an evergreen. Nothing can take their place, especially during the winter when everything is bleak and dreary. A few years ago I purchased quite a few evergreens for myself. Naturally I bought them as cheap as I could. A great many of them died, but I did not know the reason until I went into the nursery business for myself. I found I could buy common evergreens for one-half the price of transplanted evergreens. I found that good nursery evergreens are transplanted several times to promote the growth of many small roots, which are so necessary to the growing of evergreens after the customer receives them, and which non-transplanted evergreens do not have. Needless to say I decided to sell nothing but the transplanted kind, and I want everybody to order at least one or two of these extra fine sorts, which I guarantee are everything that a good nursery evergreen should be.

WM. GALLOWAY.

American Arbor Vitae

Ornamental native evergreen that is very hardy. It grows in pyramidal shape; has very dark foliage. It will do well in most any soil and its fragrance is very sweet and healing; a very beautiful

rance is very sweet and nearly.

evergreen.

Cat. No. 2452—Price, 2 ft. plants, 45c; 3 for \$1.25, by express.

Austrian Pine

A robust grower with large dark needles. Does well in all soils; does especially well for lawn

White Spruce

A native tree of medium size and will reach a height varying from 25 to 50 feet. The tree grows pyramidal in shape; has silvery gray foliage with light colored bark, making it a valuable evergreen for any purpose; very hardy and will do good in any elimate. Cat. No. 2458—Price, 2 ft. trees, 45c each; 4 for \$1.25.

April 10, 1915.

Galloway Bros. & Co.
Waterloo, Iowa.
I received the express and mail packages and they were in very good condition. Mr. Galloway, I think your plants are the largest and most vigorous that I have ever seen.

W. R. Otto,
Little Plymouth, Va.

Koster's Blue Spruce

American Arbor Vitae

This is one of the very finest evergreens for hedges. It is very hardy and will shear better than any other variety, making a very beautiful of the hedge or screen to divide grounds. It is also an excertionally fine plant for planting as single specimens.

Cat. No. 2451—Price, 2 to 4 ft. specimens, 60c each, by express; 3 for \$1.50.

Balsam Fir (Balm of Gilead)

Opportunity of the plant of Gilead)

Opportunity of the vergreen that is very hardy.

Cat. No. 2456—Price, 2 to 3 ft. the plant of Gilead of Gilead of the plant of Gilead of Gilead

Norway Spruce

A very beautiful evergreen of large and lofty appearance. It is well adapted for wind break purposes and will stand pruning well when planted for hedge. It is very picturesque; rapid growing and will do well in any climate or any soil.

Cat. No. 2457—Price, 2 to 3 ft.

Cat. No. 2453—Price, 2 to 3 ft. trees, 60c plants, 60c each; 3 for \$1.50, by each; 3 for \$1.50 by express.

Evergreen Bargain

We are making a special offer of evergreens which we know will do well in every locality and which will be a source of pride and joy to the owner in a few years' time. It is wonderful the change that can be brought about on any home grounds by developing a few trees and it is exceptionally so of evergreens, as they will be especially appreciated during the blesk winton months.

White Spruce

Cat. No. 2459-Price, these 3 trees for \$2.75, by express.

Nut Trees

American Sweet Chestnut

A valuable native tree, both useful and ornamental. The timber is desirable and possesses a fine grain for oil finish. They are a remarkable race of trees, bearing very young, and yielding large crops of nuts of extraordinary size. The nuts are sweet, delictously flavored and are a valuable item of commerce.

Cat. No. 2420—Price, 3 to 4 ft., 32c;

\$25.00 per 100.

American Chestnut

Black Walnut

This is one of the largest, grandest and nost massive, trees of our native forests. It is a favorite of the landscape gardener. We recommend it for public streets and avenues, because of its rapid growth and handsome folinge. The timber of this tree is also considered very valuable. The nuts are large, round, covered with a thick husk; the kernel possesses a very fine flavor, considered by some to be better than any other walnut.

Cat. No. 2421-Price, 2 to 3 ft., 12c each, or \$5.00 per 100; 3 to 4 ft., 25c each; \$22.00 per 100.

Pecan

profits. The trees are long-lived, quite hardy, and productive. A species of hickory, which may well rank first among our native nuts. The nuts are large, thin-shelled, full kernels, and of rich flavor.

40c each; \$25.00 per 100.

English Filberts

(Hazelnuts.) Grow wild throughout the United States. The nuts are of medium size, nearly round, rich flavor, and of superior quality. The cultivation of these nuts is very profitable.

**Cat. No. 2426—Price, 2 to 3 ft.. 23c each; \$20.00 per 100.

English Walnut

A fine ornamental tree that grows well in the climate of the Middle States and bears freely. Large profits are realized from the orchards of California and the South, and great quantities of the nuts are imported. The nut has a very thin shell, about the size of the black walnut, and contains a large kernel which has a very delicate

Price, 2 to 3 ft., 60c each; \$42.00 per 100.

Japan Walnut

The tree is very handsome; its large spreading top makes an ornamental tree as well as a useful one. These trees are very hardy, having stood a temperature of twenty-one degrees below zero without injury, and commence to bear at three years of age. The nuts are larger than the common hickory nut, and are borne in clusters of from ten to twenty. The shells are moderately thick, but the kernels are very sweet. Should be extensively planted.

Cat. No. 2424—Price, 3 to 4 ft., 26c each; \$22.00 per 100.

Pecans

Pecan growing is becoming a favorite industry in the Southern and Middle States, yielding large profits. The trees are long-lived, quite hardy, and productive. As yellows were allowed to a productive with a productive was a park tree. See an elong-lived, and productive. As yellows were allowed to a productive was a park tree. Campanula Carpatica (Bell Flower)—An easily cultivated perennial with a profusion of blue bell-shaped flowers.

Cat. No. 2389—Price, 2-vear-old plants, 14c each; 3 for 40c, by express.

Coreopsis (Tickseed)—Valuable border plant, has a profusion of showy yellow flowers which are much prized for cutting.
Cat. No. 2391—Price, 2-year-old plants, 13c each; 3 for 35c, by express.

Dianthus Holborn Glory (Hardy Pink) — The finest strain of this old fashioned flower.
Cat. No. 2393—Price, 2-year-old plants, 20c each; 3 for 50c, by express.

Dicentra Spectabilis (Bleeding Heart)—A charming hardy perennial with much cut foliage and flowers of interesting

Hibiscus Mechani (Mallow Marvets)—An improved hybrid of these beautiful tall perennials, in deepest shades or red.
Cat. No. 2398—Price, 2-year-old plants, 20c

each; 3 for 50c, by express.

Gaillardia Grandiflora (Blanket Flower)—A very hardy old favorite, with intense blood crimson flowers, margined with yellow. Cat. No.2399—Price, 2-year-old plants, 12c each; 3 for 35c, by express.

Iris (German)—Mixed colors including many different shades. Cat. No. 2401—Pricc, 2-year-old plants, 12c each; 3 for 35c, by express.

Iris Kampferi (See cut) (Japanese)—Including many beautiful shades. Will do well in a moist location.
Cat. No. 2402—Price, 2-year-old plants, 20c each; 3 for 50c, ky express.

Peonies-See pages 72 and 73.

Phlox

The neat habit, bright colored flowers, pro-fusion of bloom and ease of culture make the phlox a great favorite Prices below are for 2-year-old stock.

Snowflake—Pure white, Cat. No. 2405—Price, 20c each; 3 for 50c.

Bridesmaid—White with pink center. Cat. No. 2406—Price, 13c each; 3 for 35c.

Eclaireur—Carmine purple, Cat. No. 2408—Price, 15c each; 3 for 40c.

Platycodon Grandiflurum (Japanese Bell-flower)—Handsome hardy perennial with bell-shaped blue flowers.

Cat. No. 2409—Price, 2-year-old plants, 20c each; 3 for 50c.

Tritoma Pfitzerii (Red Hot Poker)—The fiery red of the drooping flowers, one hundred on a spike, is a memorable sight.

Cat. No. 2411—Price, 2-year-old plants, 20c each; 3 for 50c.

Hardy Vines

AKEBIA QUINATA—A hardy ornamental vine of graceful appearance, especially desirable for places in which very dense shade is not desired. They require a sunny position and well drained soil, in Japan, the fruit is very showy, but with us is rare.y produced. The foliage is never attacked by insects.

Cat. No. 2362—Price, 2-year-old plants, 23c each; 6 for \$1.25.

age and flowers of interesting structure, CLEMATIS JACKMANII—One of the best known of all the Clesix inches across, very velvety, and distinctly veined, Cat, No. 2364—Price, 2-year-old plants, 3Sc each; 3 for \$1.00.

CLEMATIS MAD, ED ANDRE—This is the nearest approach a bright red Clematis. CLEMATIS MAD, ED ANDRE—This is the nearest approach to a bright red Clematis. It is a very free bloomer and very satisfac-

tory. Cat. No. 2365-Price, 2-year-old plants, 40c each; 3 for \$1.10

CLEMATIS PANICULATA—This Clematis is by far the most common of all species in American gardens.

It is extremely showy when covered with the small, white fragrant flowers, and much appreciated, as the flowers appear later in the season when other vines are not blooming.

Cat. No. 2366—Price, 2-year-old plants, 25c each; 5 for \$1.00.

AMPELOPSIS VEITCHH (Boston Ivy)—This vine undoubtedly stands higher in the estimation of the people than any other. After once established, it grows rapidly, and will stay indefinitely, needing only an occasional trimming to keep it within bounds. It is not attacked by disease or insects, and the foliage is not injured by the smoke and dirt of cities. The glossy green leaves turn to a brilliant orange-scarlet in the Fall.

Cat. No. 2361—Price, 2-year-ald plants, 21c; 6 for \$1.10.

DUTCHMAN'S PIPE (Aristolochia Sipho)—This is a very vigorous and rapid-growing vine. Bears striking brownish-colored lowers resembling a pipe in shape. Has fine, large green leaves hat gives the plant a tropical appearance. Cat. No. 2367—Price, 2-year-old plants, 50c each; 5 plants for \$2.00.

KUDZU VINE—A hardy vine with large, tuberous, starchy roots, naking a most remarkable, vigorous growth of slender, hairy tems. The leaves are variously lobed but the margins are entire. From a well established root vines will grow forty to sixty feet a season, producing a profusion of large leaves. In the North he vine dies to the ground during the Winter.

at. No. 2368—Price, 2-year-old plants, 22c each; 6 for \$1.20.

LONICERA JAPONICA HALLIANA (Hall's Japan Honey-wall, as the leaves remain on during the finiter. The flowers are white, turning to yellow, and are very ragrant.

at. No. 2369—Price, 2-year-old plants, 21c each; 6 for \$1.10.

at. No. 2369-Price, 2-year-old plants, 21c each; 6 for \$1.10 at. No. 2369—Price, 2-year-old plants, 21c each; 6 for \$1.10
MATRIMONY VINE (Lycium Chinense)—A hardy, ornamental, eciduous, fast-growing vine. Especially attractive in the Fall, then the long, slender branches are loaded with bright red uits, which contrast well with the foliage. The leaves remain esh and unchanged in color until they drop after severe frost. at. No. 2370—Price, 2-year-old plants, 25c each; 5 for \$1.00.
WISTARIA CHINENSIS (Purple Wistaria)—This is one of the lest and commonest of hardy climbers. It has pale green pinnate layes and bears profusely dense, drooping clusters of purplish, ea-shaped flowers. It blooms in May and usually gives a smaller cop of blooms in August or September.

(at. No. 2371—Price, 2-year-old plants, 26c each; 5 for \$1.10.

Boston Ivy

ay Brothers & Company.

Order Early-We will appreciate an early order and can give it better attention if it reaches us before the rush season. Be sure and write your name and address plainly.

Orders will be acknowledged by postal card with the exception of orders for seeds to be forwarded by parcel post. These will be mailed the day order reaches us.

Prices on field seeds will be subject to market changes and unless you request otherwise, we will fill your order to the full amount of your remittance at the prevailing price. Prices usually advance steadily during the season, so it will be to your advantage to order early.

Galloway Brothers & Co. give no warranty, expressed or implied, as to description, quality, productiveness, or any other matter of any seeds, bulbs, plants, shrubs or trees they send out, and they will not be responsible in any way for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

Remittance—Our terms are cash with the order. We do not care to ship goods C. O. D. unless it is absolutely necessary, as this would mean additional expense to you. All remittances should be sent in by postal or express money order, draft or personal check. Coin, currency or stamps should be registered. We cannot be responsible for coins sent in with ordinary mail.

Shipments—We make shipments promptly. Seeds and "Nitragin" will be shipped immediately. Nursery Stocks and Bulb's about April 1st, or as soon as weather conditions permit. Tender Plants about May 1st, or before, if weather will permit. Potatoes and Onion Sets just as soon as weather is favorable.

If you order field seeds, garden seeds, shrubbery, nursery stock and plants, don't expect it to be shipped all at one time because if you order garden and field seeds in time to plant it is often too early to ship nursery stock and tender plants.

We Guarantee Safe Delivery

We will replace or refund for any damage or shortage that may occur in transit, provided you have the agent note the condition of the shipment on the freight or ex-press bill and return it to us.

Errors—All orders are carefully checked before packing, but during the rush season it is impossible to guard against all mistakes. In case any error has been made in filling your order, notify us, giving your order number, if possible, and it will be adjusted to your satisfaction at once.

How We Ship—If catalog reads, "Postpaid," we ship cither by parcel post or prepaid express—your choice. If order also contains seeds to be forwarded by express at your expense, we reserve the right to enclose "postpaid" seeds and make up the saving with extra seeds. If your order includes articles which we do not prepay and you desire it sent by parcel post add parcel post fee to your remittance. You can easily figure this by referring to parcel post map and rate scale. Articles marked "By Freight or Express," or not marked "Postpaid," will he f. o.b. Waterloo, or shipping point; bags and packing free. If shipment goes forward at your expense we prefer to have you specify whether by freight or express and by what line or company. When shipment is forwarded by express we will advise you by postal card and when by freight we send you copy of the bill of lading. If there is no freight agent at your station it will be necessary to prepay charges to have delivery made at that point. Please add amount of freight charges to your order. If you cannot ascertain what charges will be no your shipment, write us and we will be glad to secure this information for you.

Nursery Stock

Include your order for nursery stock with your seed order, and we will be glad to ship when proper season arrives or at whatever time you say. We guarantee our nursery stock to reach you in good condition and to be of size and age mentioned. In case shipment arrives in bad condition, have the express agent note the particulars on your Express Reccipt.

The Wrong Way to Plant

We Design and Plant Large Grounds Public or Private

The free plan offer on this page refers to only home grounds of ordinary size, but not to large estates, parks, cemeteries, or the grounds of large size. However, we furnish plans by mail for such grounds, or where desired, we can have our Landscape Gardener cali and look over your work personally, and this insures having your work done correctly.

Our terms for this work is very reasonable and we solicit correspondence from anyone interested in laying out School Grounds, Factory Grounds, Park or Cemetery, or in fact, grounds of all kinds.

Read This Page!

It Is of Special Value to Every Farmer and Property Owner

It Is Worth Money to You

We want to show you, how you can beautify your home-make it worth 100 per cent more than it costs you.

Do you realize that the appearance of the grounds immediately surrounding your premises has a great deal to do with the selling value of your house or farm on which it stands?

The well appearance of your home grounds means, therefore, money to you in the increased valuation of your home, besides it is a pleasure to every home owner to own beautiful grounds.

Trouble to take care of? Well I should say not. We can select such a planting for you as will give you less trouble than the trees about your place, and such as will grow and become more beautiful each year, and will give you a mass of flowers from spring till fall. In other words.

Landscape Your Premises

The trouble with most of us is, we will buy a shrub here and a tree there and at the end of five or ten years our place is just the ordinary one that we see everywhere. We wind up where we started. Instead of this, why not have a definite scheme or plan drawn up, which will make your place a distinctive one, and one out of the ordinary.

Let Us Draw Up a Landscape Design for You

We will be glad to make a sketch of your grounds, showing how to lay out and plant your grounds in an artistic and attractive way. Make up a sketch of your grounds on the reverse side of this sheet, following instructions at the bottom of the page.

side of this sheet, following instructions at the bottom of the page.

When the sketch is sent us remit one dollar (\$1.00), for which we will at once send a coupon for the amount, and this coupon will be accepted by us as part payment on an order amounting to \$5.00 or more. We wish to impress upon the minds of our customers that this is not a scheme of any kind by which we are receiving pay for the sketch, but it is only as a safeguard against some curious persons that would impose upon us and ask for plans with little or no intention of making use of them. These plans we furnish are not stock plans, but you will receive a plan made specially for your own grounds. The planting arrangement is worked out by our Landscape Architects to meet the requirements of your place.

Extract from Farmer's Bulletin No. 185

Beautifying the Home Grounds

U. S. Department of Agriculture

In a new country such as ours the adornment of grounds has naturally received too little attention. The people have been necessarily concerned with acquiring lands and buildings, but a stage of development has now been reached when Americans should give more attention to the embellishment of their home grounds. The first essentiai in the adornment of a home area is the formation of a suitable plan. In making this plan the principal things to be considered are the size of the area, the amount which the owner feels able to expend for the purpose, the climatic conditions, the soil, the exposure, the peculiarities of the site, and the style of treatment, whether formal or informal.

This map should locate all existing structures. Indicate the direction in which the most pleasing outlooks are to be had. The aim should be to hide, by means of trees and shrubbery, ail objectionable buildings or portions of the place, and also to shut from view all unsightly objects maintained by nelghbors. To locate the trees and shrubs so as to allow an uninterrupted line of vision where the outlook is pleasing and to so locate the plantings as to afford the greatest protection from winds and undesirable surroundings consistent with good landscape

The Right Way to Plant

Hints Are Very Helpful to Us in Preparing a Plan That Will Be Suitable to Your Grounds Therefore We Ask You to Answer the Following Questions:

Do you like natural gardening?	Do you want a rose bed?
Do you like straight lines or formal gardening?	Would you like a hedge? Show where.
Would you like us to use our own judgment?	Shall we locate trees for you?
Shall we locate your walks?	Do you want any fruit trees?
If you want a drive, show where you prefer it.	What particular kinds of trees do you want?
	Do you like Evergreen Trees?
Would you like all hardy plants?	Please give approximate amount you wish to spend.

Galloway Bros.	& Company,	2	*	
Waterloo,	Iowa			1

Gentlemen:—Below is a sketch of my grounds I wish to improve, and I shall be pleased to receive a plan from you as per your offer on the other side of this sheet. I enclose \$1.00 (currency) for which you are to send me a coupon good for this amount on an order for plants amounting to \$5.00 or more.

Name

EACH SQUARE REPRESENTS FOUR FEET

Typertant

Your sketch should be drawn to scale and should give all the principal dimensions. Each square on this sheet represents four feet, so if your lot is 100 feet wide, it will require 25 squares to scale it correctly. If your grounds are too large, you can use 6, 8 or 10 feet to each square, and in such a case, it should be noted on your sketch. Your sketch should locate all walks, drives, trees, buildings, entrances to buildings and grounds, and any other permanent objects. It should also show where the highest and lowest points of the lot are located, directions of the compass (North, South, East and West), and also to direction to town or city. It would be a help also, to show where there is a good view which you want kept open, also, bad views and anything which might be of help to us in laying out your grounds in the best manner possible.

GALLOWAY BROS. & Co. give no warranty, expressed or implied, as to description, quality, productiveness, or any other matter of any seeds, bulbs, plants, shrubs or trees they send out, and they will not be responsible in any way for the crop. If purchaser does not accept the goods on these terms, they are at once to be returned.

Iowa's Earliest and Best Oat

We are very pleased to be able to state that we have an exceptionally fine stock of Iowa 103 oats on hand ready for immediate delivery. You have all heard about this wonderful oat; its exceptional earliness, and its ability to stand up under conditions that would cause other oats to lodge. For the past two years, it has out-yielded all other early oats in the Corn Belt; 70 to 100 bushels per acre were common yields. The stock we offer was raised from seed originally secured from the Ames Experimental Station, and can be in every way relied upon. This seed has been thoroughly recleaned, and we are sending out only good plump grain, which should insure farmers getting maximum yields of this fine oat. Don't delay your order until seeding time, as the demand for the Iowa 103 oat is so heavy that we doubt very much whether we will be able to fill orders if they are delayed until seeding time.

"NITRAGIN"

"NITRAGIN" is a PURE culture of virile legume bacteria scientifically prepared. "NITRAGIN" is not a doubtful jelly culture but is packed in a special granular medium in a ventilated can. "NITRAGIN" will insure a catch of alfalfa, clovers and all legumes -means abundant nodules on the roots-healthy, vigorous plantsbigger crops for you. "NITRAGIN" has been tried at many experiment stations with very gratifying results. All stations recommend inoculation of all legumes.

"NITRAGIN" has been used by some of the largest growers of legume seeds in the country and THEY HAVE ALREADY PLACED THEIR ORDERS FOR THOUSAND OF ACRES THIS YEAR.

"NITRAGIN" has been used by thousands and thousands of farmers and gardeners who are enthusiastic over the results. What "NITRAGIN" has done for them it will do for you.

Ask for Our Books on Clovers

Prof. Lipman of the N. J. Experiment Station writing in SOIL SCIENCE, June, 1916, says: "There were marked differences in in the effectiveness of the different cultures. Among commercial cultures 'NITRAGIN' was evidently the most effective.

Lansing, Ill., Aug. 17, 1914.

"I sowed five acres last year, August 21st, which I inoculated with your "NITRAGIN" and I got a perfect stand. I have made two cuttings and it is about 4 to 6 inches high now."

C. W. BLOCKER.

Results of Satisfied Customers

Anita, Iowa, Dec. 17, 1916.
The Yellow Dent Seed Corn obtained from you last spring resulted in a 100 per cent stand for which we thank you.

Anita, Iowa, Dec. 17, 1916.
Yours,
Yours,
S. PETTY.

Last spring I bought some seed corn of you and I surely got a fine crop from it. If you need some seed corn now—then I can sell you some of the same kind back again.

HANS BECK,
Cedar Falls, Iowa. Route 2, Box 58.

Rogerson, Idaho, October 17, 1916.
Would like to say that we used some of your grass seed out here in Idaho, on land that was cleared this spring, and had the best lawn in the neighborhood.

Very truly yours,

State Center, Iowa, December 5, 1916.

MRS. R. D. IOLDERSMA.

Mr. William Galloway, Waterloo, Iowa.

Waterloo, Iowa.

Dear Sir:

I take pleusure in writing you a few lines in regard to the seed you sent me last spring. I think we had very good success, considering the dry seasoa. We raised about 250 bushels of onions; and those sample watermelon seed, we planted seven hills. We had 50 melons that got ripe. I am sending you a picture of our little boy standing in our onion patch, with two of the watermelons and a basket of opions.

1. P. FRELAND.

Davisburg, Mich., Sept. 29, 1916.

Galloway Bros. & Co., Waterloo, Iowa.

We have rented an 80-acre farm, which is pretty well run down, but we want to go at things in a scientific way. All the old farmers around here laugh. They think any old seed is good enough, but we do not. We have tested your seeds, and the order will give you ought to be enough to let you know what we think of them. A. E. MUIR.

Route 2, Davisburg, Mich.

Silver Lake, Indiana, December 8, 1616.

Gentlemen:

We bought seeds of you two years ago, and had a fine garden. Last year we bought our seeds at our home town and not a seed grew, so we did not have any garden at all, but this year I am going to send back to you for seeds.

HAZEL E. PERRY.

The Alfalfa seed which I sowed which I got from you is perfect. I moved it once and some of it is 20 inches high now again.

Yours truly

JESSE D. REUTHER. R. 1, Box 81, Loganton, Penn Kansas City, Kansas, Dec. 11, 1916.

Galloway Bros. & Co., Waterloo, Iowa.

Gentlemen;

I will say a word about the seeds I bought from you two years ago when I was in Iowa at the north line. It was cold and wet there. All the seed did fine except the outon seed. None came up, the ground was too cold and wet. The neighbors said I had the finest garden in the country that summer.

I came to Kansas and had some of most all kinds of the seeds left. I planted them here last spring. They all grew fine. The neighbors said I had the finest garden they saw any place.

I sold out and bought one acre one mile west of the city, lots of water, fine soil. In the spring I want enough seeds to plant it, and more if I can get the ground close.

Son. In the spring a value according to the colors.

Your seeds can't be beat, and I want another Planet, Jr. cultivator and seeder, if I can get one that drops in the ground the same as on top. I had two paralytic strokes, but I can cultivate with the Planet, Jr.

Please send me your 1917 catalog, and oblige.

W. G. ROOSA.

P. S. I never get tired looking at your old catalogs.

Galloway Bros. & Co., Waterloo, Iowa.

Waterloo, Iowa.

Gentlemen:
Under the signature of my sister, at whose home I am staying, I last spring ordered a lot of seeds from your company, and also, in reply to a letter of inquiry, received a very helpful letter of instruction concerning the successful raising of your Champion Pickler Cucumber. I followed the instructions you gave me and was very

Champion Pickler Cucumber. I followed the instructions you got to successful.

Seventy hills of cucumbers yielded 2,200 pickles and 22 pounds of slicers, from about August 15th to September 20th, or until the vines were killed by frost. They yielded well in spite of a three weeks drought, while the neighbors vines died on that account. I intend to raise many more of the same kind of pickles next year, as there is a demand for them, here, and I will order the seed from you later.

I also raised the Russian Giant Sunflower, and have on hand about two and one-half bushels of seed taken from the heads 10 to 15 inches in diameter, that were borne on stalks 8 fect to 10 feet high. I discarded all heads less than 10 inches in Very truly,

MRS. NELLIE DEMMITT,

Route 1, West Jefferson, Ohio.

Monterey, Va., Oct. 19, 1916.

William Galloway, Waterloo, Iowa.

Dear Sir:

Am enclosing a picture of how your Regenerated Swedish Select Oats grow in Viginia, Highland County.

This oats made 56 bushels to the acre, after falling down that in the green state. Had to mow it with a scythe, shocked it up like hay and threshed it so.

Otherwise it would have made 75 bushels or mora to the acre.

Very truly yours,

RICHARD C. JONES.
